

## PRACTICAL FISH MEN TALK OVER BUSINESS PROSPECT IN BOSTON

International as Well as Local  
Phases of the Industry Are  
Fully Discussed at Ameri-  
can House.

## TREAT ALL SIDES

The Occasion Is Initial Fall  
Luncheon and Meeting of  
Members of the Chamber of  
Commerce Assembly.

One of New England's greatest indus-  
tries, the fish business of Boston and  
Gloucester, second only to the famous  
port of Grimsby, Eng., occupied the  
attention of the members and friends of  
the Chamber of Commerce assembly at its  
initial autumn meeting luncheon at the  
American House this afternoon.

Chairman Charles S. Hamlin presided  
and introduced as speakers, Leonard  
A. Treat and C. K. Sullivan, practical  
men who know how to catch fish on the  
banks and sell them on the wharf.

The subjects cover the international as  
well as the local phases of the industry  
as it applies to New England. They are—  
(1) The Salt Fish Business; (2) The  
Fresh Fish Business; (3) The Herring  
Fisheries Decision; (4) New T. Wharf  
in Boston. The remarks of the speakers  
were particularly interesting as relating  
to the current outlook of this industry  
and from the narrative point of view.

Mr. Sullivan related briefly the magni-  
tude of the fresh fish industry as it re-  
lates to Boston and then spoke of the  
manner in which the fish are caught. He  
divided the vessels into three classes, the  
shore boats, which go out and back every  
three days, the offshore boats, which  
make trips of three to five weeks, and  
the vessels which ply between the two,  
making weekly trips.

All of these vessels, Mr. Sullivan said,  
have dories, trawls, and the regulation  
equipment. In speaking of the manner  
of putting out the dories, Mr. Sullivan  
said that the vessels sail across the tide,  
and drop the dories every 200 feet or so  
to put out their trawls. When the tide  
slackens, all the fish that will bite have  
done so.

Mr. Treat said that the beginnings of  
the fish business were the beginnings of  
the Massachusetts Bay and Plymouth  
colonies. No sooner had the early col-  
onial settlers arrived in these waters  
than they sprang up the business of  
catching fish for home consumption, soon  
followed by a development of a cod  
fishery that looked to England and the  
continent for a market for its product—  
salt cod.

As the pioneers of the West settled  
and made their homes there they sent  
back East for the old home food. The  
old-fashioned salt cod, the soaked-out  
breakfast mackerel, the appetizing  
smoked herring, could be procured only  
in New England, he declared.

With the increase of the western popu-  
lation the demand for cod fish likewise  
increased, according to Mr. Treat, who  
declared, however, that the South never  
took kindly to codfish; but from that  
source has come an ever increasing de-  
mand for salted mackerel and salted  
herring.

Mr. Treat said, furthermore, that he  
recalled the first carload of canned  
salmon, sent to Boston by an intrepid  
merchman from the Pacific coast. There  
were a few purchasers for single cans,  
but after working for many weeks on the  
300 cases, they were finally placed with  
a concern for sale, and were disposed of  
by this concern whose sales of other fish  
were between one and two million dollars  
after two years of effort.

## GOODBYES DELAY LINER CANADIAN FOR TEN MINUTES

The Leyland liner Canadian, Capt. W.  
H. Bullock, was today held 10 minutes  
over her schedule sailing time, mainly by  
the reluctance of missionaries and their  
friends to part. The steamer left East  
Boston shortly after 11 a. m.

There were 35 missionaries of the  
American Baptist Foreign Mission Soci-  
ety on board bound for stations in As-  
sam, South India, and Burma. Just be-  
fore sailing a religious service was held  
on board and this was a principal cause  
of the delay in clearing the decks of non-  
passengers.

Among the departing missionaries  
were: Mrs. J. M. Baker, Miss Mildred  
Baker and nurse, Miss K. Darmstadt,  
Miss Ellen Drepper, the Rev. and Mrs. B.  
J. Rockwood with their two sons, Miss  
Florence Rover, the Rev. E. E. Silliman,  
the Rev. and Mrs. S. W. Stenger, Misses  
Katherine and Margaret and Master El-  
bert Stenger, for India; Dr. and Mrs.  
J. R. Bailey and child, Miss C. L. John-  
son, the Rev. and Mrs. F. H. Knollin,  
Miss E. M. Northrup, Miss Freda Peter,  
Miss H. W. Petheram, Mrs. R. E. Price,  
Miss E. R. Price, Miss M. Sutherland,  
Dr. and Mrs. J. G. Woodin and Miss M.  
Young, for Burma; the Rev. and Mrs.  
G. R. Kampfer, for Assam.

## STATE FIREMEN MEET IN LOWELL FOR CONVENTION

Mayor Welcomes Association  
Members to Three Days  
Sessions, Which Include  
Parade Feature Friday.

LOWELL—Lowell is bedecked with  
flags and bunting for the thirty-first  
annual convention of the Massachusetts  
State Firemen's Association, which be-  
gan its three days sessions in Lincoln  
hall this afternoon. It is expected that  
1000 delegates will attend.

Tonight there will be a reception at  
the New American house, the convention  
headquarters. For Thursday afternoon  
automobile owners of the Lowell Board  
of Trade have offered their cars for a  
tour of the city, while on Friday there  
will be a trolley trip.

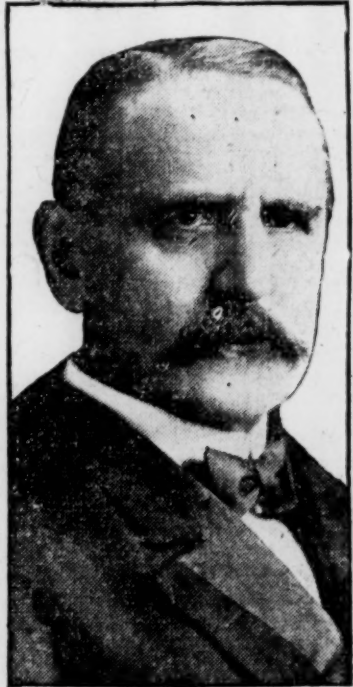

The sessions open this afternoon at  
2:30 o'clock at the call of Second As-  
sistant Chief Burton Steere of the Spring-  
field fire department, president for two  
years. Mayor John F. Meehan will make  
the address of welcome, and Chief Hos-  
mer of the Lowell department will ad-  
dress the delegates.

## REGULARS IN HOUSE GIVEN SEVERE BLOW BY TAWNEY DEFEAT

WASHINGTON—In the defeat of  
Representative Tawney of Minnesota the  
regulars lost a strong arm in the House.  
Progressives and conservationists today  
hailed his downfall as one of their most  
important victories in the campaign.

Mr. Tawney's exit will make vacant  
the place of greatest power, next to that  
of the speaker, in the House. As chair-  
man of the committee on appropriations  
he had charge of the disposition of hun-  
dreds of millions of dollars annually.  
For many items the appropriating of  
money or the withholding of it depended  
entirely on whether Mr. Tawney said  
"yes" or "no." This gave him great in-  
fluence among the members, nearly all  
of whom were obliged to go to him for  
favors.

Tariff and conservation brought Mr.

## MR. CANNON FIRM IN ALLEGIANCE TO REGULAR FORCES

Accepting Nomination De-  
clares He Has No Defense  
for the Payne-Aldrich Tar-  
iff, "for It Needs None."

DANVILLE, Ill.—"I have no defense  
to make of the Payne-Aldrich tariff  
law, for it needs none. It is the enact-  
ment of the pledges made by the Re-  
publican convention of 1908. It is in  
keeping with the policy of protection  
which the Republican party has main-  
tained as the correct revenue policy ever  
since the election of Abraham Lincoln;  
in fact, it is in harmony with the very  
first revenue legislation of the first  
Congress under the administration of  
Washington."

Speaker Joseph G. Cannon, in a letter  
to his congressional convention today,  
accepting his twentieth nomination as a

## CANADIAN FINDS COUNTRY NEEDS NO RECIPROCITY

President Hendry of Manu-  
facturers at Vancouver Says  
United States Seeks but  
Neighbor Doesn't Need It.

VANCOUVER, B. C.—The proposal for  
reciprocity negotiations between Canada  
and the United States received a blow at  
the hands of President John Hendry in  
an address at the thirty-ninth conven-  
tion of the Canadian Manufacturers Asso-  
ciation which will close tomorrow. It  
will later be the subject of a resolution.  
President Hendry said:

"I desire to emphasize the contrast be-  
tween the reciprocity situation as it pre-  
sents itself today and as it presented  
itself 40 years ago. At that time it was  
Canada who came forward as the sup-  
plicant anxious to secure a market in the  
United States for her natural products.  
Today it is the United States who comes  
forward as the supplicant, anxious to se-  
cure a market in Canada for her manu-  
factured products. Canada today stands  
in no need of reciprocity with the United  
States."

## MR. TAFT CONDEMNS "PORK BARREL" TYPE OF WATERWAY BILLS

President Speaks at Cincin-  
nati's Celebration of the  
Opening of the Ohio River  
Dam This Afternoon.

## COOPERATION URGED

Foresees Advantages From  
United Action for Water  
and Land Traffic and Broad  
Legislation.

CINCINNATI—President Taft is the  
guest of honor in his home city today,  
having come here for the purpose of  
attending the Ohio Valley exposition,  
which opened Aug. 29 and will close  
Sept. 24.

The President was escorted to the ex-  
position this morning and was the guest  
at an informal luncheon on the ex-  
position grounds tendered by the ex-  
position commissioners.

Following the luncheon the President  
delivered an address before the Ohio Val-  
ley Improvement Association, and to-  
night he will attend a dinner of the  
Business Men's Club.

In his address he referred to the Ohio  
river improvements, including the new  
dam, and touched upon the need of co-  
operation to utilize the railway and  
waterway transportation facilities to  
best advantage and deprecated the "pork  
barrel" method of making congressional  
appropriations for river and harbor im-  
provements.

President Taft said in part:  
"Today you are celebrating the open-  
ing of another great improvement, which  
must in the future have much to do  
with the business growth of the city.  
I mean the improvement of the Ohio  
river from Pittsburgh to Cairo. It is to  
this improvement that I shall direct my  
remarks this afternoon."

"The waterways commission points  
out that in localities where water-borne  
traffic has been increased, as on the  
Great Lakes, careful and elaborate pro-  
vision has been made for the handling  
of freight in the most economical man-  
ner. An examination shows that the  
average rate of speed of a railroad car  
loaded with freight is not much greater  
than would be the speed of a tugboat  
and barges on one of our rivers, and if  
we could have a river navigable at all  
times of the year at the same depth  
there would seem to be no reason why  
schedules could not be made quite as  
regular as those upon railways."

"One of the great reasons for the de-  
crease of river transportation has been  
the competition of the railways' physical  
advantages. More than this, traffic man-  
agers of railways have lowered their  
own traffic rates where there is water  
competition until the river business has  
been entirely discouraged and then raised  
the rates when the river business has  
been thus suppressed."

"Provision has been made in the rail-  
way act passed at the last session of  
Congress which will prevent railroads  
from adopting this device of destroying  
river competition. The truth is that  
with the new development of river busi-  
ness it will be possible to give power to  
our interstate commerce commission to  
make regulations for the joint traffic  
between rivers and railways that will  
greatly encourage the continuance of the  
river business, for if we would use our  
waterways in the most economical man-  
ner, there must be a friendly cooperation,  
as the waterways commission points out,

(Continued on Page Five, Column One.)

## SEEKS TO AVOID PASSING UPON HIS OWN OFFICIAL ACT

WASHINGTON—Charles E. Hughes,  
when he becomes a member of the su-  
preme court of the United States next  
month, will ask to be excused from the  
hearing of one of the first cases  
that will come before the tribunal, be-  
cause it concerns one of his own official  
acts.

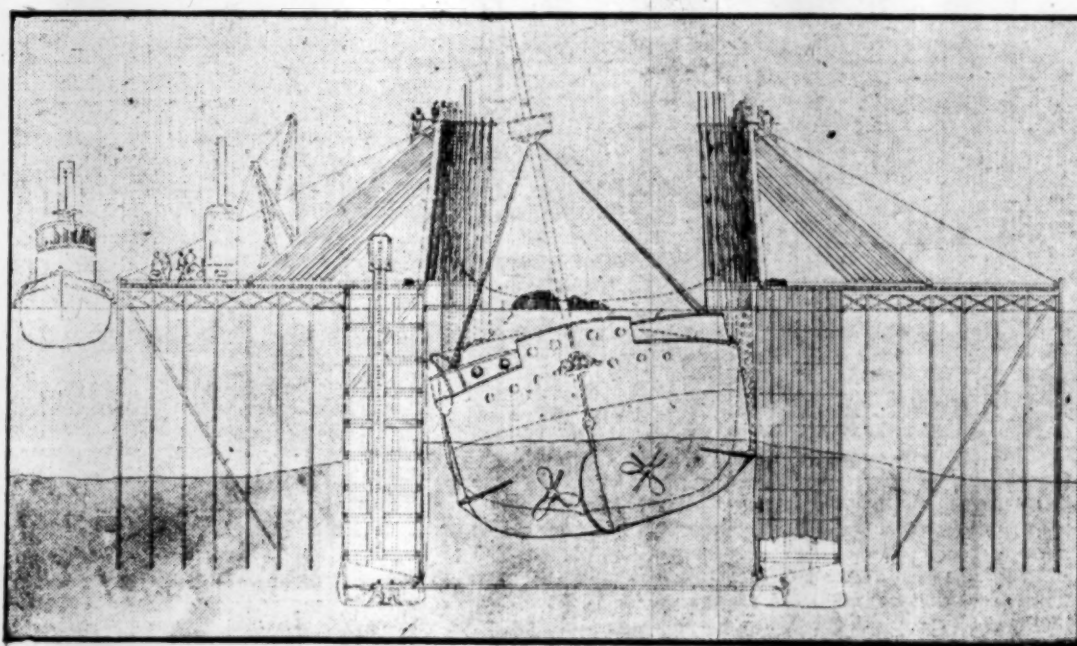

The court will be asked to decide  
whether Mr. Hughes, as governor of New  
York, acted within the law in granting  
a warrant for the surrender, as a fugi-  
tive from justice, of Frank H. Hoffot,  
a Pittsburgh capitalist, to the state of  
Pennsylvania.

Mr. Hoffot, who was indicted on a  
charge of conspiracy to bribe members  
of the Pittsburgh city council to select  
certain banks as depositories of city  
funds, sought to be released from the  
arrest order by Governor Hughes in re-  
sponse to a request from the governor  
of Pennsylvania. The circuit court of  
the United States for the southern dis-  
trict of New York refused to release  
him, and Hoffot appealed to the United  
States supreme court.

Notice has just been filed with the  
court that a motion on behalf of the  
city of Pittsburgh to dismiss the appeal  
will be presented Oct. 10. The brief in  
support of this motion seeks to maintain  
that Governor Hughes was warranted in  
finding, as a fact, that Mr. Hoffot was  
a fugitive from justice.

## Method of Sinking Caissons About Maine

Sectional view of the sunken battleship being righted and raised by means of a  
cradle formed of steel cables.

## NORTHERN SUBURBS FAVORABLE TO IDEA OF GREATER BOSTON

Suburbs north of Boston are reported  
today to be taking an active interest in  
the movement to include them in the  
city proper.

Such movements have existed before  
and most of the opposition to them  
has come from the suburbs themselves.  
This year, however, there seems to be  
much less opposition than in former  
times.

With the announcement of the cen-  
sus figures, and the standing which  
would be given to Boston, were this  
city made to include the immediate  
suburbs, a spirit of pride for the future  
of Boston has gained headway in the  
suburbs, which, if taken cognizance of  
in the very near future, would prob-  
ably result in Boston and the suburbs  
mutually agreeing to become one and  
the same city.

In past years when the movement has  
been started, the suburbs have objected  
chiefly to the form of municipal govern-  
ment which would result. They have  
felt that they would be but a small sec-  
tion of a great city; that they would

(Continued on Page Five, Column Seven.)

## HUNDRED APPLYING DAILY IN UNIVERSITY EXTENSION COURSES

Letters requesting application blanks  
for the university extension courses  
which are to begin Oct. 3 and 4, under  
the auspices of eight of the principal  
colleges about Boston, are now coming  
in at the rate of 100 a day.

Interest and enthusiasm are rising  
high regarding the new plan by which  
a person of no previous higher educa-  
tional training may secure the degree  
of associate in arts, practically equiva-  
lent to bachelor of arts.

Since the office opened to give infor-  
mation, last May, 600 letters in all have  
been received, and during the past few  
days they have averaged about 100 a  
day. Of this number, 300 have filed  
their applications for admission in one  
or more of the courses.

The greater number have filed for one  
course, a less number for two, and a few  
for three courses. This latter class, it  
is expected, will be greatly augmented  
when the applications begin to come in  
from those already teachers, who wish to  
increase their educational advantages and  
gain opportunities for higher positions.  
A large number of stenographers and  
(Continued on Page Four, Column One.)

## BOSTON UNIVERSITY OPENS TOMORROW WITH LARGE CLASS

Boston University College of Liberal  
Arts opens tomorrow at 9 o'clock. The  
incoming class promises to be the largest  
on record, since approximately twice  
as many certificates have been received  
as on any previous year and the num-  
ber taking entrance examinations is pro-  
portionately larger than other years.

During the vacation many improve-  
ments were made in the college, particu-  
larly in the laboratories. Dr. Norton  
A. Kent, professor of physics, spent the  
summer in Europe making an inspection  
of the physical laboratories of various  
universities in England and on the con-  
tinent and purchased some apparatus  
for the physical laboratory.

There are only two changes in the  
faculty at the College of Liberal Arts.  
Dr. John Eastman Clark, has been ap-  
pointed to the chair of philosophy held  
by the late Borden Parker Bowne since  
1876. Samuel Waxman, recently pro-  
fessor of Romance languages at Syracuse  
University who has just returned from a  
year's study in France succeeds Lester R.  
Talbot as instructor in French. Mr. Tal-  
bot was awarded a graduate fellowship  
and is spending the year studying in  
Europe.

The only important change in the of-  
ficials of the university is that of Presi-  
dent Huntington has been made acting  
dean of the graduate department.

A new course in "Thirteenth Century  
History and the Results of the Crusades"  
is to be given by Dr. John Eastman Clark  
under the auspices of the Epsilon chapter.

## VETERANS OF THE G. A. R. PASS IN REVIEW AT ATLANTIC CITY

Fifteen Thousand Men Who Fought to Save Union Step  
Proudly Along Before Vice-President Sherman and  
Governor Fort.

ATLANTIC CITY, N. J.—Approx-  
imately 15,000 grizzled members of the  
G. A. R. passed in review here today be-  
fore Vice-President Sherman and Gov-  
ernor Fort. Almost faultless conditions  
and a cool ocean breeze provided an ideal  
day for the veterans to once more step  
to the rhythm of the life and drums.

More than 100,000 persons lined the  
streets to view the parade and not a post  
or a flag failed to receive a warm round  
of applause.

Silas Howell Taylor was marshal and  
Walter E. Edge chief of staff. Com-  
mander-in-Chief Van Sant rode at the  
head of the line until he reached the  
reviewing stand, where he took up a  
position with the other dignitaries.

Leaders of the G. A. R. estimate that  
the attendance at the present encamp-  
ment is off fully 10,000 by reason of the  
action of the railroads in boosting fares.  
The movement is expected to crystallize

tered their choice for nominees for the  
final election in November, the commit-

## LAKE STEAMER CALLING AID.

BUFFALO, N. Y.—A wireless despatch  
from the passenger steamer Western  
States reports that vessel in trouble off  
Long Point, Lake Erie. Assistance has  
been sent from this port. The Western  
States is on her way from Detroit to  
Buffalo.

It is expected that the question of the  
General Lee statue will come up at to-  
morrow's meeting, but the movement for  
a grand reunion of the Blue and Gray  
on Gettysburg battlefield in 1913 has in  
a large measure softened those who were  
formerly most emphatic in their denunciations  
of the Lee statue.

It is generally expected that Roches-  
ter, N. Y., will be designated as the place  
for next year's encampment.

## TALK OF RAISING MARRIAGEABLE AGE OF GIRLS IN INDIA

(Special to The Monitor.)  
 CALCUTTA—The bald announcement of the fact that the questions of raising the marriageable age of girls and of the introduction of widow marriage are claiming a good deal of public attention in Bengal at the present time, is not calculated to make much impression on the mind unaccustomed to things Indian; but when it is recognized that girls are married in India at an age when in England they might be just going to school, and when the disabilities of the Hindu girl, left a widow, perhaps, before she has emerged from mere girlhood, are taken into consideration, the significance of the questions raised will be to some extent appreciated.

The fact is that the particular manifestations referred to are only two out of many manifestations pointing to the breaking down of those disabilities and encroachments on individual freedom which have been brought about by the operation of caste regulations and traditions. Already an organization has been started in Bengal with a view to a propaganda for raising the marriageable age of girls, and it is not unlikely that one for introducing the remarriage of Hindu widows may follow.

The efforts that have been made on behalf of the depressed classes have been referred to in a recent issue of this paper, and there is no doubt that in many directions, in spite of a conservatism as hide-bound, probably, as can be found anywhere, social reform is making steady and continuous progress in native circles.

## CONFER ON LACK OF EMPLOYMENT

PARIS—The international congress on unemployment is being held at the Sorbonne. There are 200 delegates in attendance. Among the American representatives are Henry Walcott Farnham, professor of political economy at Yale; Charles P. Neill, United States commissioner of labor; Prof. Edward Thomas Devine of Columbia; J. B. Andrews of Wisconsin; William Liersch and Helen Sumner.

The program covers the consideration of unemployment statistics, labor exchanges and insurance against unemployment. An attempt by the German delegates to widen the program so as to cover socialistic remedies for unemployment was ruled out.

### TOY AIRSHIP CROSSES ALPS.

MILAN—A toy airship has flown over the Alps. It was liberated by a French boy near Bordeaux and descended in the outskirts of Turin. Its 600-mile journey was accomplished inside of 24 hours.

## BRITISH SPECIAL MISSION IN BERLIN

Announce to German Emperor the accession of King George V.

(Special Correspondence of The Monitor.)  
 BERLIN—After a slight delay in the departure from Vienna, Earl Roberts and the other members of the British special mission appointed to announce the accession of King George V. were received at the railway station by Adjutant-General von Lowenfeld, General von Plessen, commandant of the imperial headquarters, the military governor of Berlin, General von Kessel, and Freiherr von Reischach, grand master of the horse, the staff of the British embassy being also present. The special mission stayed at the Hotel Adlon as the guests of the Emperor.

His majesty, the German Emperor, received Earl Roberts and the other members of the mission, the imperial secretary of state for foreign affairs, Herr von Kiderlen-Waechter; Baron von Knesebeck, the introducer of the diplomatic body, and vice-master of the ceremonies, also being present.

In the evening a banquet was given to the members of the British mission, the guests including also the imperial chancellor, Herr von Bethmann-Hollweg; Count Wolff Metternich, the German ambassador in London; Count de Salis, the British charge d'affaires, the British naval and military attaches and others.

His majesty rose during the course of the banquet, and, turning to Lord Roberts, raised his glass, with the words, "His majesty the King."

## ORDER RAILWAYS TO REDUCE RATES ON OUTBOUND ORE

(Special to The Monitor.)  
 VANCOUVER, B. C.—The railway commission in a recent decision has ordered the White Pass & Yukon railway to reduce its rates on outbound ore to the smelters from \$3.50 to \$1.75 per ton, and to cease its discrimination in securing low ocean rates in favor of certain companies. The British Yukon railway, the British Columbia-Yukon railway, and the Pacific & Arctic Railway & Navigation Company have also been ordered to cease discriminating in favor of certain parties, and must give the same rates and privileges to all shippers alike. These companies must, by Nov. 1, file a tariff showing the reduced rate as required by the commission.

## RUSSIA TO WAIVE ON EXTRADITION

ST. PETERSBURG—The foreign office, following a conference with the minister of justice, has decided to waive the claim of extradition in the case of Andrew Rulow, otherwise known as Julius Wezosal, the music teacher who was arrested in Boston Aug. 13 charged with participation in the theft of government notes which were being carried in a wagon from the imperial sub-treasury at Tiflis to the postoffice.

The Russian consul at Boston is instructed to start proceedings against him in the local courts. The bulk of the 200 notes stolen at the time of the theft in 1907 are said to be in America.

## ITALY OBSERVES ENTRY INTO ROME

ROME—The anniversary of the entry into Rome of King Victor Emmanuel II. was marked by celebrations Tuesday at Porta Pia, made famous in the annals of 1870 for the attack of the Italians, Sept. 20. It was through a breach in the wall that the Italians entered the city. Mayor Nathan, during the course of a speech, criticized the papacy, for which he is now being attacked by the Vatican press.

**MR. MOISSANT FLIES IN ENGLAND.**  
 LONDON—John B. Moissant, the American aviator who recently completed a trip from Paris to London with a passenger, made a flight of 23 minutes at Folkestone Tuesday. His fine airman's prowess aroused the enthusiasm of the spectators.

**ANCIENT CHURCH FOUND.**  
 JERUSALEM—Recent excavations on the Mount of Olives resulted in the discovery of the remains of a Christian church dating from about the year 350. The floor of the nave is still buried. The transepts are entirely exposed.

**HAWAII MILITARY CHANGE.**  
 HONOLULU—Within two or three months Hawaii will be created a separate military department with a brigadier general in command instead of being a part of the department of California.

(Published by permission of the Sport and General Illustrations Company, London.)

THE KAISER ON HORSEBACK.  
 General von Lowenfeld is informing the German ruler of the delay of Lord Roberts, who arrived in Berlin 24 hours late.

It is announced that the Emperor has presented Lord Roberts with a magnificent rococo vase, made at the imperial porcelain factory. A portrait of his majesty is on the front, and a reproduction of the imperial castle in Berlin on the opposite side of the vase.

His majesty rose during the course of the banquet, and, turning to Lord Roberts, raised his glass, with the words, "His majesty the King."

## Mr. Hammerstein's Latest Move Attracts Attention

Claims new opera house will meet long-felt want in world-metropolis.

(Special to The Monitor.)  
 LONDON—The decision of Oscar Hammerstein to build an opera house in London is exciting a good deal of attention in a city where there are already two existing opera houses. Years ago Colonel Mapleson and Mr. Gye fought out the battle of opera, with the result that they proved to their own satisfaction that opera in London did not necessarily mean financial success. Colonel Mapleson's scheme for a national opera house on the Embankment was a complete failure. The white stone walls of it rose to a height of some 20 or 30 feet, within a stone's throw of the houses of Parliament. At that point the building came to an end for want of money. The walls stood there grim and unfinished for the space probably of a decade, then they were handed over to Norman Shaw, R. A., who crowned them, with extraordinary genius, with their present towering stories of red brick like some old French chateau, and today they are known as New Scotland Yard. Those were the days when Colonel Mapleson

rented the old Her Majesty's, the vast opera house pulled down to give place to the Carlton hotel and His Majesty's theater, now occupied by Sir Herbert Tree. Here sang Nilsson, Foll and Trebelli.

Half a mile away from the Haymarket, at Covent Garden in Bow street, Patti and Nicolini sang under the auspices of Mr. Giles. Those were perhaps the halcyon days of opera in London, though nobody will ever agree as to these things. When His Majesty's was pulled down grand opera was confined to Covent Garden, with periodical inroads at Drury Lane under the egis of Sir Augustus Harris. It has never, however, been believed that it was a particularly lucrative undertaking. Today there are already two opera companies in London. Mr. Hammerstein proposes to add a third and he is convinced not only that he can do it, but that he can make a success of it.

The site he has chosen for his new opera house is in Kingsway, the magnificent new thoroughfare from Holborn, which abuts on the Strand at Aldwych. This opera house will seat some 3000 people, and it is to be completed within a year. The performers will apparently be for the most part singers from Mr. Hammerstein's own American company, for most of the great European artists are already engaged by the existing companies. One curious feature of the new theater will be the reservation of a box not only for the King, but for the lord mayor. It shows the great place which the head of the corporation occupies in the perspective of strangers. No one in London ever thought of setting aside a box for the lord mayor, in spite of all the hoary traditions attached to his office.

London, Mr. Hammerstein recently told a representative of the Daily Telegraph, is musically far ahead of any other city in the world. If you doubt that, he said, glance through the English newspapers and see what varied musical fare is demanded and supplied, and how there are concerts, operas, and how there are morning, noon and night.

The news that London is the leading musical city in the world will come, it is to be suspected, not without an element of surprise to most Londoners, and there are some cities on the continent which it is unnecessary to name which will by no means endorse Mr. Hammerstein's compliment. That it is the biggest musical center in the world may be granted, but that, as Mr. Kipling says, "is another story." The reason for this is very simple, and Mr. Hammerstein put his finger on it without trouble. London, he said, is not only the capital of England, it is the capital of the British empire, and it attracts people from all over the world.

The fact that London is becoming the great pleasure city of Europe is, indeed, undeniable. Slowly the world is begin-

ning to discover what numbers of artists know long ago that London is one of the most beautiful cities in the world, as well as one of the most interesting. The consequence is that thousands and thousands of visitors are pouring into the city every summer with the result that the demand is creating a supply, so that London, which a few years ago was to a large extent a purely business city, is being slowly and steadily transformed. Mr. Hammerstein sees this and with his usual daring is determined to take advantage of it. "If I took my friends' advice," he concluded, "I should leave London severely alone. They tell me that I neither know London nor understand English audiences. I reply that music makes the whole world akin. I do not believe I shall be disappointed. Anyway, win or lose, well advised or badly, I am going to make a big, honest, and I believe intelligent effort to meet what I am sure is London's long-felt want." That want, according to Mr. Hammerstein, is a democratic, popular, vitalized opera.

**WORLD'S LARGEST DRYDOCK BEING BUILT IN BELFAST**

(Special to The Monitor.)  
 BELFAST—The new graving dock which is now in course of construction here will, when completed, cover a larger area than any other dry dock in the world. The normal length of this dock is 850 feet, but by removing one of the caissons, an additional length of 36½ feet can be obtained. There is a clear width of 96 feet at the entrance, and the floor level of the dock is 100 feet, the distance between the copings being 128 feet.

Experiments have just been carried out for the purpose of proving that the work is water tight, and the results were entirely satisfactory. The work when completed will have cost the sum of £350,000.

**ALLEGED GERMAN SPY IS REMANDED**

LONDON—Lieutenant Helm, the alleged German spy, was remanded Tuesday on the misdemeanor charge, "unlawfully sketching the fortifications of Portsmouth harbor." The felony charge was not substantiated. Bail was refused. Herr Helm was arraigned in the Farnham police court, Sept. 15, the principal felony being that he had committed a felony in obtaining information concerning the Portsmouth defenses for the purpose of communicating the same to another state.

## VICKERS SONS & MAXIM DISCOVER IMPORTANT ALLOY

(Special to The Monitor.)  
 LONDON—A discovery of no small interest and in all probability of considerable importance has been made by the firm of Messrs. Vickers Sons & Maxim, at their Barrow works. According to H. B. Weeks, the chief chemist at the Barrow works, they consider the alloy, which has been termed duralumin, to be superior to anything of its kind that has been manufactured hitherto. The alloy is reported to be slightly heavier than pure aluminum and as strong as steel; it is further announced that it possesses a great advantage in that it can be rolled, drawn, stamped, extended or forged at suitable temperatures.

In addition to the above qualifications it is said to be less corroded than other high aluminum alloys under all the usual corrosive tests; in fact, it possesses many valuable properties and is only one third the weight of brass. Messrs. Vickers Sons & Maxim have taken out patents throughout the world for the alloy and it is expected that it will be on the market next month. It is understood that the alloy will be manufactured in large quantities at the Birmingham factory of the firm.

## SULTAN'S JEWELS MAY BE SOLD TO PURCHASE SHIPS

(Special to The Monitor.)  
 CONSTANTINOPLE—The authorities have been for some time engaged in making the necessary provision for repairing and modernizing the vessels of the Turkish fleet which had latterly received but scant attention. In the connection with the building up of the Turkish fleet, a committee had been formed with the object of collecting a national subscription and, according to the Tanin, they have forwarded a petition to the government begging them to dispose of the jewels of the ex-Sultan and to devote the proceeds to repairing and renovating the existing vessels and to the purchase of new ships. It is understood that the jewels are worth \$1,750,000.

**COAL LOCKOUT MOVES.**  
 LONDON—The Welsh Coal Owners Association will meet on Sept. 22 to discuss a general lockout of the 200,000 men in the various mines. The 12,000 Cambrian miners who quit work returned to the mines Tuesday to legalize their position. They will hand in notices of their intention to strike on Oct. 1.

**BOMB FACTORY IN PORTUGAL.**  
 LISBON—The police Tuesday discovered a bomb factory and arrested 10 persons. One of these subsequently confessed to the existence of a political plot.

**SPANISH VILLAGES FLOODED.**  
 MADRID—Deluges of rain have done inevitable damage to the vineyards and olive orchards in southern Spain. Eight villages are under water.

## BUDGET SPEECH DELIVERED BY AUSTRALIAN MINISTER

Government Intends to Develop Northern Territory—  
 Penny Postage to Be Established Next May—  
 Prepare Plans for Building Transcontinental Railway.

(Special to The Monitor.)  
 MELBOURNE, Victoria—The commonwealth budget speech has been delivered by Mr. Fisher, the prime minister and treasurer, in Parliament. Referring to the revenue of the commonwealth during the financial year 1909-1910, it was, he said, as follows:

Customs ..... \$11,203,000  
 Post office ..... 3,720,000  
 Miscellaneous ..... 215,000  
 Total ..... \$15,138,000

In addition to this there was an advance from the trust fund for revenue purposes to comply with section 87 of the constitution, amounting to £451,000, with the result that the total revenue was increased to £15,590,000.

Turning to the expenditure of the financial year 1909-10, he announced that it amounted to £7,497,000; the sum of £1,407,000 being included in this figure for old age pensions. The commonwealth revenue for 1910-11, Mr. Fisher estimated as follows:

Customs ..... \$11,203,000  
 Post office ..... 3,720,000  
 Land tax ..... 1,000,000  
 Profit from silver coinage ..... 150,000  
 Miscellaneous ..... 135,000  
 Total ..... \$16,841,000

The expenditure for 1910-11 is estimated as follows:  
 Surplus revenue payable to state, £5,267,000  
 Repayment of the advance from the trust fund ..... 451,000  
 Old age pensions ..... 3,520,000  
 Old age pensions (being at the rate of 3s. 3d. per head of the population) ..... 2,070,000  
 Sugar bounties ..... 573,000  
 Taking census ..... 100,000  
 Defense (12s. 8½d. per head) ..... 1,400,000  
 Posts and telegraphs ..... 3,534,000  
 Public works ..... 2,324,000  
 Miscellaneous ..... 1,020,000  
 Total ..... \$16,838,000

Among other interesting features of Mr. Fisher's speech, was the statement that it was the intention of the government to take over and develop the northern territory, which would involve an expenditure of a very considerable sum of money. Penny postage also, not only throughout Australia, but with countries overseas would be established on May 1 next.

He further announced that plans would be prepared for the West Australian transcontinental railway, a bill for its construction being introduced next session. The referendum, he also stated, would be taken with a view to altering

**CITIZENS ASKED  
TO RAISE MONEY  
FOR GOOD ROADS**

(Special to The Monitor.)  
 VICTORIA, B. C.—A number of prominent citizens are working for the formation of a good roads association, and will endeavor to raise a fund of \$100,000, to carry out the projected improvements, the government having promised financial assistance if the citizens themselves subscribe this amount. It is intended to build about 20 miles of permanent roads, of either asphalt or wood blocks, in the immediate vicinity of the city. This road improvement, it is stated, will attract a larger number of motor tourists, and will also tend to bring country residents into closer touch with the city. It is proposed to provide for the repayment of money advanced by an additional tax on automobiles.

**INDIAN TOWN SEEKS HELP.**  
 LAHORE, India—Three quarters of the town of Dera Gharzi Khan have been inundated by an overflow of the Indus river, according to advices received here. Thousands are homeless. The town has a population of 30,000. The British Governor of the Multan district has appealed to the authorities for aid.

**PLAN AVIATION CIRCUIT.**  
 BOULOGNE-SUR-MER, France—The international conference of French, English and Belgian national aerial leagues has decided to organize a grand aviation circuit in the principal cities of the three countries in August, 1911. Prizes will be awarded amounting to \$80,000 or more.

# Leading Events in Athletic World

## PITTSBURG TAKES A DOUBLE-HEADER FROM THE BOSTONS

Coming Champions Easily Defeat Brooklyn in Two Games, While St. Louis and New York Divide.

## PHILADELPHIA WINS

### NATIONAL LEAGUE STANDING.

	Won.	Lost.	Per cent.
Chicago	91	41	.687
New York	79	56	.585
Pittsburgh	80	57	.584
Philadelphia	70	67	.511
Cincinnati	69	70	.496
St. Louis	54	79	.406
Brooklyn	53	83	.390
Boston	47	90	.343

### Games Tuesday.

Pittsburgh 9, Boston 2.  
Pittsburgh 7, Boston 4.  
St. Louis 5, New York 1.  
New York 3, St. Louis 2.  
Chicago 5, Brooklyn 1.  
Chicago 3, Brooklyn 0.  
Philadelphia 2, Cincinnati 0.

### Games Today.

Cincinnati at Philadelphia.  
Chicago at Brooklyn.

The Pittsburgh Nationals closed their series of 1910 in Boston Tuesday by taking both games of their double-header, the first 9 to 2 and the second 7 to 4. Chicago easily won two games from Brooklyn by scores of 5 to 4 and 3 to 0. St. Louis and New York divided their double-header, the former winning the first 5 to 1 and the latter the second 3 to 2. Philadelphia shut out Cincinnati 2 to 0.

## PITTSBURG EASILY WINS TWICE.

Two victories were recorded to the credit of the Pittsburgh Nationals Tuesday, when they won both games of the double-header from the Boston team on the latter's home grounds. The first contest closed with a score of 9 to 2, and the second 7 to 4. The local team played poor ball, while the visitors seemed extremely anxious to come out victorious, and the score shows that they made 18 hits for a total of 21 bases. The scores:

(First Game.)	
Innings	1 2 3 4 5 6 7 8 9 R.H.E.
Pittsburgh	5 2 0 0 2 0 0 0 0-9 18 0
Boston	0 0 0 1 0 0 0 0 0-2 5 3
Batteries: Adams and Gibson; Curtis, Frock, Tyler and Harden.	
(Second Game.)	
Innings	1 2 3 4 5 6 7 8 9 R.H.E.
Pittsburgh	0 0 0 1 1 0 0 0 0-4 9 3
Boston	0 0 0 0 0 0 0 0 0-0 3 3
Batteries: Leifield, Leever and Simon and Gibson; Matten, Brown and Graham. Umpires: Emslie and Richter.	

## CHICAGO NATIONALS WIN TWICE.

BROOKLYN—Chicago defeated Brooklyn twice here Tuesday by the scores of 5 to 4 and 3 to 0. Knetzer was batted freely in the first, the visitors making seven doubles, of which Schulte got three. Overall tied the season's strike-out record here in the second game, striking out 13. Bell pitched well up to the seventh, when a home run was recorded. The scores:

(First Game.)	
Innings	1 2 3 4 5 6 7 8 9 R.H.E.
Chicago	0 0 0 1 1 0 0 0 0-5 10 0
Brooklyn	0 0 0 0 2 0 0 0 0-4 8 4
Batteries: Brown and Kling; Knetzer and Miller.	
(Second Game.)	
Innings	1 2 3 4 5 6 7 8 9 R.H.E.
Chicago	0 0 0 0 0 0 1 1 1-3 6 0
Brooklyn	0 0 0 0 0 0 0 0 0-0 3 3
Batteries: Overall and Needham; Bell, Dessau, Bergen and Miller. Umpires: Johnson and Eason.	

## ST LOUIS AND NEW YORK DIVIDE.

NEW YORK—St. Louis won the first game from New York, 5 to 1, through the clever pitching of Steele and timely hitting by Ellis here Tuesday. The local team won the second, 3 to 2, although outbatted by the visitors. Zmich pitched poor ball and two of the men he passed scored. The home team stole 10 bases in the second contest. The scores:

(First Game.)	
Innings	1 2 3 4 5 6 7 8 9 R.H.E.
St. Louis	0 0 0 0 3 1 0 0 0-5 11 1
New York	0 0 0 0 0 0 0 0 0-2 10 2
Batteries: Steele and Phelps; Crandall and Myers.	
(Second Game.)	
Innings	1 2 3 4 5 6 7 8 9 R.H.E.
New York	1 0 2 0 0 0 0 0 0-3 8 0
St. Louis	0 0 0 1 1 0 0 0 0-2 10 2
Batteries: Mathewson, Myers and Schell; Zmich and Bliss. Umpires: Klem and Kane.	

## PHILADELPHIA WINS AT HOME.

PHILADELPHIA—Philadelphia defeated Cincinnati, 2 to 0, in a pitching contest here Tuesday. The home team won the game in the sixth inning on Dooin's two-base hit, Moore's out, four balls to Titus, an error by Downey and Bates' single. Only 28 batters faced Moore, who did not give a base on balls. The score:

Innings	1 2 3 4 5 6 7 8 9 R.H.E.
Philadelphia	0 0 0 0 0 2 0 0 0-2 3 1
Cincinnati	0 0 0 0 0 0 0 0 0-0 3 2
Batteries: Moore and Dooin; Suggs and McLean. Umpires: Brennan and O'Day.	

## JEWELL WINS HIS CASE.

CINCINNATI, O.—The national commission has directed the Wheeling Central League to pay at once \$750 to the St. Louis Nationals for playing Jewell. St. Louis drafted Jewell from Wheeling in 1909, but returned the player to Wheeling last spring, with the understanding that it should be reimbursed the draft price of \$750. Wheeling failed to pay the money and St. Louis appealed to the commission.

## POTTER SCORES ON YALE VARSITY

Second Team Halfback Surprises Varsity Men by Easily Carrying Ball Over Line—The Lineup.

LAKEVILLE, Conn. — The second scrimmage of the season of the first and second Yale football eleven showed that play under the new rules will be more open and will afford greater opportunity for scoring. The first scoring of the season was done by Potter of the second eleven, to the surprise of the members of the first team.

Potter has been playing halfback on the second team, but is fast and very active. The varsity eleven had been driven back to the 20-yard line, but held the ball there. Instead of driving it out by line plunges, Quarterback Howe decided to try the forward pass and snapped the ball to Brooks at end.

It was a long, accurately aimed pass, but Potter blocked it and started down toward the goal posts, followed by the varsity men. He kept his lead, however, and placed the ball squarely between the posts. No attempt was made to kick the goal.

The scrimmage lasted only 10 minutes and took place in the morning. In the afternoon there was a long practice, but there was no formation. There was punting, falling on the ball and passing. The backs were given an hour of catching punts and the linemen some coaching as to line bucking and tackling.

Assistant Coach Hoyt, George Adie and Vanderpool paid particular attention to coaching the backs, while Head Coach Coy, who at times has played in the line himself, took charge of the linemen. The lineup was: Brooks l.e., Tomlinson l.t., Parker l.g., Morris c., Childs r.g., Skully r.t., Philbin r.e., Howe q.b., Daly r.h.b., Francis l.h.b., Field f.b.

## PRINCETON TRIES FORWARD PASS

PRINCETON, N. J.—The most striking feature of the football practice at Princeton Tuesday was a long drill in the execution of the forward pass. After the usual practice in starting quickly and falling on the ball, the nearest approach to a scrimmage that has yet been held was ordered.

The ball was given to the first team with orders to try nothing but forward passes, while the second eleven tried to break up the plays. Although the men have been at work only a few days, Roper has worked out an array of formations from which the forward pass is used that is surprisingly large. The passing of Pendleton and Ballou was accurate, and the speed with which Captain Hart got down the field to receive the passes was surprising, even to those who have seen him play when at his best.

Roper is evidently expecting to depend a lot upon speed this year, and he constantly urged the men to get the plays off faster. Fitzpatrick is of great assistance in this department, and already his work is noticeable. The men are on the jump all the time, and the first thing that impresses one is their speed. In Bard, Sparks, Pendleton, Ballou, Hart, Sayer and Woodie the coaches have some splendid material for the backfield positions. There is not a slow man in the number.

T. N. Pfeiffer, '09, who coached Washington and Jefferson last year, was on hand and seemed greatly pleased with the material, and especially at the speed of the candidates.

## TWO MORE AUTOS ENTER CUP RACE

NEW YORK—More and more entries keep coming in for the Vanderbilt cup race as the date of the big event draws near and from present indications the prediction that the number of starters this year will be double that of any previous contest for the classic trophy, will be fulfilled.

It is now announced at the offices of Motor Cars Holding Company, in New York, that formal entry of two Corbin cars has been made for the Vanderbilt race by the The Corbin Motor Vehicle Corporation. One of these cars will be driven by Matson, a racing pilot of national reputation, who won the Massachusetts sweepstakes in last year's Vanderbilt cup event. Matson won the Crown Point trophy in the western stock chassis light car race in Indiana in June, 1909, a lively contest in which were entered many of the best drivers of the racing world. He also won many track races last year all over the country and made several records on the Atlanta motor-drome. The other car, which will be driven by Alvin Maisonneville, is entered in the Wheatley Hills sweepstakes. Like the Massachusetts sweepstakes, this event will be run in conjunction with the big race, starting about an hour after the heavy cars are sent on their way. Both Corbins have a bore of 4 1/2 inches and a 4 1/2 inch stroke.

After receiving their practise numbers at headquarters Matson and Maisonneville left for the Corbin camp at Hicksville and expect to have their cars tuned up for practise and on the course this morning.

## STALLINGS LEAVES N. Y. TEAM.

CHICAGO — Trouble, which has been growing between Manager Stallings of the New York Americans and his first baseman, Hal Chase, culminated today when Stallings left for New York to consult with Frank Farrell, Farrell must either release, suspend or fine Chase or accept the resignation of Stallings.

## Young New Hampshire Golfer Who Defeated the College Champion

F. A. MARTIN.  
Dartmouth College golf team.

## RATIONAL GOLF BY JASON ROGERS

One of the very difficult points for the beginner to understand in the golfing stroke is the proper use of the hands and wrists. Speaking from personal experience, I know that a very slight modification in the grip and use of the wrists has added from 30 to 50 yards on my long game.

If inclined to experiment and desirous of making a comparatively short game a long one, try this:

Take the first finger of the left hand off the shaft in the grip. Drop the right little finger close up to the second finger of the left hand, and drop the left forefinger in the opening between the knuckles of the right third and little finger.

This produces a sort of interlocking grip that I have found more effective than the famous Vardon grip, and possesses all the advantages advocated by Jerome D. Travers and other experts, of getting the maximum of flexibility in the grip by removing the binding effect of gripping tightly with the left forefinger.

The left thumb can be placed around the shaft or straight down according to convenience of the player. In my own grip I pursue a medium course, putting it partly around and partly down, so that the fleshy part of the right hand presses heavily against it, and thus get a second overlap.

Accepting the theory of Mr. Travers, I have found that it is well to loosen up the right forefinger and get the shaft well up to the second joint, and in the "V" caused by bringing the finger tip around the shaft.

With this grip, if the player will remember that the left wrist should not be bent in the stroke, but merely turn over in the back and forward swing, he will find that it is much easier to hit accurately and command the flight of the ball.

The right wrist bends back as the club is taken up after it has been drawn back along the ground. The flatter the stroke going back the flatter it should be coming to the ball, and the longer the club head will be directly along the line of intended flight.

In the swing to the ball the manner in which the right wrist is returned to the normal position in the address I think plays a more important part in the stroke than is generally understood.

If the right wrist can be snapped straight in conjunction with the turn of the left, just before impact, much added force is imparted to the ball, and that delightful "nip" of the professional produced.

A very moderate stroke delivered as I have indicated will give the ball more underspin and gain greater distance than if hit nearly twice as hard by a direct baseball-like blow.

It is by the use of the principles here laid down that I am usually able to gain about as much distance from the tee with a short three-quarter stroke as many of the experts I play against with their full strokes, and much harder hitting.

## SAMUEL H. COOK RESIGNS PLACE

SYRACUSE, N. Y.—Samuel H. Cook '02 has resigned his position of graduate manager of athletics at Syracuse University to accept a place with a prominent business firm. His position has been taken temporarily by M. S. Stedman '10, who is now in charge of the offices of the graduate manager. Mr. Cook held the place five years, and in that time has extensively widened the athletic interests at Syracuse. Athletic relations have been brought by him between Syracuse and Michigan, Illinois, St. Louis Universities and the Carlisle Indians.

## YALE GOLFERS HAVE COMMANDING LEAD ON PRINCETON MEN

(Continued from Page One.)

pionship of that division, and as was expected, the Yale men showed marked superiority over their New Jersey rivals and secured 5 points to 1. This gives the New Haven men such a decisive lead that if Princeton wins all the four matches this afternoon, Yale will still win the title.

Conditions for fast play were ideal when the teams teed off about 10 o'clock and they continued so throughout the morning round. The Yale men entered the play confident of winning, and they showed that their confidence was not misplaced as the Princeton captain, D. W. Huston, was the only New Jersey player able to win his match.

He defeated Robert Hunter of Yale 1 up (19 holes) in the most exciting match of the morning. Although Hunter had the best medal card at the end of the 18 holes, he was even with Huston, and as the Princeton leader made the extra hole in 5 to 6, he saved his team a shutout. Their cards:

Huston	5	4	4	5	5	3	41
Hunter	5	4	4	4	5	3	40
Huston	4	4	5	4	3	5	38
Hunter	4	3	6	4	4	4	34
Huston	5	4	4	4	4	4	34
Hunter	5	4	4	4	4	4	34

The match between R. A. Gardner of Yale, national champion in 1909 and A. Seckel, intercollegiate champion, attracted the most attention. It was won by the Yale man 2 up on account of his better putting. The summary:

SINGLES.	
YALE.	PRINCETON.
R. A. Gardner (2-1)	A. Seckel (1 up)
H. G. Legg (4-3)	D. W. Huston (1 up)
H. G. Legg (4-3)	A. G. Kay (3-0)
P. Merriman (4-2)	D. W. Huston (3-0)
K. E. Mosser (2-1)	C. T. Eddy (3-0)
G. C. Stanley (4-3)	L. D. Blair (1 up)
Totals	5 Total

The semi-final round Tuesday found Yale playing Harvard and Princeton meeting Dartmouth. The Yale-Harvard match was very easy for the blue, as it won all but one of the individual matches and two out of the three four-om contests, giving them a total score of 7 to 2 for the crimon.

S. W. Sargent was the only Harvard player able to make a showing against Yale, and his victory over H. G. Legg after 19 holes of fast playing was some consolation to the Cambridge boys. Sargent played sterling golf and seems to be in line for the individual title which will be played for beginning tomorrow.

In the foursome F. T. Clark and F. C. Davidson won the only victory for the crimon, defeating H. G. Legg and G. C. Stanley 2 up. This result was somewhat of a surprise to both sides.

The Princeton-Dartmouth match furnished the most excitement as they finished the morning play all even. The two teams were very evenly matched, and the players showed consistent form throughout. Martin's defeat of Albert Seckel in the morning was unlooked for, as Seckel is the present college champion. The New Hampshire man, however, played much the better golf and won 3 up. The summary:

SINGLES.	
YALE.	HARVARD.
R. A. Gardner (4-2)	M. C. Hollins (1 up)
H. G. Legg (3-2)	F. C. Davidson (1 up)
H. G. Legg (3-2)	H. C. Clark (1 up)
K. E. Mosser (2-1)	A. L. Lyman (1 up)

## SIXTY IN SQUAD AT DARTMOUTH

HANOVER, N. H.—Coach Randall of Dartmouth and his staff put in a strenuous day Tuesday with preliminary football practice, followed by a division into teams and signal drills. The squad now numbers 60 men, including nine wearers of the coveted "D." Johnson, another "D" man, is expected soon. The first scrimmage will come Saturday.

A drill on starts, in which Coach Randall called Harry Hillman, the track coach, to his assistance, began the practice. The starting of the bats, as well as the linemen, for the past few days has been slow. With Hillman taking this trouble in hand, it is hoped that some speed will be developed. The linemen were taken from the medicine ball to the bucking machine, while the backs took turns at punts, with the ends and quarterbacks running back the ball. Sherwin and Ingersoll did the punting.

The first team lineup was then drawn as follows: Needham center, Farnum and Whitmore guards, Sherwin and Halstead tackles, Ahlswede and Lewis ends, Ingersoll quarter, Ryan right half, Morcy fullback, and Hoban fullback.

## MORE CANDIDATES OUT AT HARVARD

Squad Is Put Through Two Hard Practise Sessions Under the Eyes of Eight Coaches.

The Harvard varsity football candidates held their second morning practice on Soldiers field this morning, and Coach Haughton and Captain Withington kept the men on the jump all the time, despite the fact that another hard session was to take place in the afternoon. More candidates are reporting at every session, and with the acquisition of the men who made the trip to Maine, tomorrow, practically all of the leading candidates for this year's eleven will be out.

Two hard sessions were held Monday and they helped materially in rounding out the squad into playing form. Several new candidates put in an appearance both in the morning and afternoon. There were no scrimmages on the field, these being delayed by the coaches until the men are more seasoned.

There were no less than eight coaches on the field during the day, and still more are expected in line to aid Haughton during the next few days. In the morning practice the work was under the charge of former Captain Burr and Trainer Donovan. Greene, the '01 center, was also on the field and will coach the center linemen. Haughton, Perley, Blagden, Leary, Cutting and Sprague were all out in football clothes in the afternoon and presented a formidable array of coaching material.

The morning work was confined to light practice, the men passing and falling on the ball, between intervals of tackling the dummy and catching punts. The linemen again tried their process of "crawling" up and down the field under the charge of Captain Withington. The crimon captain also tried his hand at drop kicking, getting off some nice ones from varying distances. He also practised punting and showed his ability in this department by getting off some spirals of around 50 yards.

Among the new candidates are Graustein, Gardner and Bouve, all on last year's freshman team, and Wigglesworth, a varsity quarterback. Gardner and Wigglesworth will probably have to fight it out for the position of quarterback, as O'Flaherty has taken on much weight and will be better available for an end position.

In the afternoon there were 36 men on the squad, the new men being R. M. Allen, M. Corcoran, S. A. Frieder, T. A. Jencker, O'Flaherty, R. T. Paessler and D. A. Earle. McKay was on the field in citizen's clothing, during the afternoon watching the practice. He is expected out soon.

## ANOTHER RACE FOR MOTOR CUP

NEW YORK—Next season there will be another race for the British international trophy for motor boats. After the last race, when the Dixie II. won through the accident to the Pioneer, owned by the duke of Westminster, the international committee met and agreed on some changes in the deed of gift. One of these is that the match shall be two out of three races instead of just one. Other changes were suggested, and it was also thought that the deed of gift and all the conditions might be rewritten and expressed more clearly.

These suggestions will be made to Lord Northcliffe, the donor of the cup, and he will doubtless agree to the changes suggested. Another race is desired by the British motor boat men, but if they had challenged while here the challenge would have been made under the old conditions, which both sides want changed. The Motor Boat Club was notified that as soon as the necessary changes were made a challenge would be sent for another race. It is understood that the duke of Westminster will be the challenger again through one of the British clubs, and he will probably rely on the Pioneer to win. Other boats, however, will be built to represent the challengers.

## PICK GOLF TEAM TO PLAY R. I. MEN

The Massachusetts Golf Association executive committee has announced the make-up of the state team to play with Rhode Island in the interstate matches at the Country Club next Saturday and for the Lesley cup at Myopia between the Metropolitan, Massachusetts and Philadelphia teams a week later, as follows: John G. Anderson, Rodney W. Brown, T. M. Claflin, T. R. Fuller, Percival Gilbert, A. C. Lockwood, Heinrich Schmidt, T. G. Stevenson, Henry W. Stucklen, W. R. Tuckerman, P. W. Whittemore and H. H. Wilder.

Brown and Tuckerman are new players for a Bay state team. They both won distinction in the national amateur championship, Tuckerman having been a semi-finalist and Brown having played exceptionally good golf.

## DETROIT CAPTURES TWO GAMES FROM THE WASHINGTONS

Philadelphia Wins a Hard-Hitting Contest From the Cleveland, While Boston Defeats St. Louis.

## CHICAGO WINS AGAIN

	Won.	Lost.	Per cent.
Philadelphia	95	42	.693
Detroit	80	60	.571
New York	78	59	.569
Boston	77	69	.525
Cleveland	63	75	.457
Washington	59	80	.424
Chicago	57	80	.416
St. Louis	43	96	.309

### Games Tuesday.

Boston 9, St. Louis 5.  
Detroit 4, Washington 3.  
Detroit 6, Washington 1 (7 innings, dark-ness).  
Philadelphia 6, Cleveland 3.  
Chicago 3, New York 0.

### Games Today.

Boston at St. Louis.  
Philadelphia at Cleveland.  
New York at Chicago.

Detroit captured two games from Washington in the American League Tuesday, thereby going past New York into second place. The first game was won 4 to 3 and the second 6 to 1. Philadelphia defeated Cleveland in a hard-hitting game 6 to 3, while Boston won from St. Louis 9 to 5 and Chicago shut out New York 3 to 0.

## TWO VICTORIES FOR DETROIT.

DETROIT—Detroit twice defeated Washington Tuesday, 4 to 3 and 6 to 1. The home team got but three hits, two of them bunts, in the first game. Cobb got back into the game after an absence of two weeks. The scores:

(First Game.)	
Innings	1 2 3 4 5 6 7 8 9 R.H.E.
Detroit	0 0 0 0 1 3 0 0 0-4 3 3
Washington	1 0 0 0 0 2 0 0 0-3 9 2
Batteries: Donovan and Schmidt; Moyer and Almsmith.	
(Second Game.)	
Innings	1 2 3 4 5 6 7 8 9 R.H.E.
Detroit	0 0 0 0 4 2 0 0 0-11 4
Washington	0 1 0 0 0 0 0 0 0-1 5 4
Batteries: Mullin and Stange; Otey and Henry. Umpires: Evans and Colloffower.	

PHILADELPHIA EASILY WINS.  
CLEVELAND—Philadelphia easily defeated Cleveland 6 to 3, forcing Harkness from the box in the sixth inning. Demott pitched good ball; Cleveland's errors proved costly. The score:

(First Game.)	
Innings	1 2 3 4 5 6 7 8 9 R.H.E.
Philadelphia	1 0 1 0 1 3 0 0 0-6 14 3
Cleveland	0 0 0 1 1 0 1 0 0-3 12 3
Batteries: Plank and Livingston; Harkness, Demott and Land. Umpires: Dineen and Pettie.	

## BOSTON AMERICANS WIN.

ST. LOUIS—Boston won from St. Louis in the second game of the series Tuesday 9 to 5. The contest was full of misplays. Ray opened for the local team, but Lake replaced him after four innings. The score:

(First Game.)	
Innings	1 2 3 4 5 6 7 8 9 R.H.E.
Boston	

## HUNDRED APPLYING DAILY IN UNIVERSITY EXTENSION COURSES

(Continued from Page One.)

secretaries have filed application, as well as men interested in the economic and mechanical courses.

The applicants come from every class. Whether the majority of them intend to work for the degree of A. A. or seek simply a general education is yet to be learned. As it is necessary to attain 17 points, or one point for each course, it will be seen that a number of years in many cases will be needed to secure the degree.

The commission in charge estimates that the average extension student, without any college training, in seeking a degree will occupy about seven years. Those who have already passed any such college courses as are demanded will be credited with them toward the degree. Many of those who have applied, however, have had only a grammar school education.

The most popular course of all those presented by the prospectus of the commission is that in English literature and composition, under Charles T. Copeland, who has won a remarkable popularity among the students at Harvard and residents of Cambridge who have attended his open readings.

The office of the commission at 19 University hall, Harvard University, is in charge of Miss G. F. Prouty, secretary. Miss Prouty is enthusiastic over the success of the university extension plan, and is preparing statistics in regard to the courses, applicants and early results of the system that should prove of great value.

Prof. James Hardy Ropes, dean of the extension department, believes that many young people of talent, zealous for improvement, who are already earning their living, may, it is hoped, be stimulated to begin studies which will lead them to a development of latent power sufficient to open wholly new careers of far greater dignity and usefulness than they could otherwise attain.

The institutions comprising the university extension commission are as follows:

Harvard University.  
Tufts College.  
Massachusetts Institute of Technology.  
Boston College.  
Boston University.  
Museum of Fine Arts.  
Wellesley College.  
Simmons College.

The courses will be given at Boston University, the Institute of Technology, the Museum of Fine Arts, the Boston Society of Natural History and the Parker Memorial Institute. The courses offered are as follows:

### DIVISION I.

Evening Courses at 8 p. m.

1. English literature and composition—C. T. Copeland, Prof. Chester N. Greenough, F. W. C. Hersey, Harvard University. Tuesday, Thursday.

2. Experimental electricity—Prof. Louis Derr, Institute of Technology, Tuesday, Thursday. (First half year.)  
2b. Applied electricity—Prof. Harrison W. Smith and W. E. Wickenden, Institute of Technology. Tuesday, Thursday. (Second half year.)

3. Principles of economics—Prof. Henry C. Metcalf, Tufts College. Monday, Wednesday.

4. Psychology—Prof. R. M. Yerkes, Harvard University. Monday, Wednesday.

### DIVISION II.

Afternoon and Saturday Courses.  
A—Languages and Literature.

1. English composition (advanced course)—Prof. Dallas Lore Sharp, Boston University. Tuesday, Thursday, 3:30.

2. History of English literature—Prof. E. Charlton Black, Boston University. Monday, Wednesday, 4:30.

3. German, German life (in German)—Prof. Marshall L. Perrin, Boston University. Monday, Wednesday, 4:30.

4. French (elementary course)—Prof. James Geddes, Jr., Boston University. Monday, Wednesday, 4:20.

5. French literature as influenced by French life and manners. Prof. Therese Colin, Wellesley College. Tuesday, Thursday, 3:30.

### B—Natural Sciences.

1. Physics, the Ionic theory—Prof. Norton A. Kent, Boston University. Monday, Wednesday, 3:30.

2. Physiology—Prof. Arthur W. Weyss, Boston University. Tuesday, Thursday, 4:20. (First half year.)

Note—Courses 3, 4, 5 and 6 are courses in the Lowell teachers' school of science. They will begin Nov. 12, 1910.

3. Mineralogy—Prof. George H. Barton, Boston Society of Natural History. Saturday, 9-11 a. m.

4. Dynamical and structural geology—Professor Barton. Saturday, 2-4.

5. Physiological botany—Prof. W. J. V. Osterhout, Harvard University. Saturday, 2-5.

### C—History.

1. English history from 1485 to the present—Prof. Frederick A. Ogg, Simmons College. Monday, Wednesday, 4.

2. Ancient art and civilization—Arthur Fairbanks, Museum of Fine Arts. Monday, Wednesday, 4:15, and a third hour. (First half year.)

3. The civilization and art of the Roman. Byzantine, Gothic and Renaissance ages—Prof. John O. Summer, Institute of Technology. (Second half year.)

For these courses a tuition fee will be charged, varying from \$5 to \$20 a course.

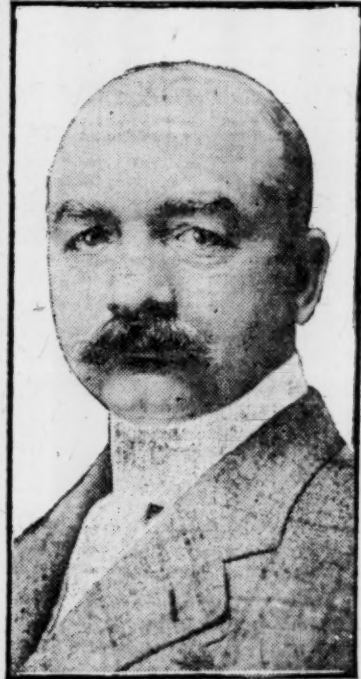

Young men and women who want a college education with the benefit of the professors of the big colleges mentioned, and who can afford to spend some time

## ENGINEER O'ROURKE ESTIMATES RAISING MAINE AT \$600,000

(Continued from Page One.)

the spring of 1898 has lain in the mud of Havana harbor.

A board of United States army engineers, at the head of which is Col. William M. Black, U. S. A., the engineer

JOHN F. O'ROURKE.  
Engineer who hopes to begin operation of raising the Maine early in October.

trict, is now at work figuring out a plan to raise the wreck, and Col. Black, who returned from Cuba last week, in an interview a few days ago, stated that there was no doubt that the wreck could be raised. Mr. O'Rourke hopes to get the job.

"I spent all my time in Cuba," said Mr. O'Rourke, "examining the wreck of the Maine and getting acquainted with the Cuban people. Every Cuban of influence, from President Gomez down, favors raising the battleship, and they are so appreciative of what the United States has done for them that they stand ready to render every assistance. Besides, the wreck occupied one of the best anchorages in Havana harbor."

Just before he left Havana Mr. O'Rourke said that President Gomez said to him, "When you see President Taft convey to him our most cordial and friendly sentiments, and tell him we wish he would hurry."

Mr. O'Rourke estimates that it will require from four to six months to raise the Maine. He estimated the total cost at about \$600,000, which is twice the sum appropriated by Congress for the purpose.

By his scheme, with the use of pneumatic caissons and steel cables, the Maine, Mr. O'Rourke says will be preserved intact. The scheme involves the construction of pile wharves on each side of the Maine about 20 feet distant from it, and the sinking of six pairs of great pneumatic caissons between the wharves and the ship to a depth of 10 feet below the bottom of the Maine, these caissons having cables on them every four feet; the cables opposite each other being of different sizes, in one case a plough steel cable of about 200 tons capacity, and the other a small hauling capacity about three quarters of an inch in diameter.

A platform will then be constructed above water, under the ship. Thus the ship will be cradled within a dry dock of ample strength and extent to afford every facility for examination and repairs. One feature of superiority of this dry dock will be that wherever a supporting cable may be in the way it can be slackened off and moved to some other point where it will perform its part in supporting the hull just as well as it did in its original position. The precaution is taken of having twice the cable strength that is actually necessary to support the vessel.

Mr. O'Rourke is authority for the assertion that it will be possible to repair completely the hull of the Maine when it is once lifted clear of the water. What is more to the point, however, it will permit an exhaustive examination to be made to determine once for all whether the explosion which sank the battleship in Havana harbor the night of Feb. 15, 1898, occurred within the ship or underneath.

### OYSTER TONGERS IN REBELLION.

NORFOLK, Va.—The entire fourth regiment of infantry, Virginia national guard, is being held in reserve to quell rioting along the James river. The oyster tongers there, numbering more than a thousand, threaten the state guards and the oyster planters who have refused to permit the tongers to rob their reservations.

In the evening or in the late afternoon or on Saturday, have here a remarkable chance.

The Boston school board has taken cognizance of the importance of the university extension movement and has decided that elementary school teachers who complete this course and receive the in charge of the first New York degree of associate in arts are qualified for positions as teachers in the high schools.

The courses have been planned to be exactly like college courses in every respect and to give the best instruction to be found.

## News in Brief Gathered Today from Towns and Cities in Massachusetts

### WINTHROP

The Cottage Park Yacht Club will hold a masquerade party Oct. 1.

Pauline street is now the widest street here. On the north side for a distance of over 2000 feet a sidewalk of manufactured stone has been laid. Three and one half feet of space from the edge of this walk will be grassed over and on the edge there will be a seven inch edge-stone.

The selectmen will place three incandescent lamps on the path across the playground between Shirley and Buchanan streets.

At the town meeting Sept. 28 the voters will be asked to appropriate \$500 for paving gutters on the side of the hills and to make further provision for caring for this work each year. They will also be asked again to vote to purchase the land owned by Jeremiah Green at the entrance to the town from East Boston and make it a park. This latter petition was signed by Henry B. Fiske, president of the Pleasant Park Yacht Club, and by many residents.

### EVERETT

At the second day of registration at city hall 111 new names were added to the voting list. This is the largest number added at a single registration night since the city began. Following closely upon the Democratic rally, it is believed that a large proportion registered will vote the Democratic ticket. A year ago the city, which had always been strongly Republican, very nearly gave the Democratic candidate for Governor a plurality.

Former Mayor Thomas J. Boynton addressed the first meeting of the Wesley Brotherhood of the Glendale Methodist church Tuesday evening. The Glendale church will hold a reception to members Thursday evening.

At the opening meeting of the Pine Tree State Club Tuesday evening, 11 new members were admitted. An entertainment committee of John Sawyer, Eugene T. Ford and James E. Lewis was appointed.

### LEXINGTON

The women's handicap tennis tournament is now on at the Old Belfry Club. So far Mrs. Stone is the only player who has qualified for the semi-finals.

The sophomore class of the high school has elected: President, Malcolm Reed; vice-president, Warren Brown; treasurer, William Sammon; secretary, Miss Rosamond Reed.

Misses Margaret Buck and Eleanor Sammon and Leon Sturtevant will enter Tufts College this fall.

A number of new books and supplies have been ordered for the schools of this town.

Bert Carson will occupy the new house on Forest street as soon as it is completed.

### REVERE

Hugh M. McKay, a former chairman of the board of selectmen, has no opposition, it is understood, as candidate for representative.

There will be a social gathering at the Congregational church this evening.

Fred C. Miskelley, sealer, expects that the new town scales will be ready in one or two days.

The annual sale of work by the Women's Auxiliary of the St. Anne Episcopal mission will be held Nov. 1, 2 and 3.

The Massachusetts highway commission will give a hearing this afternoon on the widening of the state road from the Boston line to Elliott circle, also on the location of a new highway between Revere street and the Lynn bridge.

### WALTHAM

The Suburban Railway Club will meet at Norumbega park this evening.

The total registration in the schools is 3253, 56 more than last year at the opening.

The following members of the present board of aldermen will seek reelection: Messrs. Paine, Burke, Gibbs, Elkwall, Bowker, Trainor, Bates, Robertie, Hudson, Richards, Willis, Dowd and McLoon.

The fruit dealers of the city have sent a petition to the board of health asking the annulment or the modification of the recent rule of the board that all fruit exposed for sale shall be placed under glass. A hearing on the petition will be given this evening.

### WAKEFIELD

The Baraca High School Boys Club of the Y. M. C. A. has elected: President, Dana F. Eaton; vice-president, Hardie Russell; secretary, Ernest Lawrence; treasurer, Ray H. Cann; membership committee, Hardie Russell; athletic committee, Daniel O. Ferris; music committee, William Ward; Christian work, Russell Perkins; educational committee, Edward Hazen Walton, 2d.

The Redmen lodges of Lynn will hold an outing and field day with a ball game and athletic sports at Quannapowitt grove Saturday.

Fifteen new names have been added to the membership roll of the Y. M. C. A.

### MELROSE

The Woman's Missionary Society of the First Baptist church will meet tonight, when it will act as host to the several ladies' societies of the church at supper.

Melrose lodge of Odd Fellows will work the third degree on candidates at a joint meeting of the Odd Fellows lodges of Melrose, Malden and Reading at the local rooms Thursday evening.

Members of the Ward Five Association who prepared and had circulated the petitions for direct nominations for senators will put another in circulation next fall. This year the petitions did not carry sufficient signatures.

### QUINCY

The Athletic Association of the Woodward Institute for Girls has elected: President, Caroline Sprague '11; vice-presidents, Margaret Goodspeed '13, Mary Beal '12; secretary, Helen Mitchell '11; treasurer, Isidora Beal '11; manager, Edith Mullen '11; captain, Edith Dasha '12.

Colonel Wakefield of England, chief of staff to Gen. Baden Powell, founder of the boy scouts, will deliver an address on the movement in America at the Y. M. C. A. this evening.

The Intermediate Christian Endeavor Society of the Bethany Congregational church has elected: President, Esther Bickford; vice-president, Rupert McFarlane; secretary, Frederick Ward; treasurer, Laura Jones.

The Rev. E. C. Butler of the First Unitarian church is expected home this week.

### MALDEN

The police and fire departments will play the annual baseball game on Ferryway green today.

Representative Thomas P. Riley, who is being mentioned as candidate for Lieutenant-Governor, says that Malden will undoubtedly instruct its delegates to vote for Mr. Foss at the state convention as the Democratic candidate for Governor.

A new hydrant is being installed at Main and Irving streets.

Alderman Joseph T. Carr, candidate for the Republican nomination for representative, will speak upon campaign issues at the Belmont Hill ward room tonight.

### MEDFORD

Members of the signal corps of the boys' brigade have been out practising during the past week and have communicated over a distance of three miles.

In the principal Republican conventions this year Medford will have 14 delegates. The total number of delegates in the various conventions will be: state 1578, Middlesex county 355, sixth councillor 233, eighth congressional 118, sixth Middlesex senatorial 47, to each of which Medford will send 14 delegates.

The trustees of the public library have voted to install six works on bungalows owing to the increasing demand among the residents for books on the subject.

### CHELSEA

It is understood that Louis R. Kieran is now the only Democratic candidate for nomination for representative from the fifth district.

Mr. Baker, the new physical director of the Y. M. C. A., will meet those who wish to form bowling teams at the rooms of the association this evening.

Judge Albert D. Bosson of the local court is expected to return Sept. 27. Associate Justices Samuel R. Cutler of Revere and George M. Stearns of Cambridge have served during his absence.

Nathan S. Freeman of Vindland, N. J., formerly of Chelsea, has purchased for occupancy from Blanche C. Pruden the estate 104 Clark avenue.

### BEVERLY

The M. N. O. P. Q. and R. committee of Friendship Rehearsal lodge will meet with Mrs. Ernest O. Oberg of 8 Knowlton street, Thursday evening.

New brick walks are being laid to side entrances at city hall.

D. D. G. M. Arthur W. Beckford of Danvers with Lester F. Couch of Danvers as grand marshal paid an official visit to Liberty lodge of Masons Tuesday evening and the event was made the occasion of a splendid turnout of members. Liberty lodge is one of the strongest in the state and has made great gains in membership within the past few years. The officers of the lodge will hold their annual dinner at the Fairfax this evening.

### NEWTON

Arrangements are under way for a soccer and rugby football tournament for Newton Center teams on the local playground.

The forestry department are thinning the branches of the large trees on Chestnut street and Commonwealth avenue, which met overhead and prevented the oil dressing on the road from drying properly.

### NEEDHAM

Rosemary commandery, N. O. G. S., held a social Tuesday evening. Deputy William F. Hall made a short address.

The Young Peoples Association will meet Monday evening, Oct. 3.

Needham commandery of the Golden Cross had an official visit from Grand Commander Blinn and Grand Recorder Crowther Monday evening.

Preparations are well under way for the two joint mass meetings of men's religious organizations to be held in Tremont Temple Oct. 9 and 10.

### MIDDLEBORO

The fall convention of the Plymouth County W. C. T. U. is being held at the Central Congregational church in this town today.

### QUINCY

The site of the new \$80,000 court house was purchased yesterday for \$15,000 by the county commissioners.

### THOMAS HILLS PASSES AWAY.

Thomas Hills, who was for 25 years previous to 1893 chairman of the board of assessors of Boston, passed away Tuesday afternoon at his home, 323 K street, South Boston. In 1865 he was elected to the Legislature, was appointed a member of the tax commission of 1874 by Governor Talbot and organized the Citizens Trade Association of South Boston.

## ADVOCATES CIVIL SERVICE CLAIMS FOR RETIREMENT

Congressman F. H. Gillett will be one of the speakers at the mass meeting in Faneuil hall Oct. 1, to be held by the local employees of the government who are interested in retirement agitation. The congressman has long been identified with the employees movement and will talk on his bill, which is to come before the next session of Congress. President M. F. O'Donoghue of the United States Civil Service Retirement Association of Washington will also be among the speakers.

Interest in the retirement movement now extends all over the country and at a meeting held Tuesday night at the federal building representatives were present from every branch of the government service, which numbers over 7000 in Massachusetts. For the first time in a score of years all the various government departments are working together in a common cause.

## MOVE TO IMPROVE LOVELL'S ISLAND

With the sending to the lighthouse commissioners at Washington of recommendations for awards of contracts to three Boston concerns begins the movement to improve Lovell's island as the lighthouse depot for the second lighthouse district.

It is proposed to make extensive improvements on this island. The New England Brick Company is the lowest estimator to furnish bricks for dwellings and for raising walks at the island; E. B. Badger & Sons for furnishing spruce for building purposes and George M. McQuesten Company for furnishing hard pine.

ONLY \$325,000 FROM AUTOS.

ALBANY, N. Y.—Secretary of State Koenig announced that the total receipts of the automobile bureau amount to \$325,000. Licenses have been issued to about 20,000 chauffeurs.

The latter has already begun active campaigning against Congressman Ernest W. Roberts on an independent ticket and is said to be winning support from voters of both parties.

The state committee believes there is

## Democratic Committee Sounds Sentiment as to Seventh District Policy

(Photo by Chickering.)  
THE HON. THOMAS J. BOYNTON.

THE Democratic state committee is sounding the sentiment in the seventh congressional district with a view to learning whether the best policy to pursue there is to give the Democratic nomination for Congress to former Mayor Thomas J. Boynton of Everett or to turn it over to the Rev. W. Lathrop Meaker of Revere.

The latter has already begun active campaigning against Congressman Ernest W. Roberts on an independent ticket and is said to be winning support from voters of both parties.

The state committee believes there is

## MR. CANNON FIRM IN ALLEGIANCE TO REGULAR FORCES

(Continued from Page One.)

increased from \$447,000,000 to \$1,000,000,000."

Mr. Cannon recited at length the accomplishments of the Payne law and continued:

"We have the results and the proof of the pudding is in the eating. I want to express my conviction that this is to be a campaign for the serious consideration of the one national policy which touches every man in the country. That is the question as to how we are to raise \$1,000,000,000 a year for the expenses of the various functions that have been put upon the federal treasury, not by one party, or one section of the country, but by the whole people in their agitation for the development of agriculture, the regulation of railroads, the inspection of mines, the improvement of rivers and harbors, the care of the national forests and the reclamation of arid lands."

The speaker declared that the agitation to place new burdens on the federal government increases rather than diminishes.

"The agitation for another tariff revision, or another attempted revolution in our revenue policy is just as dangerous to the welfare of the whole people as was that of 1894, when the Wilson tariff was enacted," was the speaker's final conclusion.

## AVIATOR IN ENGLAND FALLS.

FOLKESTONE, Eng.—Thrown from his monoplane while flying at a height of 50 feet today, Aviator Barnes was seriously injured.

a chance for Democratic victory in the seventh district this year, if the situation is handled carefully. If it is shown or investigation that Mr. Meaker is going to cut heavily into the Republican vote without winning many Democrats to his side, Mr. Boynton will undoubtedly be chosen to run on the Democratic ticket against both.

## MR. TAFT CONDEMNS "PORK BARREL" TYPE OF WATERWAY BILLS

(Continued from Page One.)

between those engaged in transportation on the water and those by rail.

"The cost of the improvement of the Ohio river is to be upward of \$63,000,000. The plan is to appropriate sufficient money each year so as to complete all the dams in 12 years. I wish that Congress had arranged to expend the money in less time and complete the works for its completion is not alone important for the immediate benefit that it will confer commercially in the Ohio valley, but it is important to vindicate or to discourage further investments of this kind in other directions.

"I earnestly hope that the time may come in the not distant future when the plan for completing the Ohio river improvement shall be changed so as to make the time six years for completion instead of 12. One of the great hindrances to the success of the improvement of our waterways has been the delay incident to the completion of each project. That has grown out of the method pursued in framing the river and harbor appropriation bills.

"As these waterway improvements are to be carried on in upward of two thirds of the congressional districts, it can be readily understood what the pressure is from their representatives in Congress to have every project that is approved appropriated for.

"This is done with very little regard to the comparative merits of the different improvements, and it has a tendency to delay every improvement a number of years beyond the time when it might be made profitable by early completion. This is what has been called the 'piecemeal' policy, and is very unsatisfactory.

"A supervising board of engineers should recommend to Congress the improvements in the order of their importance and should have the power to advise that body that the beginning of certain improvements should be postponed until other improvements are completely finished. It by no means follows that a departure from the present system would postpone the completion of many of these improvements any more than they are likely to be delayed under the present system.

"It is doubtful how far by executive order I can go in directing the engineers to make recommendations informing Congress as to the relative importance of the projects adopted and entered upon. I think I have gone as far as I can in this matter, and I shall ask Congress for more power at its next session.

"In signing the last river and harbor bill, which was subject to the criticism that many items were contained therein that were merely piecemeal, I indicated to Congress that the passage of another bill of that character would merit a veto. Certainly until this fundamental reform is put into effect the improvement of our rivers and inland waterways will be chiefly important because of the local advantage of the money expended and not because of the betterment of our transportation.

"The evil in the corrupt control of a Congress or a Legislature by private interests is manifest and always calls for condemnation. But there is another kind of legislative abuse as dangerous, and that is the selfish combination of the representatives of the majority to expend the money of the government for the temporary benefit of a part or with little benefit to the whole. It is the duty of the majority and the minority to legislate always for the benefit of the whole people, and any enactments that look to the selfish exploitation of less than the whole at the expense of the whole and without benefit to the whole is a species of legislative abuse that comes very near corruption in its effect and is perhaps more dangerous than corruption, because those who support such a combination are generally bold in its defense.

"The days of the 'pork barrel' should be numbered. The country is roused against corporate or corrupt control of legislative agencies, but it is doubtful whether the constituencies as yet are able to perceive the higher obligation on the part of themselves and their representatives not to use their votes in combination to appropriate to a part that which belongs to the whole."

## GRAFT WITNESS TELLS OF TAKING OVER OF STOCKS

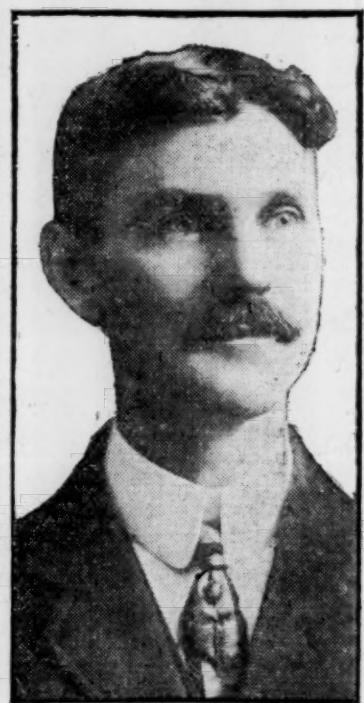

NEW YORK—That the Metropolitan Street Railway Company frequently "took over" stocks which influential persons were carrying with brokers and that in one month this amount reached the amazing total of \$250,000, was testified to by H. H. Vreeland, former president of the Metropolitan, today.

Mr. Vreeland was the first witness called by the legislative committee which is probing graft charges, and his evidence was sensational from the beginning.

During one month in 1900, he testified, his company took over \$250,000 of shares of "Electric storage battery" stock for certain persons, but he claimed he could not remember who those persons were, nor who the brokers were through whom the transaction was made, although the entire deal is protected by the statute of limitations.

**ALLEGED STOWAWAYS TRIED.**  
Judge Henry W. Bragg of the Charleston district court spent today hearing the testimony in the case against the 24 Italians, alleged stowaways, who are charged with conspiracy to defraud the White Star Line.

## Cincinnati's River Dam Opening Takes Place With Special Public Ceremony

FRANK B. DAVISON.  
Commissioner-general of Ohio valley exposition, which celebrates opening of Ohio river dam.

## S. P. C. A. IS TOLD OF MONEY GIFTS

President Francis H. Rowley at the September meeting of the directors of the Massachusetts Society for the Prevention of Cruelty to Animals, held today, announced that the society acknowledges gifts of \$50 each from Miss Mary K. Belles and Mrs. Clara M. Rotch; a bequest of \$1024.86 from Miss Ellen T. Emerson of Concord. By the will of Miss Caroline M. Martin of Dover, N. H., the society is to receive \$3000, and the American Humane Education Society \$2000.

It was announced at the meeting that through the courtesy of Mrs. Sharpe of 74 Newton boulevard, who has opened her spacious reception rooms for the purpose, two addresses will be delivered by Prof. J. Howard Moore of Chicago at 3 o'clock on the afternoons of Saturday and Sunday, Oct. 1 and 2, under the auspices of the society and open to the public.

## RETURNS A MAJOR FROM THE WEST

Maj. Robert H. Rolfe, local army depot quartermaster, is back at his desk today after an absence of three months at Ft. Riley, Kan. He takes up his regular duties today for the first time with advanced rank, having been promoted from a captain to a major while in the West. He was acting quartermaster on the staff of Brig.-Gen. J. K. Ward at the big army maneuvers at Ft. Riley.

It will be several days before Major Rolfe gets down to actual business. When he begins to look through his papers, the shoe industry in Massachusetts will probably be informed that the government is in the market for a large order of shoes. The rumor of this big shoe order cannot be verified until then.

## QUICK RESPONSE TO BEVERLY BILLS

BEVERLY, Mass.—Tax bills have been sent out to taxpayers in ward 1 and there has been an immediate response, several of the recipients paying their assessments to City Collector Andrew S. Edwards within a few hours after the bills reached them.

There were 1325 bills sent out in ward 1, most of them for poll taxes. In sending out the bills it was noted that there are 75 streets in ward 1. The ward 2 tax bills are going out today and will number about 1000. The other bills will probably all be out inside of a week.

## CLUB IS IN FAVOR OF MR. O'MEARA

A committee of the Republican Club of ward 25 has been formed to further the campaign interests of Police Commissioner Stephen O'Meara, who is contesting for the Republican congressional nomination in the eleventh district against W. Dudley Cotton, Jr. The committee is: Frank Krogman, Isaac F. Woodbury, Fred Locciott and John Wiflash. The club has endorsed Mr. O'Meara's candidacy.

## POSSES PURSUE DESPERADOES.

ALBUQUERQUE, N. M.—Word reached here today that desperadoes had raided the town of Holbrook, Ariz., killing two citizens. The desperadoes escaped into the mountains, pursued by posess.

## ALTER WEYMOUTH BUILDINGS.

WEYMOUTH, Mass.—The old Nash estate on Front street has been sold and the buildings are being remodeled for the Barry Manufacturing Company.

## PEKING HONORS MR. DICKINSON.

PEKING—With becoming ceremonies Secretary of War Dickinson was today received in audience by Prince Chun the regent. Mr. Dickinson was presented to the regent by W. J. Calhoun, the United States minister to China.

## REGULARS IN HOUSE GIVEN SEVERE BLOW BY TAWNEY DEFEAT

(Continued from Page One.)

mittée five years ago and carried his loyalty to Mr. Cannon to the point of sacrificing his seat in Congress.

As a regular, he felt bound to support the Payne tariff bill, which was unpopular in Minnesota. He was the only member of the delegation from his state to vote for the bill, and he then predicted it would probably beat him for renomination.

Friends of conservation were intensely bitter against Representative Tawney. As chairman of the appropriations committee, he abolished Colonel Roosevelt's conservation commission, and in other ways interfered with the conservation movement. Gifford Pinchot stumped the district to defeat him, and every influence of the former chief forester's friends was brought into the fight. They planned to oppose him in the election if he had been renominated. Mr. Tawney is serving his eleventh term in Congress.

In case of the next House being Republican, Mr. Smith of Iowa may be made chairman of the appropriations committee, although he is outranked by Mr. Gillett of Massachusetts. With a Democratic House Congressman Fitzgerald of Brooklyn is said to be almost certain to get the chairmanship.

## New York Primaries Show Roosevelt Fight Is Close

NEW YORK—It will require the official count of the delegates to determine if Vice-President James S. Sherman or Colonel Roosevelt will be the temporary chairman of the Republican state convention, which meets in Saratoga next Tuesday at noon. This was made certain today when a compilation of the list of delegates was possible following the final up-state primaries yesterday.

There is unlikely to be a majority of more than 10 or 15 either way, despite the confident claims made by both managers today. William Barnes, Jr., leader of the "old guard," claims a majority of 55 for Mr. Sherman, while his opponent, Lloyd C. Griscom, insists that Colonel Roosevelt will have a majority of not less than 70.

A careful analysis of the figures compiled by both camps, indicates that the "old guard" can count absolutely on but 492 delegates. It requires 508 to control the convention and it will be necessary for the anti-Roosevelt combine to make up the 16 needed delegates from the doubtful list.

## James A. Tawney Defeated by Minnesota Progressive

MINNEAPOLIS—Representative James A. Tawney, one of the strongest stand-patters in Congress, and the man whom President Taft upheld in his now famous Winona speech, was defeated in the congressional primaries for renomination as representative from the first Minnesota district, by Sydney A. Anderson, insurgent.

O. M. Levang, campaign manager for Mr. Anderson, says his majority will be more than 2000.

In the fourth and fifth districts where big fights were made the present incumbents were renominated. F. E. Stevens was returned in the fourth and Frank M. Nye in the fifth. Both of these men are considered mild progressives and were fought by out-and-out insurgents. According to latest returns the complete congressional list will be as follows:

REPUBLICANS. DEMOCRATS.

1—Sydney Anderson ..... H. L. Buck.  
2—In doubt ..... W. S. Hammond.  
3—A. R. Davis ..... No candidate.  
4—F. C. Stevens ..... L. J. Gleason.  
5—F. M. Nye ..... Elmer Heidel.  
6—A. Lindberg ..... No candidate.  
7—A. J. Volstead ..... No candidate.  
8—C. B. Miller ..... Alfred Jacques.  
9—H. Steenerson ..... No candidate.

\*Renomination.

WINONA, Minn.—Mr. Tawney's campaign managers at noon today conceded the nomination of Sydney Anderson by from 2000 to 2500 majority. Tawney headquarters were closed and the managers left, convinced that Mr. Tawney was beaten. This conclusion was reached with 111 precincts out of 271 in the district missing. Most of Mr. Tawney's strongholds had reported and missing returns are expected to increase Mr. Anderson's lead.

## Vice-President Sherman Loses in His Own District

NEW YORK—Vice-President James S. Sherman, candidate of the old guard for temporary chairman of the Republican state convention, was defeated in his own Assembly district in Oneida county, and in his own ward in the city of Utica at the primaries yesterday. Former Assemblyman Merwin K. Hart of Utica, one of the progressive leaders, failed to carry his own ward, which is in Mr. Sherman's district.

According to reports received at Republican state headquarters last night the old guard forces carried the first and third Assembly districts of Oneida county and will have the support of 149 delegates, while the progressives will control nine.

## MR. LODGE PRINCIPAL SPEAKER.

PROVIDENCE, R. I.—Senator Lodge of Massachusetts was invited to be the principal speaker at the Republican state convention here Oct. 10 at a meeting of the state central committee today. No action was taken concerning the election of a successor to United States Senator Nelson W. Aldrich.

## CANDIDATES TO MEET TO DECIDE UPON THE CONVENTION HONORS

Four Possible Democratic Nominees for the Governorship to Have a Voice in Arrangement of Details.

## HARMONY PROGRAM

The four candidates for the Democratic gubernatorial nomination, Charles S. Hamlin, Eugene N. Foss, John F. Fitzgerald and James H. Vahey, will have a say in the naming of the chairman of the Democratic state convention, and the chairman of the committee on resolutions and in the procedure to be followed at the convention, according to a statement made today by Chairman Frederick J. Macleod of the Democratic state committee.

Within a few days the four candidates will get together with the executive committee of the state committee to choose officers for the convention and to decide as to the manner of election.

This meeting will be unique in the history of the Democratic state organization of Massachusetts, as heretofore the executive committee has had sole power in naming the convention officers.

The candidate are to be considered this year in choosing the convention officers, in order to avoid any possible disruption in the party, either before or during the convention. Mr. Macleod said today that all that is necessary for the Democrats to win the election in Massachusetts this fall is to maintain the harmony that has prevailed in the rank and file of the party so far in the campaign. Mr. Macleod said that he becomes more convinced every day that this is to be a Democratic year in Massachusetts.

## ESSEX LEADERS TO HOLD OUTING

The Democrats of Essex county are arranging for a big meeting Saturday, Sept. 24, at the Danvers Country Club, at which Chairman Frederick J. Macleod, John F. McDonald and Representative Thomas P. Riley of Malden are to be the speakers and such others as they are able to get.

Word has been sent to the state committee that they don't want any of the candidates for the Democratic gubernatorial nomination at the outing.

M. C. Pettigill is the moving spirit in the outing and he says he hopes to have Congressman-elect McGillivuddy of Lewiston, Me., as one of the speakers.

## TOURISTS START ON TROPICAL TRIP

On the United Fruit Company's steamer Admiral Farragut, Capt. J. Jensen, which left here today for the tropics, was a large party of tourists. Among the voyagers were A. S. Pelletier, James H. Withington, Joseph Keefe, John Fennell, Mrs. C. P. Watson, Robert Watson and Miss V. Williams of Boston and a number of New England people.

The Farragut is bound for Kingston and Port Antonio, Jam. She carried out a large amount of general cargo, including heavy shipments of provisions, flour and dry goods.

## BOOMS THE HALE MEMORIAL FUND

Largely increased subscriptions to the Edward Everett Hale statue fund are anticipated as the result of a plan put into operation today, which is to mail 6000 letters, at the rate of 100 a week, to admirers and friends of the preacher-philanthropist. Part of the letters are signed by the Rev. Dr. Francis H. Rowley, secretary of the memorial committee and the remainder by William Howell Reed. The letter which is personal in nature asks for such contribution, large or small, as one may feel disposed to make.

## MR. BALLINGER IN DENVER.

DENVER, Col.—Secretary of the Interior Ballinger arrived in Denver today and was the guest of honor at a luncheon given jointly by the real estate exchange and the Chamber of Commerce. A number of the United States officials, with headquarters here and a score of delegates to the National Irrigation Congress to be held in Pueblo next week attended. Mr. Ballinger spoke briefly during the luncheon, discussing the work of his department.

## HOLD KURD FOR EXTRADITION.

NEW YORK—On a charge of stealing \$7000 worth of jewelry from the international exposition at Brussels in the recent fire that swept through the exhibition buildings, Angeli Antoine Jean Kurd was held by Commissioner Gilchrist in the United States district court today to await extradition to Belgium.

## LUTHER SEMINARY EXPANDS.

ST. PAUL—Trustees of Luther Seminary here have added 10 acres to the school's grounds, and ground will shortly be broken for an additional building, to cost \$30,000. A gymnasium probably will also be erected. A brick residence for the president is to be put up.

## NEW TRAIN FOR DULUTH.

DULUTH, Minn.—On Oct. 3 the first train on the Chicago branch of the Soo line, which is the old Wisconsin Central road, will be run from Chicago into Duluth. The roadbed has been largely reconstructed. The western line of the Soo to Brooten is also ready for trains.

## An Opening Fall Display of New French Marabout Stoles

Women's Neckwear Section—Main Store. Street Floor.

These beautiful Stoles were personally selected by our buyer in France during his last trip, just completed about a month ago. Marabout Stoles are destined to be more popular than ever this Fall and Winter and our showing is complete with the very newest foreign styles, in New England's largest variety. We invite your early inspection.

New French Marabout Stoles—Black, natural and full range of colorings. Prices..... 5.00 up to 45.00

New French White Marabout Stoles—All beautiful pieces. Prices 7.50 up to 39.50

New French Ostrich Boas—Black, white and colors. Prices.. 12.50 to 75.00

New French Marabout Scarfs and Col-larettes—Both plain and fancy, including the new tassels and fringed ends. Prices.....6.50 to 27.50

New French Marabout Sets—Stole or scarf with muff to match. Prices, per set.....11.50 to 45.00

New French Marabout Muffs—Latest Paris shapes. Prices. 7.50 to 18.50

Until further notice the business hours of this establishment will be 8.30 A. M. to 5.30 P. M., Saturdays included.

## Jordan Marsh Company

## LEGISLATORS MEET AT YOUNG'S TO PLAN FOR PARTY VICTORY

(Continued from Page One.)

tee will make a tour of the state to study conditions in the districts where there is a close contest between Republican and Democratic candidates. Speakers best qualified to support the Republican candidate in need of assistance will be furnished from time to time to speak at rallies in his behalf right up to the night before the election.

Representative John E. Rousmaniere of ward 21, Boston, chairman of the committee, presided at the meeting this afternoon. He will confer with Chairman Hatfield of the state committee as to the plans considered during the meeting.

## Colorado Republicans Oppose the Referendum

COLORADO SPRINGS, Col.—"We declare that we are unalterably opposed to the initiative and referendum amendment, because it is revolutionary in character and subversive of a Republican form of government."

This is the way the initiative and referendum is referred to in the platform reported to the Republican state convention today by the platform committee. The way the regulars overrode the insurgents in the committee foreshadowed complete control by the regulars at today's session. The insurgents announced that they would make three minority platform reports, all denouncing United States Senator Guggenheim.

An effort of Merle Vincent, insurgent candidate for governor, to push a resolution denouncing United States Senator Guggenheim through the resolutions committee was overwhelmingly defeated and instead a strong endorsement of the senator was adopted.

## HEARING ON NEW HERALD PETITION

A secret hearing will produce a public decree on the petition of the Boston Herald Company, whose receivers, C. F. Weed and John Norris, seek permission to issue \$100,000 in certificates of indebtedness, to retire \$50,000 of such certificates previously issued and to continue the business.

The secret hearing was held on an order of notice in chambers before Judge Colt of the United States circuit court. The decree will be entered late this afternoon, it is expected.

## STIRS CHILDREN'S PRIDE IN BOSTON

Mayor Fitzgerald this afternoon addressed a circular letter to the school-teachers of Boston, urging them to appeal to the patriotism and civic pride of the school children to do their utmost to keep Boston streets clean.

The mayor points out to the children how they can be careful in throwing rubbish and the like about the streets and cautioning their school playmates to do the same.

## BEVERLY PEOPLE OPPOSE ROAD FOR HAULING OF COAL

Property Owners at Commission Hearing Speak Against Proposal of Company for Private Trackage.

Opposition to the granting of a petition of the Sprague, Breed & Brown Company of Beverly for the right to lay a private railroad track in that city was made before the board of railroad commissioners today by attorneys for property owners whose premises would be crossed by the proposed track.

Albert Boyden, attorney for the petitioning company, explained to the board that a spur line already runs from the Boston & Maine railroad tracks to the property of the Guffy Company, dealers in oil, and that an extension of only 49 feet will carry this track to the property of the Sprague, Breed & Brown Company, dealers in coal, and will enable them to handle their coal much more economically to the general public.

William B. Sullivan, counsel for certain property owners through whose front yard the proposed line would run, opposed the granting of the petition on the ground that there is no public necessity for it. He also questioned the right of the commission to permit one business enterprise to run railroad cars over tracks owned by another private company, as intended.

Former Mayor Charles Neal Barney of Lynn, counsel for other property owners, contended that while the statutes give the railroad commissioners authority to license a railroad across public highways, such authority is intended only for public railroad lines, and insisted that there is no warrant in law for granting a location to a private company in a public street.

The commission took the matter under advisement.

## PRESIDENT'S TINY FLEET WILL DOCK SOON IN NEW YORK

The U. S. S. Mayflower, Capt. George W. Logan, which has been used by President Taft this summer, today is at the Charlestown navy yard and later will go to New York for repairs. The Mayflower has been used by the President three times this summer—on the trip to Bar Harbor, on the run across the bay to Provincetown, and for the ceremony of presenting the Taft cup in the German-American sonder boat races.

The U. S. S. Sylph, now moored off the Jubilee Yacht Club house, will sail from Beverly, Oct. 4, for New York where she will be given an overhauling at the navy yard at Brooklyn. From there the craft, commanded by Capt. Charles R. Train, will go to Washington for the winter. The President and members of his family have used the Sylph considerably during the summer for trips along the North Shore.

## REPORT OF PLOT AGAINST MIKADO.

LONDON—Despatches received here tell of the publication in this afternoon's edition of the Hoochi Shimbun of Tokio of an assassination plot against the Mikado. The plotters are under arrest, the paper states, and are to be tried at a special term of court. The Hoochi Shimbun says that the arrests were made some time ago but the facts were suppressed by the government.

## NORTHERN SUBURBS FAVORABLE TO IDEA OF GREATER BOSTON

(Continued from Page One.)

lose their individuality; that while under separate forms of government they could secure certain returns upon money paid out in the form of taxes, that under one big city they would be obliged to pay for the work which would benefit only the city proper.

The agitation for certain forms of commission government has tended to do away with that feeling. The action of the city of Boston in adopting a modified form of commission government has probably done more to alleviate that feeling than any other act which Boston has taken. Should the suburbs come into Boston, it is probable that still greater changes in the charter governing the Greater Boston would be demanded. Much time is being given the proposed annexation of the suburbs in suburban civic association meetings. The Malden Deliberative Association, the Malden Civics Association, the Medford Good Government Association, the boards of trade of many of the cities, the Melrose Deliberative Assembly, the Melrose Civics Association and scores of other similar organizations are considering the question in its various phases.

Could all of the suburbs be assured representation on the governing body of a Greater Boston, could they retain, for the present at least, a certain amount of individuality which would not conflict with the authority of the greater city, could they be assured that until they so desired the boundaries, ward lines and other divisions existing would still be retained, it is probable that much of the opposition would be withdrawn.

Residents of the suburbs appreciate the advantages which would come to them through consolidation with Boston. They know that whereas the Boston business man now resides in the suburbs and has no voice in the administration of the affairs of the city where his business interests are located, he would then have something to say; they realize that there would be a large saving in the administrative forces of the greater city, with all of the many separate city departments of the cities consolidated in a department which would comprise all of the cities and towns; they realize that there would be more equitable treatment in the matter of real and personal estate assessments and in many other ways.

During the coming winter, should the movement for a Greater Boston receive serious attention at the hands of the civic bodies in Boston proper, it will receive much attention at the hands of the suburban governments, societies and associations, and both the city of Boston and the suburbs would probably be ready for some definite action by another autumn.

## DEMOCRATS TO SPEAK IN LOWELL.

Frederick J. Macleod, chairman of the Democratic state committee, John F. Macdonald, chairman of the executive committee of the state committee, and Representative Thomas P. Riley, chairman of the Democratic legislative campaign committee, will speak before the Lowell Democratic city committee this evening. Mr. Riley will review the insurgent movement.

## FOODSTUFFS TRUST FACTS BY NEW YORK MEN EXPECTED HERE

Special Federal Grand Jury  
Which Is Inquiring Into  
Situation in New England  
Has Heard Chicago Men.

### INDICT SALEM MEN

Important testimony from New York men concerning monopolies of foodstuffs is expected at today's session of the federal circuit court special grand jury sitting in Boston, which is conducting an inquiry into the rendering and fresh beef industry in New England.

Chicago men have already appeared before the special grand jury, and their testimony was such as to render a sweeping probe of monopolies or trusts of foodstuffs possible, with the center of operations in this city.

The Essex county grand jury at Lawrence late Tuesday returned indictments against the Swift and Armour packing house companies doing business in Salem against J. P. Squire & Co. of Beverly, and against several drivers for these companies in the two towns, charging them with giving short weight in selling hams and other products of their business. The indictments were found upon testimony presented by inspectors working under Daniel C. Palmer of Malden, state commissioner of weights and measures.

The full list of indictments, with the number of counts in each, was as follows: Swift & Co. of Salem, four counts. Armour & Co. of Salem, one count. Alphonso E. Heal of Beverly, one count. John P. Squire & Co. of Beverly, one count.

William H. Reed of Beverly, one count. James Crane of Salem, one count. Ernest P. Odell of Salem, one count. Fred B. Savage of Salem, two counts. Complaints from several merchants started the inspectors working according to information supplied last evening by Henry C. Attwill of Lynn, assistant district attorney of Essex county.

In speaking of these cases last evening, Assistant District Attorney Attwill intimated that there is other evidence against those who had been indicted, and if the present prosecution fails there may be other proceedings, perhaps on other charges. He would not say what this additional evidence is.

### WOMAN IS NAMED TO FACTORY BOARD

The nomination of Miss Florence M. Marshall of Cambridge to be a member of the commission which is investigating the laws of the commonwealth relative to factory inspection was sent to the executive council today by Governor Draper. Miss Marshall takes the place of Miss Emily G. Balch, who resigned.

Miss Marshall is a graduate of Boston University and organized and directed the Boston trade school for girls. She had charge of the industrial training of girls under the commission on industrial education, resigning last spring to take up the organizing of a vocation bureau for girls. She is acting director of the industrial training department of the Women's Educational and Industrial Union.

## Movement to Beautify Flax Pond

Lynn city authorities contemplate development of picturesque water spot and surrounding shores in response to citizens' efforts.

SCENE ON FLAX POND, LYNN, MASS.

Landscape artist, engaged by public subscription, completes special report on best means of adding to attractiveness of "75 acres" of city-owned water.

LYNN, Mass.—Spurred to action by the liberal civic spirit of about a score of residents of Lakeside and Wyoma, the city authorities are contemplating the extensive development and beautifying of Flax pond and its shores.

Some time ago the city took possession of this pond because the private owners had not paid the taxes upon it and a movement was immediately started by private individuals to beautify the spot and transform it into a public breathing place.

Funds were raised by popular subscription and an expert landscape artist was employed to make a study of the pond and contiguous shores. This gentleman, Arthur Shurtleff of the metropoli-

tan park commission, has now completed his report, which will be made public at a meeting to be held Sept. 22 at the Intervale Club in Glenmere.

Short addresses will then be made by former Mayor Charles Neal Barney, Thomas F. Porter and Ralph S. Bauer, president of the Lynn Board of Trade.

Public spirited citizens behind the movement are Glenmere, Charles S. Bretton, Elmer F. Dwyer, William R. Henry, Henry C. Paul, Bennett E. Titus; Lakeside, Frank W. Atkins, J. Edgar Barnes, Francis W. McCarthy, Charles H. Stevens, Milton W. Thrasher; Wyoma, E. Wilson Baker, Frank J. Dolansky, Ernest Harnois, John A. O'Keefe and Robert W. Thompson.

## MR. MELLEN EXPECTED TO STIR ACTION ON B.&M. BRIDGE REPORT

Colonel Burr's Recommendations Now Pigeon-Holed in  
Washington and New Head of Massachusetts System Will Succeed in Relieving It of Its Dust.

Incumbency of the presidency of the Boston & Maine railroad by President Charles Mellen of the New York, New Haven & Hartford railroad is expected soon to bring action on the report of Lieut. Col. Edward Burr, U. S. A., recommending what the proposed changes should be in the railroad bridges of the Boston & Maine over the Charles river at the North station.

This report has been in Washington many months. It is believed now to be pigeonholed, but the bridge system on the New York, New Haven & Hartford railroad and the relationship of President Mellen and his civil engineers with the war department engineers are such that a speedy solution of the Boston & Maine bridge question is looked for.

The railroad is given until 1914 to make the changes, which may involve the expenditure of millions of dollars. A board of army engineers heard testimony and submitted a report. This report was held up until what was believed to be the last minute and then early last spring sent to the then Chief of Army Engineers, Brig.-Gen. William Marshall. From that time on all trace of it has been lost to the public. No one seems to know anything about it, except that it is in Washington.

President Mellen, when he joined the conferences on the bridge question seemed eager to have it go through at once for speedy adjustment, and it is said in railroad circles that he will at once inquire into the status of the report. The question of the North to

South station tunnel also is considered in this proposition.

The war department several months ago also ordered the Boston & Maine railroad to make certain changes which practically called for a new bridge at Manchester. No plans of what the Boston & Maine intends to do in this matter have been received at the local army engineer's office.

## SEEK TO IMPROVE WATER POWER ON THE CONNECTICUT

Congress Will Be Asked to  
Consider Bill for Making  
River Navigable as Far as  
Hartford From Locks.

SPRINGFIELD, Mass.—A bill for the improvement of the Connecticut river waterpower at Windsor Locks and for making the river navigable from that place to Hartford will be introduced into Congress at the next session.

It is not known whether the introduction will be done by the Northern Connecticut Securities Company, the Connecticut River Company or the navigation society of this city. If the others do not do so the officers of the local Association for the Improvement of Navigation state that they will introduce the bill, and if so a provision to furnish power for the shops of the United States armory may be incorporated in the bill.

All those in favor of navigation think that they never were in so favorable a position to secure the improvement of the river. The report of the government engineers for the expenditure of \$1,015,600 for permanent work and \$10,000 a year for maintenance, made March 25 last, gave a boom to the project that its advocates believe will be impossible to resist.

## HYDE PARK PLANS Y. M. C. A. PROGRAM

HYDE PARK, Mass.—The Y. M. C. A. board of directors has decided upon Sept. 28 as opening night and a program is now being arranged. The gymnasium classes will begin Oct. 3. A feature of the physical work will be a bowling league, including teams from the Hyde Park, Brockton, Taunton, Quincy and North Attleboro associations.

The ladies auxiliary, with Mrs. L. S. Evans as president, is planning an active season. These directors have been elected: Mrs. Alice Balkam, Mrs. Edward H. Baxter, Samuel Elliott, Mrs. Edward Runnells and Mrs. George W. Earle.

## NOTABLE EVENT FOR CANOE CLUB

WEST BRIDGEWATER, Mass.—The Nunktasset Canoe Club will close its season on Town river Thursday evening, when a grand celebration will be held. At a meeting of the members of the club last evening, plans were made to make this the most notable event for a number of years. An entertainment will be provided and one of the features will be a parade on the river of the canoes by the club members. Plans are being made to illuminate the clubhouse and grounds.

SCHOOL REGISTRY, 698,933.  
NEW YORK.—The number of pupils registered in all the public schools of New York city on Sept. 16 was 698,933. This is an increase of 18,065 over the register of Sept. 15, 1909.

## MONITORIALS

By NIXON WATERMAN.

### SPELLING LESSON.

To know just what it's hard to tell—O-u-g-h is going to spell.  
At times when it appears as though We ought to sound it as in dough Why then, perhaps, just like enough, It's sounded as it is in tough;  
Or, may be, as is sometimes true, We speak it as it is in through;  
Or if we find we still are off, We sound it as it is in trough;  
When, finally, we must allow, 'Twas meant that it should sound like bough.  
And, so, just what it's hard to tell—O-u-g-h is meant to spell.

The inability of the promulgators of aero meets to make money is not hard to explain. So much of the show must necessarily occur above the top of the fence that the public does not have to go inside to say that it has seen it. It is now in order for some genius to invent a sky screen of some sort, held aloft by anchored kites, perhaps, inside of which the performances can take place. However, when aeroplanes become so common that the grocer's boy employs one in delivering a yeast cake at the kitchen door, no one can longer be induced to pay out money to see one.

### LOCAL PRIDE.

Easton—There is nothing like a game of football to call forth expressions of loyalty from the backers of the contending teams.

West—That's so. A sight of the "pig-skin" seems to enliven the "rooters."

Former President Roosevelt is so earnestly opposed to party bosses that he means to do away with them even though he has to boss the whole machine to do so.

### WOULD RATHER CLIMB IT.

Tiddley—How would you like to soar over Mt. Blanc in an aeroplane?  
Winks—I don't believe I feel any al-pining for a trip of that sort.

Although bread will be sold by the pound in New York, beginning Oct. 1, it will still be to the interests of bakers to have their product as "light" as they can.

### PERFECTLY OBVIOUS.

No matter how good an umbrella may be, If you'll just think it over, one fact that is plain  
Must come to your notice and clearly you'll see  
It's used up the first time it's caught out in the rain.

## BAY STATE NATIONAL GUARD OFFICERS TO GO TO MEETING

Fourteen Delegates Chosen to Attend St. Louis Convention of Association Which Will Discuss Military Affairs of Country in Session of Oct. 3-5.

Fourteen delegates have been chosen to represent Massachusetts at a military conference of far-reaching importance to take place in St. Louis, Mo., Oct. 3 to 5, when the National Guard Association of the United States holds its twelfth annual convention.

Secretary John W. DeCrow of the National Guard Association of Massachusetts has completed arrangements for the attendance of these delegates, who are to leave Boston Oct. 1:

Adj.-Gen. William H. Brigham, who will be accompanied by Mrs. Brigham; Maj.-Gen. William Stodford of Beverly; Brig.-Gen. William A. Pew; Col. Frederick E. Pierce, second M. V. M. infantry, Greenfield; Col. E. Leroy Sweetser, eighth M. V. M. infantry, Boston; Col. Walter E. Lombard, coastal artillery corps, Boston; Maj. Howard L. Rogers, inspector-general department of Brookline; Capt.

### ON THE WEDDING TOUR.

The Groom—Everything at this hotel table is fine except them there plums. I've tasted lots better ones right at Beanblossom.

The Bride—Oh, Reuben; be careful not to let anybody hear you. Them ain't plums. They're olives, and nobody ever likes 'em, but you eat 'em jest to put on style.

### HASTE MAKES WASTE.

If you'd have all your movements in happiest rhyme,  
Be calm and collected and slow.  
The world wags more smoothly for those with the time  
To wait for the waggin', you know.

In spite of the fine records that have already been made by the world's daring aviators, the amateur just starting in to learn the profession is sure to be encouraged by the thought that there is yet plenty of room at the top.

### NATURAL HISTORY LESSON.

Pretty Schoolma'am—What animal is fond of the water?  
Big Boy Pupil—I suppose it is the rein-deer.

### HER WINTER VACATION.

Soon will the so-called "busy bee"  
Have matters pretty slick;  
She'll dine on honey months and months  
And never do a lick.

Mr. Bryan's paper is supporting Nebraska's Republican nominee for Governor; the son of the editor of the Springfield Republican is running for Congress on the Democratic ticket, and the Democrats of Tennessee are bent on electing the Republican nominee for Governor. Politics is not paying much attention to precedent or party lines this year.

### IN THE NURSERY.

Dolly—Do you know what makes the snowflakes?  
Dimples—Yes, they are just nothing more than raindrops that have been popped before falling.

### A SIMILARITY.

Most trouble is like fog, we learn,  
It offers slight resistance  
To one who will, and we discern,  
Looks thickest from a distance.

## MINISTERS MEET MONDAY TO TALK ABOUT PROGRESS

MARBLEHEAD, Mass.—Members of the Ministers Institute will gather at the Rockmere, Marblehead, for the thirty-fourth annual meeting of the organization Sept. 26-29. There will be discussions on various topics bearing upon the work of ministers.

The opening address will be delivered at 8 p. m. Sept. 26 by President Merle St. Croix Wright, D. D., and he will be followed by Prof. George B. Foster of Chicago, who will speak on "The Modern Problem of Religion." Morning, afternoon and evening sessions will be held.

Among the speakers will be the Rev. John C. Perkins, D. D., of Portland, Me.; Prof. Arthur C. McGiffert, D. D., of New York; the Rev. Samuel M. Crothers, D. D., of Cambridge; the Rev. Charles F. Dole of Jamaica Plain, and the Rev. Jabez T. Sunderland of Hartford, Conn.

## SMITH EXERCISES FOR INDUCTION OF DR. BURTON, OCT. 5

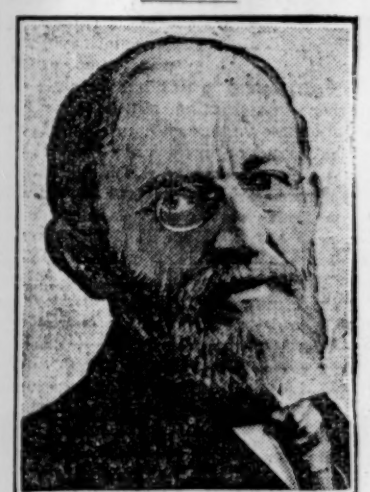

NORTHAMPTON, Mass.—The program of the exercises of the inauguration of the Rev. Dr. Marion Leroy Burton as president of Smith College has been practically completed. The exercises will take place on Wednesday, Oct. 5.

Brief addresses are expected from Governor Draper, President Lowell of Harvard and representatives of other colleges. The prominent feature will be the inaugural address of President Burton.

## NATION TO HELP THE BOY SCOUTS

The war department is going to help the boy scout movement so far as the law will permit, the first step being the detailing of a regular army soldier, James Grossman, eighth United States infantry, as instructor to the scouts in Monterey, Pacific Grove, Spreckels and Salinas in California. It is possible that a similar step will later be taken in connection with New England Boy Scout organizations.

## MR. STRAUS GIVES UP TRIP TO RUSSIA ON ENVOY PAPERS

THE HON. OSCAR S. STRAUS.  
New York merchant and ambassador to Turkey to whom Car issued tardy passport.

LONDON—Owing to the alleged slight cast upon him and the Jewish race by the Czar, Oscar S. Straus, United States ambassador to Turkey, has abandoned his intended trip to Russia; according to the Constantinople correspondent of the London Globe.

When Mr. Straus first announced his intention of visiting Russia the Russian government, instead of giving him the privileged passport that custom accords to all ambassadors, issued to him a certificate, designed especially for Jews. This certificate authorized Mr. Straus, as a Jewish merchant, to visit Russia "upon business."

The issuance of such a certificate occasioned surprise, and discussion followed. The Czar subsequently ordered a special permit, which was immediately sent to Ambassador Straus.

The ambassador was not appeased, the Globe's correspondent says, and returned it to the Czar, with a note setting forth his abandonment of the trip to Russia.

# The World of Music and Drama

St. Paul Music Festival  
to Be Given in March Will  
Hear Great World Artist

MME. SCHUMANN-HEINK.  
One of the most famous of the contralto  
singers of the world.

ST. PAUL—A music festival in which Dalton Baker, the English baritone, and Mme. Ernestine Schumann-Heink will take part, is to be held in St. Paul next March. Rehearsals will begin in November. The St. Paul Symphony orchestra will have a part, and Horace W. Beyer of Duluth, will be the director of the festival. The chorus will be one of 200 trained voices, and it is planned to hold each year a par with those held each year in Cincinnati and Worcester. Sir Edward Elgar's newest oratorio, "King Olaf," will be sung. Mme. Schumann-Heink has consented to sing "Carmen" in a concert performance, the first time that she has appeared in that role in America.

## FORE RIVER YARD MAY BE AWARDED NEW BATTLESHIP

The naval authorities desire the Curtis turbine installed on the two new battleships authorized by the last session of Congress. As the Fore River Ship Building Company at Quincy controls the rights to that style of turbine, there is considerable expectation in Quincy that one of the ships will be built at this yard.

Recently a secret conference was held by representatives of ship building yards with naval officials, when the question of turbines was discussed. It was emphatically stated then that either the Curtis or Parsons type would be installed on the new ships, and the Curtis was preferred. Negotiations are now going on between the Fore River officials and other naval ship builders in regard to the use of Curtis turbines, but a result has not been reached.

The Curtis turbine is preferred because, it is said, it imparts better maneuvering qualities to the ship and is also an American invention and production. With the building of one ship at the New York navy yard, no difficulty is expected from the Fore River concern—that is, naval officials suppose, if the Fore River plant gets the other contract.

## DULUTH TO BUILD DOCK SYSTEM.

DULUTH, Minn.—The city council has set aside \$15,000 to build the nucleus of a system of municipal docks. The appropriation was made on the recommendation of Mayor M. B. Cullum, who says he has information that a new independent vessel line is to be put on the lakes to compete with the so-called package freight line trust and the railroads.

## Development of Musical Appreciation of Audiences

A study of Symphony concerts and grand opera in Boston as related to the training of patrons.

WHAT the Boston opera company will sing this season and what the Symphony orchestra will play has been told, and the preliminaries of the season will soon be past and the execution of plans begun. We have now an advance view, so to speak; we have it all in perspective, and we can make up our minds about much of it from afar. All is known in a general way, except the recital program; but the list of Symphony soloists gives us a few hints about that.

Something like a complete idea of the recital plans of the winter could be furnished any one who asked for them, but they are so likely to suffer change that the managers prefer not to publish them long in advance. The thing worth reflecting upon is that the two established musical institutions of the city, the opera company, with Henry Russell as its steersman, and the Symphony orchestra, Max Fiedler at the helm, have their courses definitely laid out. With the opera company it is a matter of 30 stage pieces, or thereabouts, to be painted, costumed, fitted with properties, and put in action with leading artists, chorus and orchestra.

With the organization directed by Mr. Fiedler it is at least 24 large symphonic works and two or three times as many more program fillers in the smaller instrumental forms, all to be brought as near as may be to interpretative perfection. To those who count themselves a part of the musical public of Boston, the plans of the opera company and of the orchestra bring up a multitude of questions, some of them esthetic, some financial; some both esthetic and financial at once, so much does what we like depend on what we can or are willing to pay for. The promise of pleasure which the opera holds out to us is first of all in the singers, and after them in the repertory; the attraction of the orchestra is partly in Mr. Fiedler and his incomparable men, and partly in the anticipation we feel when we read on a column set up in the market place certain hieroglyphs which get their meaning from past associations—hieroglyphs like these: Brahms, Symphony No. 1; Bruckner, No. 4; Delius, "Appalachia"; MacDowell, Indian suite; Mahler, Symphony No. 2.

(Copyright, 1909, by A. Dupont.)  
MISS EMMY DESTINN.  
Famous creator of soprano roles, who  
will appear in Boston opera and  
Symphony concerts.

Why do we feel a proprietary pleasure in these names and titles? And why is it that when two citizens of the musical fellowship chance to meet in front of a second column set up in the marketplace, a column in which are cut the names of certain Italian and French opera makers, with the titles of their works, these two citizens immediately are prompted to exchange a pleasant word? The artistic spirit of our city, we say. Well, what is it that brings that into existence? Here under the September sun we contemplate on the one hand the plans of an organization called the Boston Opera Company, which we feel is a little uncertain in its preferences but is nevertheless confident of itself as an expression of the genius of the community. And on the other hand we note the projects of the Symphony orchestra; an

organization that knows clearly what it likes, because it has been 20 years forming its standard of tastes.

Small use for us to go to the philosophers with the question as to why we like to take our part in the musical life of the day; or yet with the question of more immediate concern—as to why we are glad to read on the two columns in the market place the particular writing we find there. The philosophers will look at the matter from the egoistic standpoint, while we wish to look at it from the social standpoint. They will take it to their laboratory, study it in the same spirit as physicists study the laws of sound, and in the course of time will report the results of their investigations at a meeting of a learned society. To them a phenomenon, to us a force affecting the broader relations of our civic life.

But not to spurn too hastily the results of the laboratory study of music, let us see whether the philosophers are not sometimes at one with us. When Albert Gehring, the writer of the book reviewed in this column a week ago—"The Basis of Musical Pleasure"—says that "The whole realm of music may be regarded as a single huge composition, in which all the parts react on each other," we feel that the social view of the question is, at least in an implied sort of way, pretty well stated. For the realm of music, as Mr. Gehring conceives it, must have listeners, and the parts of the great composition can conceivably react on each other only as appreciated and compared by people hearing it together. When we apply the idea practically, we find that our realm, though unified, is marked off into definite geographical divisions. Thus, to take Boston for an example, we find symphonic music, choral music, recital music and opera all cultivated with enthusiasm; but each of these departments is to a great extent independent of the others. Now look at any one of them, the department of the Symphony, for instance, and see Mr. Gehring's principle at work. Do not the Symphony audiences feel a sense of unity in all the concerts of a given year? Do they not go further than this and associate their present concert with those of former years? How else explain their wish to find through a program book a common ground of appreciation?

## PLAYHOUSE NEWS

### "THE CUB."

Douglas Fairbanks appeared Tuesday evening at the Globe in Thompson Buchanan's "The Cub." The play was written as a vehicle for the Fairbanks personality and in that sense is a success.

As in "A Gentleman From Mississippi," the star is programmed as a reporter, Steve Oldham. He has been sent into the Kentucky mountains to get the story of a long standing feud for a Louisville newspaper. Steve gets into the good graces of one of the factions, the Whites, then proceeds to cast sheep's eyes at Alice Bentley of the Whites' enemies, the Renlows.

During the rest of the play Steve bounces about among the two factions, in constant expectation of being shot by one side or the other. This basic "nation" is turned in every imaginable way through the course of a gathering at a county court house, a truce dance attended by both factions, and a scene in a cabin of the Renlows in which Steve is held prisoner. Steve makes a joke of everything in the typical Fairbanks style, keeping the audience laughing constantly.

Mr. Fairbanks' aggressive personality carries the piece. Judged by ordinary traffic of playwrighting the play is unexceptional, leading nowhere, sometimes a farce, usually melodrama burlesqued. The presence of Mr. Fairbanks changes accepted ideas of dramatic progression. The audience was there to see in full play the "fresh" type perfected by Mr. Fairbanks. The performance was identical with that presented by him in "As Ye Sow," "The Man of the Hour" and "A Gentleman From Mississippi." There was simply a change of scene. The play might frankly have been named "Douglas Fairbanks in Kentucky," after the fashion of the Rogers brothers' farces and the Rollo books.

The latter part of the play appears to have been hastily rewritten and still more hastily rehearsed. The entertainment is brought to an end by the dropping of the final curtain, not by any conclusion reached in the action. Acting and play are bustling, noisy, happy-go-lucky.

## BOSTON SYMPHONY ORCHESTRA

## News of the Navy

### Today's Naval Orders.

The following naval orders were posted today:

Rear Admiral C. S. Fox, commissioned a rear admiral in the navy from Sept. 16, 1910.

Commodore W. H. Beehler, retired, detached duty as commandant of the seventh naval district and naval station, Key West, Fla., to home.

Capt. H. P. Norton, commissioned a captain in the navy from Sept. 16, 1910.

Capt. E. E. Hayden, detached duty naval observatory, Washington, D. C., to duty as commandant of the seventh naval district and naval station at Key West, Fla.

Commander G. H. Stafford, retired, detached duty in charge naval coal depot, Tiburon, Cal., to home.

Commander W. W. Phelps, commissioned a commander in the navy from Sept. 16, 1910.

Lieutenant Commander H. C. Dinger, detached duty bureau of steam engineering, navy department, Washington, D. C., to duty connection fitting sub destroyer drayton and duty in command when placed in commission.

Lieut. A. K. Atkins, commissioned a lieutenant in the navy from June 8, 1910.

Lieut. L. Sahm, detached duty the moored cruiser North Carolina, to home and wait orders.

Ensign E. G. Allen, detached duty the Iowa to duty the battleship Minnesota.

Midshipman M. S. Brown, to duty the battleship Connecticut.

Paymaster H. de F. Mel, detached duty the cruiser Charleston, to home, settle accounts and wait orders.

Chaplain W. H. L. Reamey, detached duty the battleship Mississippi, to duty navy yard, Philadelphia, Pa.

### Movements of Ships.

The Tarantula has arrived at Annapolis.

The Viper has departed from Norfolk for Annapolis.

The Wolverine has arrived at Buffalo.

The Lebanon has arrived at Portsmouth, N. H.

The Iowa and the Vestal have arrived at Tompkinsville.

The Yorktown has arrived at Buenaventura, Colombia.

The Glacier has arrived at Chimbote, Peru.

The New York, the Albany, the New Orleans, the Bainbridge, the Barry, the Chauncey and the Dale have arrived at Hong Kong.

### WOMEN'S CLUBS TO MEET.

ST. PETER, Minn.—The sixteenth annual meeting of the Minnesota Federation of Women's Clubs will be held here Sept. 27, 28 and 29. Gov. A. O. Eberhart, Mrs. Caroline Bartlett Crane of Kalamazoo, Mich., and Mrs. Fannie French Morse, formerly of Boston, now superintendent of the girls' training school at Red Wing, Minn., will be three of the speakers.

AND GROCERS EVERYWHERE.

## NEWS OF THE REALTY MARKET

An important South End transaction just consummated involves the 3½-story brick dwelling and 1320 square feet of land at 230 Tremont street, near Eliot, the valuation of which is \$42,300. The land's share of this amount is \$38,300. Marion I. H. Stow, for herself and as executrix, conveys to James L. Hayden, who contemplates improvement. The sale was negotiated through the office of John B. Thomas.

The Caleb Chase estate has conveyed to Maxine J. Hardy title to the property at 254 West Newton street, between Huntington avenue and St. Botolph street, Back Bay. It comprises a three-story well-front brick house, occupying 1932 square feet of land, taxed for \$5300, and \$13,500 is the total assessment. The consideration paid was greatly in excess of the latter sum. The property adjoins the estate of the purchaser.

An important lease of a Commercial street property has just been made through the office of Guy D. Tobey of the Eastern building whereby the entire brick building numbered 601 on that thoroughfare, belonging to the New York, New Haven & Hartford Railroad Company, will be occupied for a long term of years by the Mills Transfer Company, which concern will make extensive alterations and use the quarters for a garage for its numerous motor trucks used in its business.

The purchasers of one of the block of new American basement residences erected on Bay State road by J. Sumner Draper and Mark Temple Dowling reported sold in these columns on Sept. 10 are Dr. Walter D. Swift et al. The house purchased by Dr. Swift is numbered 110 Bay State road and the price paid was \$25,000. A. Dudley Dowd, Devonshire building, was the broker.

Frances C. Pope has sold the estate at 65 Gardner street, corner of Chester street, Brighton, to M. Fannie Quincy, who will occupy. It has a large frontage on both streets, the land area being 5350 square feet, taxed for \$4000, with a total rating of \$9000. The consideration was in excess of the taxed value.

Ralph B. Williams and Moses Williams, trustees, have sold to Robert T. Fowler, a lot containing about 5254 square feet, situate on Brewster road.

## SAYS COMMISSION HAS CHECK RIGHT

WORCESTER, Mass.—Chief of Police Matthews has received notice from the Massachusetts civil service commission that in the future promotions in the local police department must be satisfactory to the commission before they can go into effect. It now appears that promotions in the police department for years past may have been in opposition to civil service rules and that in the future the civil service commissioners will have to be consulted previous to any promotion in the department.

The commission contend that they should have been notified of the recent promotion to a captaincy of Lieut. George H. Hill, and that no promotion should have taken place until the local authorities were satisfied such promotion was satisfactory to the commissioners.

## HILL LAND GIVES BIG WHEAT CROP

CHESTER, Que.—That wheat can be grown successfully on some of the hill farms in this locality, is proven by the experience of Michael Tefts of Middlefield, who has just harvested 40 bushels of hard white wheat, grown upon two acres of land. Mr. Tefts will plant 10 acres this fall.

## SUPERIOR FLOORING

MADE BY  
George W. Gale Lumber Co.  
Telephone 40  
Cambridge, Mass.  
Everything from Sills to Shingles.

near Center street, West Roxbury, upon which Mr. Fowler intends to erect a handsome two-family residence, which he intends to offer for sale when completed. Joseph Balch, Exchange building, was the broker.

Henderson & Ross, Kimball building, report final papers passed in the sale for Arthur H. Douse of the three-apartment frame dwelling at 38 Fox street, Meeting House Hill district of Dorchester, with a lot containing 3040 square feet and having a total taxed value of \$9000. The house being new is not yet taxed. Ellen Kelly buys for investment.

FLOYD & TUCKER, Winthrop brokers, report the sale of a house and 6352 square feet of land on Read street near the Ingalls station, belonging to the heirs of Mrs. Jennie Shannon. William J. Monarch, the purchaser, will improve and occupy the premises.

## LARGE HOLYOKE SALE.

The American Writing Paper Company has sold the large Hamilton hotel block in Holyoke, in which its department offices are located, and also the Parsons hall building on the opposite side of the street. The buyer was

Henry L. Russell of J. Russell & Co., tenants of a portion of the premises. The purchase represents about \$300,000, and is understood to be for investment. This is the largest sale of business property that has been closed in Holyoke in several years.

## BUILDING NOTICES.

Permits to construct, alter or repair buildings were posted in the office of the building commissioner of the city of Boston today as printed below. Location, owner, architect and nature of work are named in the order here given:

Walnut pk. 50; Walnut road, 15; Simon Hurwitz, T. M. James; brick tenements.  
Maple pl. 2; Annie F. Hudson; wood garage.  
Dudley ave. 38; George Dame; wood dwelling.  
Leyden st. 183; Maria G. Bianco; alter dwelling.  
Everett st. 133; Alessaro Dente, M. M. Kallman; alter dwelling.

# FASHIONS AND COSTUMES OF HOUSEMAIDS FOR AN ARTIST

Certain details which must be observed in order to have them conform to recognized standards.

EVERYBODY knows that whether there be one maid in a household, or two or 10, their correct costume is a detail of no small importance. From the housewife who does her own work to the mistress of many servants the problem of what to wear while performing the different offices of the day has been the subject of careful consideration. Good sense and fashion have evolved certain rules that have come to be known as standard. From these are deviations that relieve monotony or give the stamp of individuality.

Two essentials for such costumes are that they shall wash and that they shall be plain. One pattern of frock is used by all the maids of the house, the difference being only in color and material. It has a plain, short skirt with a deep hem escaping the floor by about three inches. The shirtwaist has tucked a half inch or so in, four or five on each side-front and three in the back. Narrow cuffs are sewed to the sleeve and button, for

the silver or washing the breakfast china, this is covered with a larger apron of percale, having a colored stripe or figure.

About 1 o'clock this costume is changed for a frock of black mohair or other black goods of dull finish. The skirt to this may be somewhat longer than that worn in the forenoon. The turn-over collar is finished in front with a small black bow tie. The apron may be large, like the one in the cut, which is the princess, just brought out, or the small French apron. In summer, thin, non-transparent black goods are substituted for the mohair, or black is done away with entirely and a soft silver gray or pure white is worn. In some households black is not used at all, gray or white being worn the whole year through.

While this is the accepted form, there is occasionally the mistress of a household who wishes a touch peculiar to her-

(Courtesy S. E. Pettie.)

MORNING DRESS, SHOWING NEW ENGLAND DOT FOR PARLOR MAID.

self. Sometimes it is caps, sometimes it is color, sometimes it is cut or a decoration. One, for instance, has a deep white band applied to all black skirts and another had her maids dressed in wine color.

A little more latitude is permitted the cook. Frequently she wears all white, or percales with a delicate figure or stripe, but often she chooses gingham, seersuckers or chambrays. She, too, must wear the straight, stiff collar and long sleeves, as the short sleeves and low neck would not do at all when she appears before her mistress to receive orders. Kindliness and good sense give promise of coming to her assistance shortly by permitting her the comfort of the low, loose neck and short sleeves which the nature of her work make all but necessary.

When performing other work about the kitchen, such as washing dishes, cleaning the vegetables, the cook and her helpers wear big dark aprons like loose-fitting frocks over their light ones.

Unless there is a rule in the house for white or some special color, the nursemaid wears a plain light blue or pink. Pink is growing in favor, as it is bright and the children like it. The apron is made of sheeting. It has a plain, full skirt, to which is attached a plain bib with straps over the shoulders. This costume is worn without variation all the

(Courtesy S. E. Pettie.)

AFTERNOON COSTUME FOR PARLOR MAID.

never, not even in the afternoon, must a housemaid wear jewelry. Over the frock comes the apron. The hair under all circumstances must be worn plain.

In the morning the second or parlor maids wear percales of white ground with hair-line stripe or small New England dot of black. The collar is clerical, plain and straight, fastening in the back. There is no tie and no pin. A large plain white apron of thin material is worn over this. It may be a full straight apron with deep hemstitched hem and full ties, as shown in the illustration, or it may have a bib and be fitted somewhat to the figure. When cleaning

## APPAREL OF PAST

FEMALE costume in the tenth century was classical in its simplicity, says the Westminster Gazette. The women wore long, loose, flowing skirts reaching to the feet and a draped "cote," or upper garment. Chaucer frequently uses the word cote. In the "Canterbury Tales" he depicts the sergeant-at-law as wearing a "medley cote," which no doubt means a coat of many colors, while the miller he describes as wearing a "whyte cote."

It was in the fourteenth century that the word "gown" first came into use. An anonymous author finds fault with the fashion of his days. He writes that the commons were attired "in wide surcoats reaching to their loynes, some in a garment reaching to their heels, close before and strutting out on the side, so that on the back they make men seem women, and these they call by a ridiculous name—gown."

As early as the twelfth century women's cotes were made with trains, and in the first quarter of the thirteenth century a bishop moralizes early on their vanity for wearing trained cotes, some of which contained "seven ells and a half."

## Mannish Materials

Mannish materials are again making a strenuous effort for recognition, and no doubt will be a good deal in evidence by the time heavy suits are required. In these we have seen many black and white mixtures, says a Chicago Record-Herald correspondent. Coats accompanying such suits are short and jaunty.

A modish model is made of gray and white homespun, with five bias bands finishing the lower part of the skirt. The bands are barely wide enough to allow the wearer to take a natural step, and hold the fulness of the skirt in to a noticeable degree. The little coat has a peplum and pointed lapels embroidered in the same design as the belt and cuffs. Many of the lapels on new jackets are so broad that they cover nearly the entire front of the garments, and are elaborately embroidered or braided.

## Chantecler Hatpins

In the new hatpins there are roosters, pheasants, owl heads galore, from cheap ones of small size in imitation enamel or silver to huge affairs in rhinestones with combs and feet of colored jewels.

Some of these rhinestone pins are three inches long from comb to claws. Usually they present a side view when in the hat, occasionally they are set to look as if just stepping forth for a morning crowd, showing both sides of the body studded.

A smart owl pin has the head worked out in blue enamel in a rim of darker blue enamel lined with gold.

Huge colored enamel hat pins have superseded rhinestone ones for the moment, though the former when of good quality are always in style. A good-looking one has a large heart worked out in various tones of red enamel delicately lined with gold.

## Novel Trimming

A beautiful suit of rose-colored broadcloth, in a cutaway style, has a very novel trimming down the front and on the cuffs. It is a silky, curlyeue sort of stuff that looks for all the world like broadtail, dyed rose.

## Traveling Coats

Some of the traveling coats with hoods are so made that the hood can be removed when desired.

It is held in place on the coat by closely set hooks and eyes that are hidden by the turnover collar of the coat.

## Pleasing Effect

A crisp, neat look attaches to white embroidered linen or pique collar and cuffs laid against the dark velvet ones of a cloth suit. These are being used on fall suits of the expensive kind.

## Finish to Neck

A band of insertion or embroidery or a stitched band of the material of the dress is a neat finish to the square collarless neck of the wash dress, whether of gingham, chambray or linen.

Don't Rub Clothes to Pieces

You know how it is when you rub clothes—you shorten the life of the fabric. The problem is, how to get the clothes clean and white without injuring them by rubbing.

There is a way. Women who know use the

# Parowax

brand of Pure Refined Paraffine.

You simply put one-half teaspoon of shaved Parowax and the usual quantity of shaved soap in the hot water in the boiler. This is sufficient for one boiler of wash. After taking the clothes from the boiler, rinse thoroughly in warm water. You have not had to rub the clothes nearly so hard as when using soap alone, yet they come out white and clean as when new.

To protect the user, the trade-mark "Parowax" has been given to the grade of Pure Refined Paraffine sold by this Company for years. This absolutely pure paraffine has been used all these years for sealing jellies, etc., and for washing and ironing.

Dealers everywhere sell the genuine Parowax brand of Pure Refined Paraffine. Beware of articles offered as substitutes. Look for the name of the

## Standard Oil Company

(Incorporated)

## New Pillow Idea

A new touch to pillows made from barred tea toweling or crash is to stitch to them a border of linen to match the line in the bar design, says the Indianapolis Star.

This border is put on the outer edge, is two inches wide, set in from the edge its own width or it can form a circle or diamond in the center of the cushion. Several narrow bands of color crossing at the corners give a good effect, or quite narrow bands may be applied to form a scroll.

When the border is set in from the edge it is finished in white or colored cord or white cotton fringe.

For raffia workers there are to be found in the shops square pillow tops to be made up in colored raffia patterns.

One end of the pillow is begun to show the stitch and the shading.

## Bodice Drapery

Fleche effects that are tucked into high belts are one of the favorite bodice draperies. Quite often one sees three deep folds cross the shoulders and either end in the wide back panel just above the waist line or under the princess skirt top. The princess skirt is in evidence in daytime as well as evening toilettes, although not one of the pronounced details of the fashions.

## Even Gathers

If the stitch of the machine is lengthened and a loose tension used a row of stitching can be run where the gathering is desired and the thread pulled until the goods has the desired fullness. The result is nice, even gathers. This is especially fine in shirring or where two gathering threads close together are needed, as in the top of a sleeve.

THE artistic dining room is one of the features of a pretty home, and it is easy for the housewife to make the room the prettiest. To do so does not require the expenditure of a large amount of money. Its location should be chosen according to the facilities for lighting and for its proximity to the kitchen. There should be several windows on two sides if possible, or two large windows on one side. To take away the dark look from a room with an eastern exposure has been the desire of many a housekeeper, especially where the room is a dining room. In cities many of these require artificial lighting during the entire day. But the effect of sunlight can be given in a room by the proper wall papers and furnishings. Warm yellow two-toned papers should be selected for the walls, and a white ceiling should finish the room. The woodwork should be painted a very light color, white being the best, and colored shades should be placed at the windows. If there are outer curtains they should be of a thin yellow material.

Stencil work is often used for the walls in dining rooms, and gives a very good effect, especially when the work is done in a two third division of the wall, producing dado effects.

The furnishing of a dining room is left very much to the ideas of the housewife. Dark furniture at the present time has quite a hold and being much used. The furniture comes in the same pieces and also in the small sizes, so that a housewife need have no trouble in making selections. Large pieces should never be placed in a small dining room, as they give the effect of crowding, and give the room the appearance of having no space. Where there is a large room the massive tables and chairs can be used to advantage, but in a small room small chairs and tables give the best results, says the Philadelphia Times.

The sideboard and china closet selections should not be of the same wood from which the tables and chairs are made, yet they should harmonize.

## Choice of Pictures Calls for Judgment

THE pictures that hang on the walls of our rooms speak eloquently of us. They are silent factors in the molding of that part of our characters that is intangible, but necessary to happiness—the esthetic side.

Without absolute confidence in one's own taste and knowledge, the safest and broadest field is in the copies of the world's art treasures, says a magazine. Further and further study awakens appreciation of one great master after another until our walls show the best examples of the art.

For a lover of the Florentine school the picture faces of the Botticelli Madonnas, both in the National Gallery and in the Louvre, never lose their fascination. In the same rooms in the Louvre, with the almost too popular Mona Lisa of Leonardo da Vinci, is another by the same artist, his St. Anne, full of his own peculiar fascination and charm.

Besides the masterpieces in which the human element is treated, there are the restful landscapes that should be framed and hung to give the impression of an open window, beckoning the looker into the meadows and woods beyond.

## BEDTIME HOUR

IT is a mooted question whether guest or hostess should make the first move for retiring at night. When staying in a house for the first time this is one of the most difficult points for guest to decide, and it takes a great deal of tact and discernment to arrive at a correct conclusion.

On the basis that a hostess orders the hour and the guest conforms there is no doubt that the person whose home it is should make the first move. One who is staying in the house the first time cannot be expected to know habits and rules of the place, including the hour for retiring, on which greatly depends that retiring.

In the summer house at country or seashore the chances are, if the host goes to town for business every day, that the whole household is early. The hostess is certainly, as a rule, if her husband is a business man. In that case it is most essential that they go to bed early. Ideal as this conclusion may seem, a guest is inclined to propose going too early to her room lest she should seem to be bored during the evening, and thus it is when both would like to turn in at a reasonable hour and others are kept up by an attempt to polite.

## Gray Sharkskin Cheviot

A smart suit seen at one of the best shops Chestnut street, says the Philadelphia Times, was made of gray sharkskin cheviot—a peculiar weave of gray and white wool that is new rather attractive. The coat was short and a close fitting. It had the conventional notched collar and save for its exceptionally good tailoring there was nothing about it that would attract attention, although its lining of brilliant cockscomb-scarlet satin emphasized the fact that the self-colored lining is fast losing its vogue. Almost all coats at present are lined with or satin of another color, and the contrast between the two is made as marked as possible.

## Handkerchief Case

A novel handkerchief case consists of squares a little larger than a folded handkerchief of cardboard, padded and covered with certain inside with silk, with a buttonhole edge, a band of gilt galloon. The handkerchiefs between these, and the case is held together by a circle of silk rubber with a lace edging.

This case is very convenient for traveling. It holds a number of handkerchiefs and does not take up the space of the ordinary handkerchief case.

# THE HOUSEHOLD

## C DINING ROOM VOILE AND SILK ON DOMESTIC ECONOMY

all-paper and furniture.

Smart combination of thin and heavier materials for gown.

A Wednesday series of three articles.

### III.—WHAT DOMESTIC ECONOMY MEANS.

with the other pieces of furniture. Here again the dark wood is the most appropriate at the present time. Many of the new china closets have the circular doors and give plenty of space for the hanging of cups. Round tables give a much better effect in a small dining room than the square ones.

To keep the china closet in order is no easy task, especially when there are many pieces of Dresden or Lowestoft ware. Once a month every bit of china should receive a special cleaning, even though it may not have been in use. No china closet is absolutely impervious to dust. For plain pieces all that is necessary is to wipe them with a soft cloth that will leave no trace of lint. But openwork pieces must be carefully washed in hot suds with a soft brush which will penetrate every tiny crevice. If ornaments with Dresden flowers in relief need washing, a fine spray will do the work best. A brush is not to be recommended for such pieces. Even the rarest china for table use is washed in hot water and soda. To avoid dimming gold decorations, china should always be washed in lukewarm water and mild soda and rinsed afterwards in clear water of a warmer temperature.

The plate rack can be made one of the most artistic features of the dining room. This rack is usually placed high over the head and but a few feet from the ceiling. Artistic plates, hand painted and otherwise decorated, can be placed on the rack, mingled one with the other, until they make a very pretty decoration. There is no rule about placing the small plates on one side of the room and the large ones on the other, as they can be mixed here and there. These plates should be taken down and given a thorough washing every few days, as they gather dust rapidly.

Careful selections should be made of the pictures, and some housewives adhere to the rule of no pictures at all in the dining room. At least they should be small. Pictures of game are probably the best for the purpose, while other small scenes can be placed about the walls to an advantage.

### Simple Rules for Cooking Vegetables

PUT where they may be quickly referred to, the following rules for cooking and serving vegetables will be found very handy by the housewife:

Asparagus—Wash, tie in bundles and boil for 15 or 20 minutes. Serve plain with seasoning or on toast with white sauce.

Lima beans—Shell and place in cold water. Boil 45 to 60 minutes. Serve plain with cream or butter and seasoning.

String beans—String and cut them. Boil 45 to 60 minutes. Serve plain with seasoning, or with white sauce.

Beets—Wash and cut off tops. Boil from one to four hours. Peel and slice them, then season and pour melted butter over them.

Cabbage—Cut out the stalk and separate the leaves. Boil from 10 to 20 minutes. Serve with vinegar and seasoning or with white sauce.

Carrots—Scrape and place in cold water. Boil from 20 to 45 minutes. Cut them into dice and serve with white sauce.

Cauliflower—Trim off the leaves and soak in vinegar water. Boil from 30 to 40 minutes. Serve with meat gravy or with white sauce.

Celery—Scrape and cut it into thin pieces. Boil from 20 to 30 minutes. Serve with white sauce.

Corn—Remove the husks and silks. Boil from 6 to 10 minutes. Serve on the cob or cut off and serve with butter, salt, pepper and milk.

Onions—Peel under water. Boil from 30 to 60 minutes. Serve with butter, salt, pepper and cream.

Parsnips—Scrape, wash and split them. Boil from 1 to 1½ hours. Serve with butter, salt and pepper.

Peas—Wash and shell. Boil from 20 to 40 minutes. Serve with pepper and salt and butter or cream.

Spinach—Wash thoroughly. Heat slowly with-out water. Boil 10 minutes. Press in colander, add seasoning and garnish with hard-boiled egg. If cooked with salt pork or bacon allow one cup of water to one peck of spinach.

Summer squash—Peel, slice and remove seeds. Boil for 30 minutes in a very little water. Mash and season.

Winter squash—Remove seeds. Bake from 30 to 60 minutes. Remove from shell, mash and season.

Tomatoes—Dip in boiling water and remove skins. Cut into fourths. Cook 15 to 20 minutes without water. Season with pepper, salt and sugar.

Turnips—Pare and slice. Allow one tablespoon of sugar to one quart of water. Boil 45 minutes to one hour. Mash and season with butter, pepper and salt.

### Training of Children

A horticulturist thinks the training of children should be in many respects like the training of plants. He says:

Do not be cross with the child; you cannot afford it. If you are cultivating a plant, developing it into something finer and nobler, you must love it, not hate it; be gentle with it, not abusive; be firm, never harsh. I give the plants at which I am at work in a test, whether a single one or a hundred thousand, the best possible environment. So should it be with a child, if you want to develop it in right ways. Let the children have music, let them have pictures, let them have laughter, let them have a good time; not an idle time, but one full of cheerful occupation. Surround them with all the beautiful things you can. Plants should be given sun and air and the blue sky; give them to your boys and girls. I do not mean for a day or a month, but for all the years. We cannot treat a plant tenderly one day and harshly the next; they cannot stand it. Remember, that you are not training only for a day, but for all the future, for all posterity."—Woman's Journal.

COMBINATIONS of thin and heavier materials are to be much used this season, and here is a gown that is smart and combines voile with the moire silk that makes such a favorite of the present styles. The waist and skirt are separate, and the waist is made over a guimpe lining. In this case the guimpe is of lace, and the effect is a charming one, but the model can be varied almost indefinitely.

Any two harmonizing materials can be used in the way indicated. Satin is a favorite and could be made to take the place of the moire, or a Persian printed fabric could be used for the plain parts with the full portions made from almost any plain colored seasonable material of light weight.

Wool taffeta promises to be well liked this season, and would be pretty in combination with either moire silk or satin. Crepe de chine is always charming for the dressy gown and makes an effective contrast with any heavier silk. Later velvet will be much used, and crepe de chine with velvet would give an exceedingly handsome effect.

For the medium size the waist will require 2½ yards of material, 24 or 27, or 1¼ yards 44 inches wide with ¾ of a yard of silk. For the guimpe will be needed 3 yards 18 or 1¼ yards 44 inches wide. For the panel and circular band of the skirt will be required 2½ yards 24 or 27, or 1¼ yards 44 inches wide, and for the circular sides 2½ yards, 24 or 27, or 2 yards 44 inches wide.

A pattern of the waist, 6743, sizes 34 to 42 bust, or of the skirt, 6708, sizes 22 to 30 waist, can be had at any May Mantion agency or will be sent by mail. Address, 132 East Twenty-third street, New York, or Masonic Temple, Chicago.

### Novel Combinations.

The day for unusual combinations is still with us. The latest cry is for cotton eyelet embroidery with silk or wool. One of the handsomest gowns seen so far in which eyelet embroidery played a prominent part was of white chiffon cloth. The eyelet work was introduced in the guimpe and lower parts of the sleeves and was done in shades of buff. A band of the embroidery extended from the hem of the skirt to the belt, while across the front of the skirt was a slanting piece of the same needlework. The body part of the bodice was of the eyelet work and the same handings formed the sleeves. The low round neck was finished with a fitted piece of the work and the lower parts of the sleeves repeated the curves in the little shaped cuffs. The touch of color that gave the costume character was the deep girde of corn colored satin.

### For Kitchen Paint

Kitchen paints will soon acquire a shabby, dull look from the frequent cleaning that is always necessary. The use of soap only increases the difficulty, especially if the paints are varnished. The best plan is to boil one pound of bran in one gallon of water for one hour, then wash the paint with bran water, and it will not only be kept clean but bright and glossy.

### Place for Schoolbooks

Provide a place for your children's schoolbooks, and so prevent their being lost and laid about all over the house. In one household shelves were put up in an end part of the hall, each child having its own shelf. A curtain could be hung in front of the shelves to prevent the dust from entering.

ECONOMY in home management does not necessarily mean pinching and scrimping to save money. Saving time and energy is as important as the wise management of the household budget. The conservation of our national resources is an economy that is receiving national legislation. But there is a conservation in the home that only women can accomplish, without which this national legislation will be futile.

Back of the efforts of the state to save, to economize in the use of its resources, is the same motive that every individual homemaker exercises when a home is established. The one, that the nation may meet the needs of the American home, each individual home, no matter how humble, forming a part of the whole; the other, that the home will meet the needs of the family it represents.

The love that draws families into nations is the force that should impel the American homemaker to gain a larger understanding of domestic economy and to find in fulfilling that love of home, which alone will preserve the American family, that reward of service which is every woman's privilege to bestow upon her family and indirectly upon her country.

Unwillingness to serve is the crumbling stone in the foundation of our homes. Perhaps the reason is that women, in trying to throw off the shackles of housework as a wearisome, monotonous round of labor, have lost sight of their part in the making of the nation. That each individual in the family may contribute his or her share toward the establishment of the standards of civilization, is the purpose of a home.

The framers of our constitution and the founders of our national institutions expected the youth of our land to be fitted to preserve, or to enlarge, their gifts to this country. There is only one place where the American youth can be so fitted to reach the levels of these wise men, and that is in the home.

Women ought instinctively to know that a home is not merely a place to live in—a shelter, and that the love of home is so deep rooted in a child's heart that there is never a man who does not cherish tender memories of his early home. Could this affection, this love of association, find satisfactory expression, "the hold of the home" would be a far-reaching influence, a place of safety to those who are sometimes wrecked on life's shoals.

In the early days it was the race mother who sought the home, and who established home industries. It was out of these activities that grew the great industrial movements of the world as well as the development of the arts and all the crafts. But it was the man who took these industries out of the home because his ingenuity devised more rapid and easier accomplishment. This left the home organization and administration to the woman, from whom machinery has lifted the heaviest burdens of labor. Today invention still serves the home-maker, and thought and skill are ceaselessly employed to produce devices that will save the expenditure of time

and energy in the keeping of a house. Every activity in the world was instituted in response to some need of the race. The need of preserving the American home from which should come a sturdier, more purposeful people, gave rise to the introduction of domestic economy, which is the practice of a systematic, accurate, intelligent management of the home and family. It has delved into the arts and crafts and beyond for its working basis, and the woman who rejects it on the plea that it smacks only of housework should be classed with those whose prodigal waste made national conservation necessary.

Domestic economy aims: To lessen housework by mechanical device and convenient arrangement.

To conserve steps and energy by systematic organization and cooperation in the housework.

To save money by gaining knowledge of how to spend it.

To supply rational food to the family.

To understand the well-being of the family and of the house.

To make the home an expression of the mental, moral and spiritual culture of the family—arts and literature being requisite to supply the necessary material.

To make development of character the motive of the home.

To imbue and foster in each child the love of home so that this force will bear direct influence on the establishment and maintenance of that cradle of life—home—from which must come each and every one of our citizens.

To gain the maximum of satisfaction at the minimum of the expenditure of time, money and energy, is the law on which domestic economy is based, and it is this law which concerns the women of this country to whom it must look for its fulfillment.

## THE HOUSEKEEPER

Hints That May Help.

### GIRL'S PRINCESS SLIP.

The slip that is made princess style makes a favorite under garment for little girls. This one can be made with skirt of embroidery or of plain material, as liked, and will be found suitable to all lingerie fabrics. It is plain and simple and easily made. The deep flounce, or skirt, is straight and gathered, and consequently the garment is an easy one to launder. The neck can be finished in any preferred outline. This slip is made of batiste with flounce of embroidery.

The pattern 6781 is cut in sizes for girls of 6, 8, 10 and 12 years of age, and can be had at any May Mantion agency or will be sent by mail. Address 132 East Twenty-third street, New York, or Masonic Temple, Chicago.

STEWED DUCK AND GREEN PEAS. Have the duck cleaned and trussed. Put one level tablespoonful of butter into a pan, when it is smoking hot put in the duck and fry the breast first, then the back, legs, etc. This should be carefully done, and will take about 20 minutes. Add one breakfast-cupful stock, salt and pepper, and cook slowly—a young duck for about three quarters of an hour. Add as many green peas as are required 20 minutes before the duck is ready for dishing. Serve the duck with the peas and gravy.

PINEAPPLE LAYERS. Cover a can of grated pineapple with half a cupful of sugar and set in the ice box. At the end of an hour drain the juice from the pulp and put in separate vessels. Cover the bottom of a pudding dish with a layer of sponge cake and moisten this with a little of the pineapple juice. Spread with part of the pineapple pulp, put another layer of cake moistened with the juice and another of pineapple and proceed in this way until the dish is filled. Make a meringue of the whites of two eggs beaten light with a tablespoonful sugar. Spread this over the top and set in oven just long enough to brown. Serve with cream.

EGG SOUFFLE. Cream two tablespoons butter, add two of flour and pour on one cup scalded milk and one cup cream. Cook five minutes in double boiler and add yolks of four eggs that have been beaten stiff. Take from fire, add one teaspoon of salt and a few grains of cayenne. Fold in the whites of two eggs after beating them stiff. Pour into a buttered dish or custard cups, set in pan of hot water and bake in a slow oven until firm.

APPLE AND FIG JAM. Wipe the apples or wash them if necessary, take off the stems, cut in two, but do not pare or core them, and put them into an enameled saucepan with sufficient water to cover. Cook slowly until they are soft and pulpy, then pour into a jelly bag and allow to strain. Wash some figs well and cut into four pieces; put these into a saucepan with two cupfuls of cold water and simmer slowly until they are quite soft. Allow one pound of figs to every four pounds of the apple juice. When the figs are cold put them into a saucepan with the apple juice and sugar, in the proportion of one pound to a pint of juice. Boil the jam until it jellies, then divide into jars. If preferred, a little whole ginger may be added for flavoring.

## The Way of Hallanday

"PERFECTION IN CLEANSING"

Silks, Draperies, Satins, Blankets, Laces, Furs, Curtains, Etc.

¶All the above can be perfectly cleansed and returned to you in their original, fresh and almost new state.

¶The HALLANDAY method of cleansing has an excellent reputation amongst those who are fastidious about cleansing.

¶We handle materials of the daintiest fabrics with exceeding good care and return them to you odorless and in a refreshed and perfect condition.

¶You have only to call our office on the telephone or send us a note and we will send our representative, who will explain our methods and give prices.

¶We take exceptional care of each article that is sent to us and with our superior class of labor and our excellent process we are able to give you first class service.

¶Your goods are insured against fire while in our care.

A few doors above Forty-Second Street.

### Put in Your Day Profitably

DON'T lead an idle life. This does not mean necessarily that you must work for your living. Leave the earning of wages to those that need them. If you have money employ it to some advantage. If you have a moderate amount of money, but a lot of time, employ that time profitably.

And what is meant by profitably? Just this—that you can account for the hours and days by producing some tangible result—something you can show, something you can feel.

If you have spent your day helping others, well and good. If you have spent it learning a moral lesson for your own improvement, well and good also. If you have cultivated some talent, done away with some fault, opened up an opportunity to yourself or others, you have not wasted your time. If you have beautified your home during the day, this also is a credit to you. But if you have spent from your rising hour to your going to bed time dawdling from one occupation to another what good are you? You might as well be a vegetable.

### Bread for Puddings

When using stale bread for puddings always soak it in a cold liquid. Bread that has been soaked in cold milk or water is light and crumbly, whereas that soaked in hot liquors is heavy.

### You Need This FREE Book of Proofs

—because it demonstrates, conclusively, that you don't need electricity for thorough vacuum cleaning—that the **Automatic Vacuum Cleaner** is the only "Automatic" Vacuum Cleaner made—affording the full power of the large, expensive vacuum cleaners and at a price that brings it within the reach of every overworked housewife, reducing the work of housecleaning from hours to minutes.

**It Earns Its Cost Over and Over Again**—In the saving of wear and tear on carpets, furnishings and in the elimination of housecleaning drudgery. In speed, thoroughness of work, simplicity of construction—it is without a rival and while light, easily carried about, it will do all the work expected of the average electric machine.

**The Only Hand Power Cleaner That Blows**—It does not get out of order and will last a lifetime. It is the standard of efficiency today and still will be after 20 years of constant service and it runs so easily a child can operate it.

The 1911 Models of **Automatic Hand Power Vacuum Cleaner**

Now Ready—Guaranteed for 20 Years

Our exclusive double tank device separates 95% of the dust automatically, without the aid of screens, baffles or water. It contains no tin or cast iron; malleable iron, steel and brass being used exclusively in its construction.

**Try It 10 Days**—Don't try any vacuum cleaner until you have tried the "Automatic." Write us a postal today for our free book of proofs which shows many exclusive features not found in any other cleaner and we will give you the full particulars of our plan whereby you may try the **Automatic Vacuum Cleaner** in your own home for 10 days—if, after a trial, you are not satisfied that this is the best hand power Vacuum Cleaner you ever saw, you may return it to us and your trial will cost you nothing.

Can you afford to turn down such a proposition?

## OIL LOCOMOTIVES TO BE USED FIRST IN HOOSAC TUNNEL

It is stated that the advance plans for carrying out President Mellen's order for the electrification of the Hoosac tunnel, on the Fitchburg division of the Boston & Maine railroad, probably will be out this week.

The work will be done under the direction of Vice-President E. H. Henry of the New Haven road, who was in charge of the recent extensive electrification of lines on the New Haven system. The dispatch with which these big jobs were completed added to the laurels of Mr. Henry, who is a graduate of the Northern Pacific, Mr. Mellen's old road.

Plans and estimates for the work were secured some time ago, but the cost of the proposed improvement was so great as to be regarded as prohibitive by President Tuttle and his associates. The fact that the work is to proceed forthwith is regarded by railroad men as indicative of a very different policy in the upkeep improvement of the Boston & Maine property.

Not more than two months ago the Boston & Maine management placed an order for four Mallet oil burning engines, for use in the Hoosac tunnel. While oil burning machines discharge some gaseous vapors, they do so infinitely better in this regard than any coal-burning locomotive, no matter how carefully the fireman may prepare his fires.

The Mallet engines will be used in the tunnel until the electrification work is completed. The job will be fraught with unusual difficulties because the bore through the mountain is a hard place for men to work in, despite the electric ventilator fans which are kept in motion constantly.

## CABLE SUBSIDY TO PRESS VOTED BY AUSTRALIANS

MELBOURNE.—The commonwealth House of Representatives has granted a subsidy to the Independent Press Cable Association of Australia of £2500 for the first year, £2000 the second year, and £1500 the third.

Under the terms of the subsidy at least 6000 words are to be cabled each week from Europe or America, and Australian newspapers are entitled to become subscribers to the service at rates varying from £1000 to £3000. The association must also transmit to Australia any information supplied to its agents in London by the Australian high commissioner.

## JUNIOR MECHANICS MEET.

LYNN.—Delegates representing councils of the Junior Order of American Mechanics from all sections of Massachusetts attended the annual session of the state council in the lodge room of William A. McKinley council in Central square, Tuesday and elected officers.

## TUFTS' NEW YEAR WILL OPEN JACKSON COLLEGE FOR WOMEN

Special Institution Is Expected to Win Record Enrolment on Opening Day, Thursday; Effect on Men of Cessation of Coeducation System Is Awaited.

Tufts College will reopen Thursday, when the students will assemble for registration, the men at Ballou hall and the women at Miner hall, the headquarters of Jackson College.

The opening of the college year at Tufts will be marked by a number of important changes, of which the most important is the transfer of the women students to Jackson College. This was a change which had long been advocated by President Hamilton and was secured in April, when the trustees voted in favor of it. A record enrolment is expected.

The staff of instructors for Jackson will be the same as for Tufts, the dean, Mrs. Caroline S. Davies, being the only one who is to work solely in Jackson.

Many faculty additions have been made. Dr. Hineck Gilbert Mitchell became professor of Hebrew and Old Testament exegesis, Dr. Alexander Colin Scott to occupy the recently established chair of education and Dr. Richard Jones has been chosen professor of English. Charles Hall Leonard, dean of the Crane Theological School for the past 18 years, has been retired at his own request and his place as professor of homiletics and pastoral care will be filled by the Rev. Henry I. Cushman, who resigns from the pastorate of the First Universalist church of Providence. Philip M. Hayden, secretary of the college, has been promoted to a professorship and will conduct most of the French classes.

An important change has been made in the daily routine by setting the first

G. M. WINSLOW, Ph. D., Principal.

## THE STOKEL SCHOOL OF DANCING

177 Huntington Avenue.

Pupils may now register for class or private instruction in social and fancy dancing. For particulars telephone 3634-B Back Bay.

## LABOR SCARCITY IN WEST CANADA

MONTREAL.—During his recent visit to Vancouver President Hays, of the Grand Trunk Pacific, expressed disappointment at the slow progress being made by the line, which he attributed entirely to the inability of the contractors to secure a sufficient number of laborers. While Mr. Hays declined to discuss yellow labor, he pointed out that the conditions on the Pacific slope were such as to retard progress by keeping out men who were needed to do the work of the railroads.

"That question rests with the people of British Columbia. The people of this province know whether they want Asiatics employed on railroad construction or not," he said.

## POSSIBLE UNIVERSITY HEAD.

MINNEAPOLIS.—Dr. Edwin Boone Graighard, president of Tulane University, New Orleans, is one of the possibilities for the vacancy at the head of the University of Minnesota when Dr. Cyrus Northrop ends his duties there at the close of this year.

## SUPREME COUNCIL OF MASONS FILLS DEGREE VACANCY

DETROIT.—The supreme council of thirty-third degree, northern jurisdiction of the United States, Ancient and Accepted Scottish Rite Masons, now in conclave here, Tuesday night, elected Charles C. Mumford of Providence, R. I., to active membership to succeed the late George H. Kenyon of Providence. Thomas Kite of Cincinnati, Charles M. Girdenier of Bridgeport, Conn., and Leroy A. Goddard of Chicago were also elected active members to fill vacancies in their respective states.

## MIDDLE WESTERN CENSUS FIGURES

WASHINGTON.—The census bureau announces the following results of the 1910 enumeration:

Canton, O., 60,217; increase 19,550, or 63.7 per cent; Cambridge, O., 11,327; increase 3086; LaCrosse, Wis., 30,417; increase 1522, or 5.3 per cent; Little Rock, Ark., 45,941; increase 7634, or 19.9 per cent; Siloam Springs, Ark., 2405; Filer, Idaho, 214; Valley Junction, Iowa, 2573; Bloomfield, Iowa, 2441; Fremont, Mich., 2009; Larksville, Pa., 9288; Cotulla, Tex., 1880.

## BEVERIDGE INDIANA ISSUE.

INDIANAPOLIS.—The Republican organization has decided to play up Senator Albert J. Beveridge as a paramount issue. This challenge has been accepted promptly by the regulars and every anti-Beveridge man in Indiana.

## JAPANESE VISITS WORLD RAILWAYS

NEW YORK.—After two years passed on the continent in the study of railroad administration and operation, S. Nakagawa, a secretary of the imperial railroad system in Japan, has arrived here and will depart for Tokyo on Oct. 4 from San Francisco.

"The Japanese government controls 5000 miles of railway lines," Mr. Nakagawa said, "and 1600 miles of railroad are operated by private companies. The government aims to control the entire steam railroad system of Japan and to increase its magnitude and efficiency."

## WESTERN RATE CONFERENCE.

DES MOINES, Ia.—The state railway commission will be represented at a conference of the shippers called by Governor Stubbs of Kansas in Topeka, Sept. 22, to discuss the contemplated raise in rates by railroad.

# Stocks Take Upward Turn, Closing Strong

## A GOOD ADVANCE MADE BY STOCKS IN LATE TRADING

Securities Dull in Forenoon  
Become Active in Afternoon and Some Good Gains Are Recorded.

## BOSTON IS STEADY

More attention is being paid to the steel industry by stock market traders than has been the case in many months. The principal topic of discussion on the street is whether or not there is to be a drastic cut in the prices of steel products. Chairman Gary of the United States Steel Corporation, denied that a wide open cut would be made this week as reported. But this denial did not have a very stimulating effect upon stocks. The opinion largely prevails that eventually the prices of steel products will be lower than they are now notwithstanding the reductions that have been made in almost everything except steel rails. It was thought by some that until there has been something definite done or until the steel market itself becomes more settled stocks will continue to mark time.

The New York market opened around last night's closing prices and during the early trading displayed a moderate amount of strength. Trading was quiet and except for a little activity in the Interborough issues and Steel common there was no feature to the market.

The Boston market was firmer than yesterday. Shoe Machinery was strong during the early transactions.

The bears attempted to make a drive at the market during the early forenoon and partially succeeded. However, on the lower level business became very quiet. Amalgamated Copper opened off 1/4 at 62 1/2, improved to 63, reacted to 62 1/2, and then advanced fractionally. Steel opened up 1/4 at 67, reacted to 66 1/2, and then advanced fractionally above 67.

Beet Sugar was moderately active. After opening unchanged at 37 1/2 it advanced nearly a point. Mackay Companies opened up a point at 90 and rose 2 points more during the first half of the session. Chesapeake & Ohio opened up 1/4 at 75 1/2 and reacted to around last night's closing price. Interborough Metropolitan preferred opened off 1/4 at 55 1/2 and sagged off a good fraction further.

United Shoe Machinery on the local exchange was in good demand. It opened up 1/4 at 52 and advanced to 55 before midday. North Butte opened up 1/4 at 27, advanced to 27 1/2, and then dropped back to 27. Butte & Balaklava was up 1/4 at the opening at 6 1/2 and receded fractionally.

A feature of the afternoon trading in New York was the advance in Western Union securities due to the announcement that a part of the accumulated dividends would be paid. The ascending stock opened up 1/4 at 60 1/2 and sold well above 62, while the preferred sold at 125, a rise of 5 points. The rest of the market took a spurt and good gains were established. Great Northern preferred went from 123 1/2 to 126. Beet Sugar, Atchison, Northern Pacific and Minneapolis & St. Paul were strong features. The local market was fairly steady.

LONDON—Irregularity was the feature of the late afternoon stock markets. Rubber and mining shares suffered a break on rumors that an outside speculator was in difficulties. Home rails resisted this adverse influence.

Americans were narrow but had a harder tone on the curb. The pressure on Grand Trunks continued unrelieved. In the department for foreign securities there was good buying of Russian bonds.

Continental bourses were irregular.

## THROUGH RATES MUST CONTINUE

WASHINGTON—An order covering nearly 50 applications made by tap-line railroads in which they ask that the larger railroads be prevented from canceling through rates over the tap lines was issued by the interstate commerce commission today. The order provides that existing through rates shall be retained in force until Jan. 5, 1911.

## Weather Predictions

UNITED STATES WEATHER BUREAU  
PREDICTION FOR BOSTON AND VICINITY: Fair Wednesday and Thursday; light northwest wind.

WASHINGTON—The U. S. weather bureau predicts weather today as follows for New England: Fair; cooler tonight and Thursday; light frost tonight in Vermont.

## DISBURSEMENTS FOR OCTOBER IN BOSTON ON NEW HIGH LEVEL

Interest and Dividends Payments Over \$28,000,000, the Highest Ever Reached for That Month.

## COPPER DIVIDENDS

The dividend, interest and principal disbursements payable in Boston for October are estimated by the Boston News Bureau at \$28,026,751, a new high record for that month, compared with \$10,036,278 this month and \$27,639,000 in October last year.

The payments to be made in October are always large locally, owing in part to the fact that the 23 Boston national banks make semi-annual and quarterly dividend payments on Oct. 1, while the semi-annual interest on a large amount of national, state and city bonds falls due for payment next month.

The copper companies paying dividends next month, with rate compared with a year ago, follow:

	Shares.	1909.	1910.
Anaconda	1,200,000	\$2.50	\$3.00
Ch. Consol.	384,355	1.00	1.00
North Butte	30,000	30	112,000
Old Dom. of Me	233,245	50	146,623
St. A. Consol.	350,000	1.00	250,000
U. S. Sm. pf.	480,044	87 1/2	142,250
Wolverine	331,011	50	175,500
Total	6,000,000	5.00	\$2,004,751

\*Anticipated.

The city of Boston and the commonwealth pay \$397,189 and \$211,080, respectively, in interest and principal on their bonds on Oct. 1 compared with \$561,872 and \$181,050 last year. In the current month the city had no interest payment falling due, while the state paid \$316,364 in interest and \$12,000 in principal.

The American Telephone & Telegraph Company makes the largest distribution next month, disbursing \$5,107,188 as a quarterly dividend of \$2 a share on 2,595,594 outstanding shares. In October last year the disbursement was \$4,313,554 on 2,150,777 shares outstanding.

The classification of estimated payments to be made next month follows:

The disbursements in Boston since Jan. 1 compare with previous years as follows:			
	1916.	1909.	1908.
Jan. ....	\$411,220.00	\$27,555.10	\$26,985.40
Feb. ....	7,274.20	7,399.60	7,695.90
March ....	10,000.20	8,828.40	6,112.10
April ....	28,751.50	28,290.20	23,045.10
May ....	6,857.80	11,760.00	8,762.50
June ....	9,951.80	8,843.30	7,111.80
July ....	36,319.00	26,712.10	26,101.50
Aug. ....	7,223.50	7,207.00	7,789.00
Sept. ....	10,636.20	8,170.00	7,620.50
Oct. ....	28,026.75	26,800.00	24,335.50
Totals	\$186,001.35	\$161,911.50	\$145,081.90

# Market Reports Produce Shipping

## SHIPPING NEWS

Today's arrivals at T wharf were: Steam trawler Foam 80,000 pounds, Fannie Belle Atwood 46,000, Benjamin P. Phillips 45,000, John J. Fallon 34,000, Gladys & Nellie 30,000, Flora F. Sears 30,000, Arbitrator 26,000, Olive F. Hutchins 23,200, Washakie 21,000, Harvester 18,500, Louisa R. Sylva 15,000, Hortense 12,500, Athena 12,000, Ethel B. Penney 10,000.

Dealers' prices per hundredweight at T wharf today were: Haddock \$3.75 to \$4.50, large cod \$6 to \$7.50, small cod \$4.50 to \$7.50, hake \$4.50 to \$5, cusk \$3.50, pollock \$4.50 to \$5.50. Swordfish brought 19 cents a pound.

The new steam trawler Foam returned from her first trip to Georges Banks today with 80,000 pounds of haddock. This good initial catch augurs well for the success of the vessel. It is seldom that even the Spray has reached that figure, and Capt. Michael Green is well pleased with his new command. The boat has only been out since Saturday. This catch is valued at about \$3000.

The Romanic, of the White Star line, is expected to reach Boston Sunday from Italy and the Azores with nearly 1500 passengers. Included in the list of 200 in the saloon are: Alice Nielsen, the opera singer; Mrs. J. T. Westergaard, wife of the adviser to the King of Siam, and her son, J. T. Westergaard; Miss Helen Paine, Miss Abbott, the Rev. and Mrs. P. Allen, Miss Allen, F. L. Allen, Miss Ina Atwood, Miss S. Bagge, Mrs. E. J. Bliss, Miss D. Bray, R. Caldwell, Colonel and Mrs. H. E. Cushman, Sanderson Cushman, Miss Amy Dalrymple, Dr. J. C. Delpart, Mrs. F. Woodward Earl, the Rev. W. G. Elliott, Jr., Prof. W. B. Poland, Miss H. Paine, Dr. J. J. Mitchell, Miss E. A. Taft, Mr. and Mrs. Washburn and the Rev. C. W. Wendte.

## Produce Markets

**Arrivals.**  
Str Atlantis from Sousa, S. D., brought 16,000 stems bananas for W. W. & C. R. Noyes.  
The Norfolk steamer due here tomorrow has 50 bags peanuts, 50 bbls sweet potatoes.

**Boston Receipts.**  
Apples 2268 bbls, cranberries 395 bbls, berries 8 cts, peaches 2602 cts, cantaloupes 2 cts, California oranges 384 bxs, lemons 336 bxs, bananas 16,000 stems, California deciduous fruit 5 cars, pineapples 9 cts, grapes 10,015 bskts, 2700 carriers; raisins 100 bxs, peanuts 36 bgs, potatoes 14,183 bushels, sweet potatoes 1641 bbls, onions 97 bushels.

**New York Fruit News.**  
The steamer Oceania from Mediterranean port with 3650 bxs Palermo lemons.

Only 4 cars California oranges sold Tuesday and considering the quality market was unchanged, though some thought market a little easier.

1800 bxs Malori & Sorrento lemons ex S. S. Hamburg sold. Market strong and active. Prices were high especially so for the choice stock. There were very few fancy and none extra fancy and taking the offering as a whole quality was not up to grade. Best 300s sold from \$5.75 to \$6.02 1/2. Extra choice to poor stock \$5.50 down to \$4.37 1/2.

Porto Rico grape fruit: 275 bxs sold, 165 bxs were good both for quality and condition and sold as follows: 36s \$6.37 1/2, 46s \$6.75 to \$8.12 1/2, 54s \$6.75 to \$8.12 1/2, 64s \$6.75 to \$7.50, 80s \$5.75 to \$6.37 1/2. The balance of the offering showed quite some waste and sold \$1.87 1/2 to \$5.87 1/2.

Cuban grape fruit: 246 bxs sold, 54s \$5.02 1/2, 64s \$5.25, 80s \$5.50.  
Jamaica grape fruit: 50 bxs sold, 54s \$6.50, 64s \$5.87 1/2, 80s \$4.12 1/2.

**Green Fruit to Arrive.**  
SS Koenigsluise, due about Sept 21, 4150 bxs Palermo lemons.

SS Germania, due about Sept 28, 800 bxs Messina, 900 bxs Naples lemons.  
SS Oceania, due about Sept 28, 1825 bxs Palermo lemons.  
SS Atlanta, due about Sept 22, 15,000 bskts Almeria grapes.

## PROVISIONS

**Chicago Market.**  
Dec wheat \$1.00 1/2, Oct pork \$19.72, Oct lard \$12.45, hog receipts 17,000, prices \$8.15 to \$9.35, cattle mkt steady to 10 higher, receipts 17,000, hives \$4.90 to \$5.20, cows and hirs \$2.25 to \$2.50, Tex cattle \$4.30 to \$4.60, and fairs \$3.75 to \$4, western cattle \$4.40 to \$4.70.

**Local Poultry Receipts.**  
Today 749 pkgs; last year 622 pkgs.

**Boston Prices.**  
Flour—To ship from the mills, spring patents \$5.65 to \$6.20, clears \$4.50 to \$4.80, winter patents \$4.85 to \$5.25, straight \$4.50 to \$4.90, clears \$4.40 to \$4.70, Kansas patents, in jute, \$4.90 to \$5.50; rye flour \$3.80 to \$4.00, Graham \$3.75 to \$4.25.

Corn—Carlots, on spot, No. 2 yellow 65c, steamers yellow 65 1/2c, No. 3 yellow 65c; to ship from the West, No. 2 yellow 65 1/2c to 66c, No. 3 yellow 65c to 65 1/2c.

Oats—Carlots, on spot, No. 1 clipped white 43c, No. 2 42c, No. 3 41 1/2c, rejected white 40 1/2c; to ship from the West, 40 to 42-lb clipped white 42 1/2c to 43c, 38 to 40-lb 41 1/2c to 42c, 36 to 38-lb 41c to 41 1/2c.

Cornmeal and oatmeal—Bag cornmeal \$1.27 to \$1.29 100-lb bag, granulated \$3.65 to \$3.75 bbl, bolted \$3.50 to \$3.60; oatmeal, rolled \$4.60 to \$4.85 bbl, cut and ground \$5.05 to \$5.35.

Milled—To ship from the mills, sacked spring bran \$24, winter bran \$25, middlings \$25 to \$29.50, mixed feeds \$25 to \$28, red dog \$20, cottonseed meal \$32.25 to \$32.75, linseed meal \$38.50, hominy feed \$26.15, gluten feed \$28.35, stock feed \$25.50.

Hay and straw—Hay, western choice \$12.50 to \$22, No. 1 \$19.50 to \$20, No. 2 \$20 to \$25.50, No. 3 \$16.50 to \$17.50; straw, rye \$14 to \$14.50, oat \$8.50 to \$9.

Butter—Northern creamery, 30 1/2c; western, 30c.

Eggs—Fancy nearby hennessy 35c to 36c; eastern 32c to 33c; western 25c to 26c.

Cheese—New York, twins, new, 15 1/2c; Vermont twins, extra, 15c.

Apples—Gravenstein, bbl, \$2.50 to \$3.50; duchess, bbl, \$2 to \$3; pippins, bbl, \$2 to \$2.50; common green, bbl, \$1.25 to \$2; native, bu box, 50c to \$1.25.

Potatoes—New potatoes \$1.10 to \$1.15; natives, bu box, 65c to 75c; sweet potatoes \$1.50 to \$2.50.

Onions—Connecticut river, per 110-lb bag, \$1.35; native yellow, per bu box, 75c to \$1.

Poultry—Nearby broilers 19c to 20c; choice northern and eastern fowl 18c; western fowl 17c; roasting chickens native, 17c to 19c; western chickens 16c to 18c.

Live Poultry—Chickens, broilers, per lb, 15 1/2c to 16c; chickens, 4 lbs and over, 17c to 18c; fowls 15c to 15 1/2c; roosters 10c to 11c.

Fruit—Pineapples, per crate, \$2 to \$3.75; musk-melons, Colorado, per crate, \$1.50 to \$2; blueberries, per qt, 10c to 15c; peaches, per basket, 75c to \$1; per carrier, \$1.25 to \$2.25.

**New York Receipts.**  
Today, 9000 pgs butter, 5041 bxs cheese, 13,142 cs eggs; 1900, 5700 pgs butter, 3211 bxs cheese, 13,482 cs eggs.

Tuesday, 1010, 17,960 pgs butter, 7632 bxs cheese, 17,971 cs eggs; 1900, 17,933 pgs butter, 7190 bxs cheese, 21,053 cs eggs.

**Other Markets.**  
ST. LOUIS—Egg mkt Sept 16 stdy at 23c loss off.

CHICAGO—Butter mkt Sept 20 stdy; ex 28c. No. 1 pkg stk 22c; recs 14,197. Egg mkt firm, prime 1sts 24c, 1st 22c, ordinary 1sts 20c; recs 10,197.

## RECENT PURCHASES INDICATE LOW PRICES ON BOSTON WOOL

Transactions Here Are Said to Make This City the Cheapest Market for the Staple in the World, and Demand From Abroad Stimulates Manufacturers' Interest.

Much importance is attached in some quarters in the wool trade to sales of domestic clips for export recently. The quantity does not count so much as the fact that such transactions have actually taken place, a very unusual occurrence, on account of the duty.

If anything were needed to substantiate the claim that this is the cheapest market in the world for wool at the present time, such sales suffice to indicate the condition of affairs. They are the outcome, to be sure, of the advent in this market of representatives of

English merchants picking up lots of imported wools that have not found a ready market on this side, so that it pays to send them abroad again for resale in England, American wools being offered to them meanwhile at prices which they deemed sufficiently low to warrant trying the experiment of purchasing.

It is not to be assumed, therefore, that there will be many duplications of such sales. Foreign buyers are looking, rather, for bargains in the lines of wool with which their trade is familiar, and it is stated that the bulk of what has been taken for shipment abroad thus far this year has embraced the imported kinds least suitable for use in this country and has not exceeded in the aggregate probably 3,500,000 pounds.

There has been some broadening of the local market, nevertheless, which is partly attributable to the sentimental effect, and partly due to requirements in certain directions on account of orders in hand. Values of domestic wools are practically unchanged, for there is no urgent need that would cause buyers to raise their bids or compete for any special line of offerings. Territory wools in the original bags have been taken at an estimated cost clean of close to 60 cents per pound. For Ohio XX and above the market is at 31c to 32c; unwashed delaine 26c to 31c, fine washed 33c to 34c, spring Texas 19c to 20c, fine staple territory, second basis, 5c. Second and pulled wools are steady and a little more active.

The goods market gives promise of improvement. Duplicate orders for lightweight have been encouraging lately, and there are plenty of indications that there is no excess of heavy-weight products for the approaching retail season in goods of that character. This means, at least, that not many of the goods made for the retail season now at hand will be carried over, and presumably better call for next year's heavyweights can be expected, with a resultant fair demand for the raw material a few months hence, inasmuch as revision of the wool schedule could hardly be undertaken in time to have an anticipatory effect upon current actual requirements before that period.

The fact that wool markets in Europe continue buoyant, also that the new shearing season is opening in Australia, New Zealand and South America, lends especial interest to the London sales soon to open. Arrivals closed Sept. 19 with 132,000 bales listed, and 33,000 bales of stock on hand. Of the new receipts 49,000 bales went direct to spinners, however, leaving 116,000 net available for the sales series. The price level will be scanned as usual, very closely on this side for any indications of a change in the tone.

It is hardly expected that there will be marked variations from the conditions prevailing at the previous series. If an easier tone develops it can be attributed to the prospect of a big yield from all the British colonies in the current shearing.

Some interesting wool statistics are forwarded by the American consul at Bradford, taken from the statement of the British board of agriculture. The board's statement places the total quantity of sheep, lamb and alpaca wool imported into Great Britain in 1909 at 809,000,000 pounds, the highest on record, and exceeding the total of the previous year by 85,000,000 pounds.

The total quantity reexported in 1909 was 391,000,000 pounds, so that the supply retained for home consumption amounted to 418,000,000 pounds. This net aggregate was exceeded in 1907, when the net imports were 451,000,000 pounds, the biggest on record. Of the gross imports 606,000,000 pounds came from various parts of the British empire, Australia sending 313,000,000.

The board of Trade returns for the current year are equally enlightening as to the absorbent and distributive wool capacity of Great Britain. For the seven months ending July 31, returns recently issued show wool imports of 586,197,185 pounds compared with 579,427,221 in the corresponding period of 1909, an indication of a record breaker again, with a substantial expansion over 1909 totals.

In this connection it is worthy of note that, according to the trade board's report, an excess of \$30,000,000 is shown in the net imports retained for domestic consumption in Great Britain this year for the seven months.

The report adds: "Exports of home-grown wool amounted to 21,447,000 pounds, or a decrease of 8,447,800 pounds, as compared with the same period last year. This is more than accounted for by the falling off in the demand therefor from the United States from 20,367,400 to 11,219,000 pounds."

**TO REDUCE CABLE TOLLS.**  
MONTREAL—It is now said that a 1 per cent increase in the Mackay company dividend is held back because Postmaster-General Lemieux has under way a plan to enforce a reduction of cable tolls, which would cut the Mackay Companies' profit down.

**STOPS WORK ON NEW BUILDING.**  
DETROIT—The Packard Automobile Company, which operates one of the largest plants in this city, has stopped indefinitely all work on its new building and has canceled all orders for supplies, throwing 3000 men out of work.

## DIVIDENDS

The Westmoreland Coal Company declared the usual semi-annual dividend of 5 per cent, payable Oct. 1.

The Brazil Railroad Company declared a quarterly dividend of 1 1/2 per cent on its preferred stock, payable Oct. 5.

The National Bank of Commerce in New York has declared the regular quarterly dividend of 2 per cent, payable Oct. 1.

The Dominion Natural Gas Company, Ltd., of Pittsburgh declared a regular quarterly dividend of 3 per cent, payable Oct. 1.

Reports are current in Chicago that the dividend on the common stock of the National Carbon new 6 per cent per annum will be increased.

The First National Bank has declared a regular semi-annual dividend of \$4 per share, payable Oct. 1 to stock of record Sept. 24.

The Detroit Edison Company has declared the regular quarterly dividend of 1 1/2 per cent on its capital stock, payable Oct. 15 to stock of record Oct. 1.

The Empire Trust Company of New York has declared the regular quarterly dividend of 2 1/2 per cent, payable Oct. 1. Books close Sept. 24 and reopen Oct. 1.

The Western Maryland Railway Company declared the usual quarterly dividend of 1 per cent on its preferred stock, payable Oct. 20 to stock of record Oct. 11.

The Mexican Telephone & Telegraph Company declared a semi-annual dividend of 2 1/2 per cent on the preferred stock, payable Nov. 1 to stockholders of record Oct. 15.

The Procter & Gamble Company declared a regular quarterly dividend of 2 per cent on its preferred stock payable Oct. 15. Books close Sept. 24 and reopen Oct. 17.

The Corn Products Refining Company has declared the regular quarterly dividend of 1 per cent on its preferred stock payable Oct. 10 to holders of record Sept. 30.

The Electric Storage Battery Company declared the regular quarterly dividends of 1 per cent each on its common and preferred stocks, payable Oct. 1 to stock of record Sept. 24.

The Canadian Consolidated Rubber Company, Ltd., declared quarterly dividends of 1 1/2 per cent on its preferred stock and of 1 per cent on its common stock, payable Oct. 1 to stock of record Sept. 17.

The directors of the North Butte Mining Company have declared a quarterly dividend of 30 cents per share payable Oct. 22. The dividend declared three months ago was 30 cents per share and a year ago \$1.

The New York Air Brake Company declared the usual quarterly dividend of 1 1/2 per cent, payable Oct. 28 to holders of record Oct. 6. The Pennsylvania Lighting Company declared a dividend of 1 1/2 per cent on its preferred stock, payable Oct. 15 to stock of record Oct. 1.

According to a Fall River special the quarterly dividends of 1 1/2 per cent have been declared by the American Linen Company, the Merchants Manufacturing Company and the Tecumseh Mills. All are payable Oct. 1. The Cornell Mills declared a regular quarterly dividend of 2 per cent, payable Oct. 1.

The International Nickel Company has declared the regular quarterly dividend of 1 1/2 per cent on its preferred stock and the usual quarterly dividend of 1 per cent and an extra dividend of 1/2 per cent on its common stock. The preferred dividend is payable Nov. 1. Books close Oct. 12 and reopen Dec. 2. The common dividend is payable Dec. 1. Books close Nov. 11 and reopen Dec. 2.

The Nova Scotia Steel & Coal Company, Ltd., has declared a quarterly dividend of 1 1/2 per cent on its common stock. This is an increase of 1/4 of 1 per cent over the last previous disbursement and places the issue on a 5 per cent per annum basis. The company also declared the regular quarterly dividend of 2 per cent on its preferred stock.

The Snowstorm Mining Company, operating in the Cour d'Alenes, passed its September dividend, the first time since last October. Former dividends were at the rate of 1 1/2c a share, or \$22,500 a month. Bunker Hill and Sullivan mines in the same district paid a dividend amounting to \$98,100 for September, making a total of \$750,000 for the year. Pearl Consolidated Company of Republic, Wash., paid its sixth dividend of \$19,707, at the rate of 1 cent a share. This brings the total dividends to date to \$128,096, derived from the royalty of 50 per cent paid by the Republic Mines Corporation on the ore shipped from the Lone Pine-Surprise group at Republic, which is operating under a lease and bond.

## HOUSEHOLD NEEDS

## Preserving Time Is Here—THE IDEAL Square or Round Steam Cooker

Will more than pay for itself for this use only

You put the fruit in the cans or glass jars and set the jars in the cooker. You leave the caps of the jars off, and the steam pressure forces the steam down into the jars, all through the fruit, and cooks it thoroughly in a few minutes, and then you see the fruit is not broken up at all—it is just as whole as when you put it in the jars, and the natural flavor of the fruit is retained. Nothing better, a dozen kinds of food may be cooked at the same time and over one burner of any kind of stove. You can see the saving in fuel alone, by using an "Ideal" Steam Cooker.

Get one from your dealer. Ask for an "Ideal," take no other. We will send to any address on receipt of price:

## THE HOME FORUM

## Keats at Burns' Home

ABOUT the middle of July, 1818, Keats visited the cottage of Burns, and thus describes his impressions in a letter to his brother, Tom, says John Gilmer Speed in the Century.

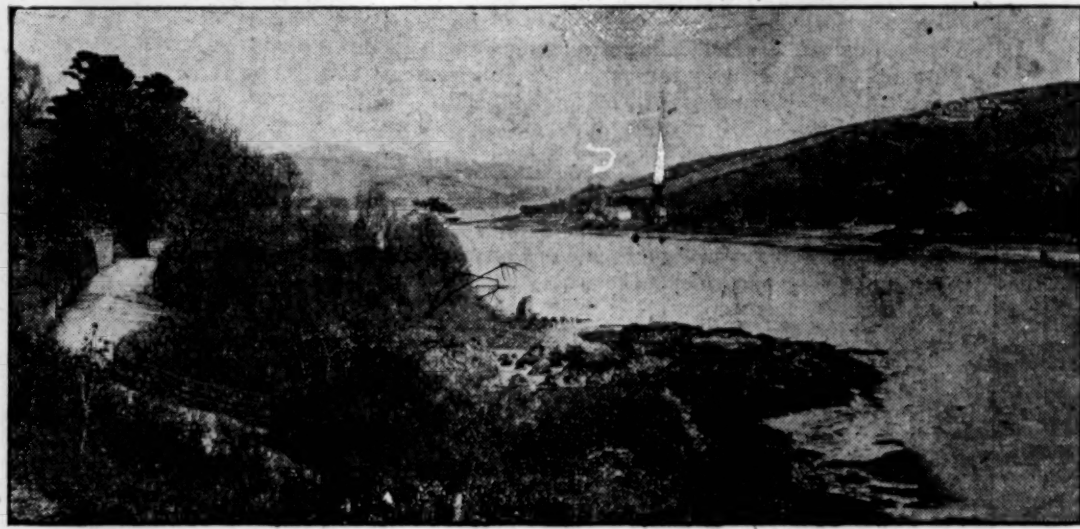

We were talking on different and in different things when, on a sudden, we turned a corner upon the immediate country of Ayr. The sight was as rich as possible. I had no conception that the native place of Burns was so beautiful; the idea I had was more desolate—his "Rigs of Barley" seemed always to me but a few strips of green on a cold hill. O prejudice! it was rich as Devon. I endeavored to drink in the prospect, that I might spin it out to you, as the silkworm makes silk from mulberry leaves. I cannot recollect it. Besides all the beauty, there were the mountains of Annan, black and huge over the sea. We came down upon everything suddenly; there were in our way the "bonny Doon," with the brig that Tam O'Shanter crossed; Kirk Alloway, Burns' cottage and the Brigs of Ayr. First we stood upon the bridge across the Doon, surrounded by every phantasm of green in tree, meadow and hill; the stream of the Doon, as a farmer told us, is covered with trees "from head to foot." You know these beautiful heaths, so fresh against the weather of a summer's evening.

Unless Christianity be viewed and felt in a high and comprehensive way how large a portion of our intellectual and moral nature does it leave without object and ambition.—Samuel Taylor Coleridge.

Old England's counties by the sea,  
From east to west are seven.  
But the gem of that fair galaxy  
Is Devon, glorious Devon! —Harold Boulton.

DEVONSHIRE awakens memories or arouses anticipation, causing visions to appear of fat farms and rich pastures in the "land of junket and cream"; of "good red earth," and golden corn fields; of ancient castles, whose ruin is hidden in a wealth of ivy and luxuriant verdure; of sunlight scenes along the beautiful coast, broken by lovely bays and creeks, each one drawing as by a magnet the admirers of its particular aspect and charm! Summertime in Devon is always delightful, whether spent on or near the coast, among the hills and dales of the agricultural "hinterland," or with the frowning tors of mysterious Dartmoor. In the rich and fertile South Devon district, the essence of rural England is seen and felt. It is celebrated for its winding lanes with the high banks that are veritable wild gardens of flower and fern, its balmy climate, its landlocked waters, and its immunity (thus far) from the "fifal fever" of modern restlessness. Many a strenuous worker has found repose and invigoration in the old-world atmosphere of the Kingsbridge, Salcombe, and Dartmouth neighborhood. James Anthony Froude, the historian, was one of the first to settle down in a charming, and in those days, isolated house looking upon Salcombe waters and out toward Bolt Head and the rock-bound harbor entrance which is believed to have inspired Lord Tennyson's poem, "Crossing the Bar." E. W. Gosse, in 1879, wrote that when the successful ex-

SOUTH DEVON.

Where the essence of rural England is seen and felt.

plorer of Bolt Head "lies basking in the sun, he will rejoice to realize that there are still nooks in this over-worn country of ours where the birds and beasts live their own lives undisturbed."

This is yet true of many another quiet spot in South Devon, but its "simple life" is already threatened by the invasion of motor traffic and improved railway service! The mildness of the climate may be gauged by the

fact that semi-tropical plants and exotics live out of doors, lemon, citron and orange trees flourish and roses and mignonette are often seen blooming in December.

The beauties of Devonshire must be enjoyed at leisure and those who are willing to turn aside from the "madding crowd" and modern hotel life at Torquay, Paignton, Sidmouth, Teignmouth, etc., will find Kingsbridge, Dartmouth,

Totnes or Newton Abbot delightful centers for excursions, "classic Dartmouth" perhaps heading the list, as it combines country, ocean and river. The Dart is a fascinating waterway, small craft penetrating as far as old-world Totnes and even beyond. Dittisham and Stoke Gabriel are two of the picturesque villages on its banks, and S. Baring Gould, that lover of Devon scenery, says, "For loveliness of situation, Stoke Gabriel in a lap or creek, facing the sun, shut away

from every wind, is the most perfect." South Devon is a well watered land, rocky Dartmoor sending forth six rivers, the Tamar, Tavy, Teign, Erme, Yealm and others, and these flowing to the English channel enhance the scenic beauty and pastoral charm of the famous "up-along" and "down-along" country.

Nor is historic interest lacking, for the "men of Devon" have ever taken their full share in England's past. How many pleasant hours can be spent in ancient Exeter, "city of great deeds and enduring memories," and who that has visited "Mother Plymouth sitting by the sea" has failed to stand upon the Hoe, and in imagination live again through stirring times!—Sir Francis Drake, apprised of the coming of the Spanish armada, Lord Howard's fleet sailing out to meet it, and in 1620, the sorrows of the anxious watchers straining after the Mayflower, steadily carrying the Pilgrim fathers out of sight. All the little seacoast towns and villages once rang with the exploits of Raleigh, Grenville, Hawkins, Oxenham, Drake and many other heroes whose names are less familiar. Devon claims also as her sons, Sir Joshua Reynolds, Richard Cosway, Samuel Taylor Coleridge, General Monk of Stuart fame, and Robert Trelawney of Ham house, who helped to found the colony of Maine. The quiet country towns of Honiton, Axminster, Tavistock, Ottery, St. Mary, Tiverton, Bampton, have records of and links with a past now growing gray and dim with age; but in the natural beauty of their scenery, unspoiled as yet by the utilitarian touch of progress, all are worthy of a visit.

## "Mister" or "Esquire"?

THE words "esquire" and "mister" are among those in daily use, and yet most of us would be rather puzzled to say in precise language what we meant by them. In a recent county-court case in England a schoolmaster was ruled out of the "gentleman" or "esquire" list. British legal distinctions on this point have been anomalous, however. The following are not "gentlemen": "A buyer of silks, a solicitor's clerk out of regular work, a commission agent, and an audit office clerk. On the other hand, the following have been held 'gentlemen'—viz., one following country pursuits, and a silent partner in some business, a medical student, a dismissed coal agent out of work, and a person living on a parent's allowance.

Matthew Arnold explained the difference in the English custom by an assertion that signified that a gentleman, or any one who is engaged in a "gentlemanly" occupation, is denominated "esquire," but that the tradesman is entitled to nothing better than "mister." The English themselves are not always sure in making the distinction. Not long ago it was found by one who took the trouble to investigate that the railway companies vouchsafe the honor of "esquire" only to those passengers who care sufficiently about their social standing to be holders of first-class season tickets. The real derivation of the word "esquire" is, as most people will remember, from "escuyer"—old French for "shield bearer"—and so it came to be applied to the chief retainers of knights. When the feudal days passed the word remained.—Harpers Weekly.

## The Ladies Pay Their Thanks

IN A poem called "The Dance," Mrs. Browning tells a charming story of the days when Italian independence was being wrought out. She describes the long green ways of the Casine at Florence, the riverside drive where the fashionable and fair of the city appear in an afternoon, where the carriages stop in groups near the band that one may listen to the music and chat with a cavalier on horseback.

Mrs. Browning says that when the "liberating nation," the French, were among the Florentines the French camp

was in the meadows near the Casine, and one day groups of French officers wandered in the crowd of promenaders.

Then one of the proudest ladies of the Florentine princesses leaned from her carriage to one of her countrymen and bade him go to the French officers and bid them to do the honor of "dancing with us straightway." One who knows the Florentine women only can understand what this condescension meant from the daughters of these great Italian families. They hold their women so jealously from a stranger's reach that even young Italian men who are friends are rarely invited to each other's homes if daughters are there.

But the gallant French officers understood this bidding and obeyed.

"And the men of France, bareheaded, bowing lowly,  
Led out each a proud signora to the space,  
Which the startled crowd had rounded for them—slowly  
Just a touch of still emotion in his face  
Not presuming, through the symbol, on the grace."

The people watched silently, understanding, as only the quick and poet-like Italian temperament can understand. Mrs. Browning says that the very mountain sighed with the deep and tender meaning of the moment, and sent a breath to kiss "the stone where Dante ate."

At the close the Italian brothers and husbands turned and embraced the Frenchmen "mouth to mouth" as men may in Italy, while such a sound of cheering rose from the people that

"We felt as if a nation, too long borne in  
By hard wrongers, comprehending in such attitude  
That God had spoken somewhere since the morning,  
That men were somehow brothers by no platitude,  
Cried exultant in great wonder and free gratitude."

## Christian Science in Business Life

A VERY frequent question asked of Christian Scientists is, What definite practical application of the rules of Christian Science can be made in everyday affairs of the world? Men finding the struggle for existence so hard

are moved to wonder if there really is a way to live in peace and assurance and to find the honest needs of every day met without the common human experience of anxiety, fear and even failure. They ask this question because they instinctively feel that there should be a way to live free from fears, when there is the purpose to do right and to fulfill the demands of duty faithfully.

In other words, it would seem that if a divine power has set men in the world to live, it should be made clear to them how they may live and govern their affairs aright. And this is something that the knowledge of Christian Science has done and is doing for thousands. There is a great body of testimony to the effect that after men have once heartily accepted Christian Science their losses have been repaired and their conditions bettered. Prosperity has followed the endeavor to seek first the kingdom of God, even as Jesus promised that it would.

A practical step to be taken in conformity with this teaching is to lift the heart up with confidence and cheer. When a spirit of love and brotherhood is born then he who was morose and always on the lookout for offense from others becomes a better neighbor and soon finds that he is among friends, where once he saw foes. This change in one's own mentality has in a thousand instances so changed the attitude of others as to prove that all men do truly prefer to be kind and just. He who knows how to stand for the ever-presence of love and justice in his thought soon enables those about him to be more harmonious and right.

This clearing of thought so that harmony shall be where was confusion brings increased clearness of insight into all affairs. Again and again, by leaving some vexed problem alone and turning to God, seeking to become more aware of the divine perfectness and

good and peace, one goes back to the troubled task to find it easy. Here is where the daily study of Christian Science, which trains one to think spiritually instead of materially about all things, may be applied by any one who will. Any one may study the daily lessons from the Bible and the text-book of Christian Science, "Science and Health with Key to the Scriptures" by Mary Baker Eddy, and even if he does not wholly understand he will be lifted little by little to higher levels of thinking and find his thought becoming based on a trust in God.

For if one can trust God enough every possible human need is at once met. This is not a blind faith without understanding, but that actual inward yielding to the statements of divine Truth concerning the allness and the omnipotence of God. This cannot come while we cling with love to materialism. We need not be discouraged if at first we see little active spiritual consciousness within ourselves; but if we are honestly willing to be separated from our idols of clay of every sort, and willing, as Mrs. Eddy says, to "abandon so fast as practical the material" (Science and Health, p. 254), we shall find our lines laid in happier and pleasanter places by unexpected yet simple readjustments.

The teaching of Christian Science is that "mortal mind sees what it believes as certainly as it believes what it sees" (Science and Health, p. 86). Therefore if we see poverty and disaster and loss it is because we believe them. To begin every day to turn our thought away from this false belief and place our trust in the divine power for good is to gradually see our affairs expressing our change of thought.

The experience of every seeker for help in Christian Science is individual. Sometimes one person needs to let go of a hidden selfishness toward others before he can realize the presence of good and abundance in his life. Sometimes there is "self-righteousness, a sense that a man has 'done the best he could all his life' and that God owes it to him to help him. Sometimes there is ambition or pride that needs the discipline of being willing to do humbler work. Sometimes there is, under the endeavor to trust God for supply, really a mere desire to equal others in display and pleasure seeking. One may sometimes have to see that the present trouble is the effect of some definite fault, even of past dishonesty or laziness on one's own part, and to acknowledge these things before God and ask to be lifted out of them. But no one who honestly strives to have his own weakness, his inefficiency, his slovenly habits of thought and action, the thousand errors of mortal mind, made plain

to him in the light of scientific understanding can fail to find the work which is for him to do and to be shown how to do it well.

An illustration of how what one thinks is expressed in one's experience is told by a woman who had a friend at work after ordinary material methods among the poor of a great city. This friend was often discouraged and brought the great burden of the world's ignorance and sloth and need constantly before the thought of the first woman until the latter began also to think poverty and limitation and physical and mental penury. She finally found that her own resources were seemingly cut off. She was doing what she could to help the poor in the ways her friend asked, but it seemed as if she would soon have little to meet her own needs. Waking to this she began to work in Christian Science, to affirm and to realize the present abundance of God, the unlimited resources of infinite Mind and the love which supplies all good to all God's children at all times. She strove to keep these absolute truths in thought instead of the picture of poverty and distress. Within one week of this steadfast work there came to her for the second time an offer of employment which she had refused a few years before, as she thought finally, in order to go on with her education.

Now the coming of this opportunity for the second time not only proved the efficacy of her prayer but also proved false the old theory that opportunity never knocks twice at the same door. Indeed the offer now came to her with double the salary attached, because of her gain in standing through the additional study. So was her trust proved that orderly things, right and good things, prevail in God's government and that those who honestly set themselves to obey His law are cared for beyond any possibilities of human providing.

Any one who will learn the rules of Christian Science and honestly adheres to them, not merely giving lip service, but opening his heart to the great comfort which God offers him, can prove the efficacy of these rules as applied to the common daily tasks and needs of mankind.

## Brilliant Rock Hues in Montana

THE following passage is from a description in the Review of Reviews of the new public park in Montana:

The Livingston range presents massive mountain groups, with tremendous pyramids almost perfect in form rather than the dagger-shaped spires of the Lewis range. Both ranges are composed of stratified Algonkian rocks—limestone, argillite, and quartzite—set above and below one another in a wealth of vivid colors. Strata of dark and maroon-red argillite, gray, black, or greenish, are displayed against massive mural limestones or other masses of glistening yellow, terra-cotta, brown, or garnet-red, while mountains of yellow or white quartzite present a spectacle scarcely less dazzling than that of the perpetual glaciers. The thousand views of blood-red, yellow and purplish rock, with shimmering lakes, green-forests, blue skies, and snow-mantled peaks, might well be left to the imagination in sheer desperation at description, except that imagination in this instance would be as futile as the pen. Here, for instance, lies a long lake, shadowed by banded pyramids of deep-red argillite and mural limestone, or red py-

ramids whose peaks catch the sun's rays like blood; others of pale yellow set against titanic rock masses of deep purple, red or brown, while the green of meadow or forested slope blends with the rock hues. And in the lake's shimmering bosom is brilliantly reflected this wealth of coloring, coupled with that of the cloud-flecked sky. There is no illusion of the atmosphere in coloring rocks and imbuing them for the time with wonderful hues, as is the case in some of the formations of the Southwest; the pigment is actually in the mountains of Glacier park in wonderful variety and intensity.

## Her Work, of Course

Suburban Mother—Willie, I hope your teacher appreciates how much I teach you at home.  
Willie—That's what I keep tellin' her, ma. She said yesterday, "I wonder where you learn your bad manners, Willie?" and I said right away, "Ma teaches 'em to me."—Suburban Life.

## What the Wright Brothers Have Done

THERE has been a good deal of caviling at the Wright brothers for their insisting on keeping their patents free of infringement. When one learns, however, that for many people the great work these inventors did is quite obscured by the crowd of workers who are making use today of their discoveries, it seems only fair that the two who made aviation practical should receive the recognition, financial and otherwise, which they really deserve.

The following account of the Wrights' work from the program of the Harvard-Boston aero meet this month shows the actual place of these American brothers in this new enterprise of the air.

Their many successful trials led them to glide from greater heights and in stronger winds, when the problems of lateral stability came before them as, apparently, an insurmountable obstacle. When lateral stability was disturbed the problem was to raise the low wing in the simplest and most effective manner by means that did not add undue weight to the whole apparatus. This they did by warping the surfaces so that the low wing presented a greater angle of incidence to the line of flight and the high wing a lesser angle. This, of course, increased the lift of the low wing and decreased the lift of the high wing, thus forming a mechanical couple tending to right the machine.

Unfortunately, however, this greater angle of incidence of the low wing reduced the speed of this wing and thus prevented the action desired.

For a long time they worked over this problem until finally they solved it by introducing a backward pressure obtained by turning the rudder towards the high wing. This backward pressure on the rudder counteracts the backward pressure on the low wing produced by the greater angle of incidence, both wings move forward at the same speed, the mechanical couple becomes effective and stability is regained.

This is the Wright invention. The principle is used on practically all machines now flying. All regain stability by raising the low wing, and all are liable to get an unbalanced backward pressure on that wing, which, if not counteracted,

will cause the machine to dive to destruction.

Through all their work the Wrights have shown the inventor's spirit; always have they been absorbed in the problem itself. Truly they are worthy of all the tributes they have received, and their names will go down in history with Watt and Gutenberg as surely as the flying machine will stand as an invention beside the inventions of the steam engine and the printing press.

## Travels of a Post Card

A post card bearing the name of a resident at Dyke, Bourne, has given much trouble to the postal authorities. The writer, a farmer, who wanted to start bee-keeping with English hives, despatched it from Austria last December. The Austrian authorities sent the card to New York, but the place could not be found in the United States. Various places in India were tried, but without success, and for a time the post card remained in the dead letter office at Bombay. Sent on its journey again, it reached New Jersey, where England was added to the address, and now, scored all over with postoffice date stamps, the card, with the name and address all but obliterated, has at length been delivered.—London Standard.

Teacher—Now, Willie, which would you rather have, two sixths of a pie or one third?

Willie—One third, Miss.

Teacher—You would, eh? And why so?

Willie—'Cause if you cut it into sixths I'd lose more of the juice.—Exchange.

## TODAY'S PUZZLE

## ZIGZAG PUZZLE.

This zigzag contains seven words of four letters each. If the words are rightly guessed and written one below another their zigzag letters, beginning with the upper left hand letter and ending with the lower left hand letter, will spell a game much enjoyed by children. The crosswords are: 1. Something which looks very pretty over a little girl's ear. 2. The name of a central state. 3. A city dwelling. 4. A rent. 5. Something used for catching animals. 6. The way a lazy person likes to be. 7. Something we always have in pairs.

## ANSWER TO YESTERDAY'S PICTURE PUZZLE.

Slate.

## Riddle and Answer

My first of anything is half;  
My second is complete  
And so remain until once more  
My first and second meet.  
Answer.—Semicircle.

## Aspiration

The bird let loose in eastern skies  
When hastening fondly home,  
N'er stoops to earth her wing,  
Nor flies  
Where idle warblers roam;  
But high she shoots through air  
And light,  
Above all low delay,  
Where nothing earthly bounds her flight  
Nor shadow dims her way.

So grant me, God, from every care  
And stain of passion free,  
Alight, through Virtue's purer air,  
To hold my course to Thee.  
No sin to cloud, no lure to stay  
My soul, as home she springs;  
Thy sunshine on her joyful way,  
Thy freedom in her wings.  
—Thomas Moore

### When East and West Clasp Hands

AT THE identical moment, almost, that the United States secretary of war entered Peking as the guest of the Chinese empire, the great republic of the western hemisphere extended its hand of welcome to the large body of young orientals who have come here to learn something of the methods of the Occident. Secretary Dickinson's mission is decidedly one of peace. So, too, is the purpose of the Chinese students now entering various schools and colleges. Through circumstances no human mind could have foreseen, the Boxer uprising is responsible for the influx of educated Chinese youths, anxious to absorb the learning of progressive nations. By returning to China the \$11,000,000 Boxer war indemnity, the United States furnished the empire with ammunition of a kind which, in its intended application, must prove a thousandfold more effective than armaments of war. Is it to be wondered that gratitude finds expression in the remarkable demonstration of welcome to the American official who goes to pay his respects to a nation possessing traditions, some of which the world will long be bound to consider indispensable?

Aside from the immediate interest attaching to the arrival of the young students, the frequency with which leading officials of the Chinese empire have visited the United States of late calls for comment. With Li Hung Chang setting an example a number of years back, it has become the custom at intervals for members of the nobility to pay extended visits to this country. Perhaps one of the most important guests in this respect was Prince Tsai Tao, the uncle of the Emperor. His intelligence, the readiness with which the prince fell in with western customs, his almost insatiable desire to learn proved no less a revelation to Americans than the fact that the apparent purpose behind the visit was to put to practical use later what was gained. One incident in connection with Prince Tsai's visit may be dwelt on. The suggestion was made to the Prince, by the Chinese Chamber of Commerce of New York, that it would be a great step forward were soldiers of the reorganized army of China to dispense with their queues. Believing example the best incentive, Tsai Tao, while subsequently traveling in Europe, had his queue cut off. It meant, perhaps, the severance of a tradition as old, almost, as the empire itself. But modern usage was asking for recognition, and the golden rule of Confucius could by no means feel itself outraged in the measure advocated, and in part adopted.

Some months after the visit of Prince Tsai another uncle of the Emperor of China arrives in the United States. Prince Tsai Hsun, the head of the imperial navy, has reached San Francisco. He has been honored on his arrival by this government. Already on his way east, he is accompanied by Charles M. Schwab, whose activities in the world of steel manufacture are familiar. Whether Mr. Schwab's attendance means an improved and enlarged Chinese navy, or social reasons are responsible, the fact remains that American manufacturers recognize the importance of the Orient as the coming market and that the east is the great factor to be reckoned with in the future.

Education is the one leveling influence essential today. Without a question, Secretary Dickinson, standing before the Ming tombs beyond the great wall, must be impressed with the immensity of the problem that China has been solving gradually during the centuries. These rulers lived unquestionably to their national purpose. Foundations were laid, more solid than the granite tombs that hold them. There have been lessons in plenty. But real solidity there cannot be without progress. Sometimes a very sharp reminder is required before the hour of awakening. It came to the empire of the east. The need was realized, and as one of the results from sending her young men to America a new China should arise, firm because of an illustrious past, full of promise because good intentions are always fruitful.

SUPERINTENDENT BROOKS of the Boston public schools is opposed to the proposed teaching of Japanese history in the public schools of the United States. Perhaps it is not Japan's past with which the modern world is most interested but rather her future, which she promises to make so alluring and impressive that the whole world will know of it without special schoolroom study.

### Chile Then and Now

WHEN President Taft wired his congratulations to the acting President of Chile on Monday of this week the message, no less than the centenary celebration that inspired it, recalled some of history's most interesting chapters. The Chile once dominated by the Incas of Peru and later under the yoke of Spain stands today a splendid testimonial to the upbuilding influences of the freedom that also made her sister republics what they are. That Chile should have selected for commemoration the day on which her struggle for final independence started and ignored the reverses that afterward replaced her under Castilian rule is notable. Evidently sentiment prefers to forget the suppression that would have set this week's festivities seven years ahead, and remember only the patriotism that, hidden temporarily, flamed forth augmented and triumphant after brief quiescence.

The spirit of independence was inbred with the warlike Araucanian who, forced to acknowledge Peruvian authority, yet threw it off again and spurned attacks until subdued by the haughty Don in 1722. Then came Europeans into Chilean life and government, and theirs has been the motive power that brought the South American republics to fruition. The land of "snow" seized its opportunity in 1810, when Spain was overrun by French armies, to revolt, depose the President and vest the government in a committee and later in a triumvirate. Then was born the real Chilean republic; the Spanish yoke reimposed in 1813 failing to hold more than four years. Meanwhile, the note sounded by Chile had awakened other South Americans. Peru and others took up the idea, as did Mexico, in Central America, and the end of Madrid's rule in the west was heralded.

At a time like this the natural inclination is to review the progress made by the celebrating nation. Chile, in an area of 291,541 square miles, has grown in estimated population from about

2,068,400 in 1875 to more than 5,000,000 according to the last census records available. In 1894 the population included 50,000 American Indians and native Araucanians, but Europeans largely predominate, and to this fact is ascribed the steady development of the country. Commerce and industry there are flourishing. Independent Chile has passed safely through the vicissitudes of war, internal conflict, misunderstanding with great nations and attempts at personal usurpation of her government. She has grown from a disorganized, factional territory into a notable factor in world affairs. All nations, observing her, can reach a better understanding of the development behind the Latin-Americans.

THE thirteen balloons which started from Indianapolis on Saturday last landed in nearly half as many states of the Union. It is evident from this showing that any one setting sail in a balloon ought not to be very particular as to where he is going or when he is to get there.

DOUBTLESS the reader is by this time familiar with the fact that the proposed intercoast canal, for which surveys are now being made under act of Congress, is intended eventually to connect Boston with New Orleans, or, better still, the ports of Maine with those of Florida. The intention is that the canal shall traverse the entire length of the Atlantic coast to Key West and thence by way of the Gulf of Mexico to the Mississippi river, at a point near New Orleans. The survey is divided into sections. Col. William M. Black, corps of engineers, U. S. A., of the New York district has charge of the survey of that part of the proposed waterway that is to connect New York harbor with the Delaware river. He has found the work to be feasible, and he is now seeking to learn from commercial interests whether there is a real necessity for the undertaking.

In the course of a circular intended mainly for commercial bodies, he says: "The attitude of the government toward works of this character demands that no project shall be undertaken which does not insure a reasonable return to the people of the United States for the expenditure involved." It was this consideration which prompted the United States engineers in charge of the recent Mississippi river survey to report that while the proposed deep waterway to the gulf was practicable, it had not been shown to be necessary. In that instance the statement was made, in substance, that there appeared to be no disposition to take advantage of the transportation facilities which the Mississippi already afforded.

Circumstances are quite different with reference to the Atlantic coast canal. That an immense carrying trade would be benefited by it there is no doubt. Nevertheless, this is something that none of the engineers in charge has a right to assume; it is something that needs to be established by the friends of the proposed undertaking. The board of engineers will doubtless call upon representative commercial bodies all along the proposed route to supply arguments in favor of the enterprise. It is for the proponents to make due preparation, that the case may not be weakened by mere lack of information.

### Seattle's Great Harbor Project

SEATTLE, founded in 1852, remained a village until 1880. Nine years later, having attained the proportions of a considerable city, it was almost wholly destroyed by fire, the loss approximating \$15,000,000. At that time, and during its rebuilding, Lake Washington was "over the hills and far away." But the city had grown out to the borders of that beautiful body of water by the time when visitors were crowding the district for the Yukon exposition. Seattle occupies an elevated site on Puget sound. Its commanding position is particularly striking when approached by water from Tacoma. From the waterfront it was a picturesque settlement half a century ago, it is one of the most picturesque cities in America today.

Discovery of gold in the Klondike and development of the natural resources of Alaska have contributed largely toward making Seattle a great seaport. So important has its commerce become that more and better harbor facilities are necessary and urgent. The last session of Congress permitted an item to go through with the river and harbor bill to provide for a lock that will render feasible the opening of the Lake Washington canal, a project that will add 24,000 acres of fresh and navigable water to Seattle's harbor. The government provides for the lock—which, by the way, will be the largest in existence outside of Panama—but the city of Seattle and King county have placed themselves under obligations to complete the waterway.

With Puget sound, the canal and Lake Washington, Seattle's water frontage will be increased from about ten miles to more than a hundred. Moreover, it will have what will amount practically to a hidden fresh water harbor capable of floating easily the largest fleet the United States is likely to have on the Pacific side of the country at any time. In this larger sense the Lake Washington canal is an undertaking of national importance and significance.

THE sum of \$5000 a week seems pretty large to pay even Sarah Bernhardt for a music hall turn, but it is said that the London manager who has attempted it is reaping large profits from his venture.

ALTHOUGH the public is rather eager to see the new football rules put into practice, it is convinced that they are enough like the old ones to insure an interesting game.

FORTIFICATIONS for the Panama canal on a liberal scale should convince those who say such things are contrary to agreements that they know very little about the matter.

A BATH every day, in accordance with the new American naval orders, will teach the sailors to like the water.

IN baseball parlance, the Athletics and the Cubs seem to have clinched their holds on the respective pennants.

NOW that the taxi rates have mounted, the Boston hackman is likely to find the old horse more valuable.

FLYING over the Alps in an aeroplane appears much like crossing the ocean in a skiff.

THE "shadow of 1912" may be that of neither Taft nor Roosevelt.

### Is the Intercoast Canal a Necessity?

THERE is building in the metropolis of the country at present a \$1,500,000 apartment house designed especially for the accommodation and comfort of those who are so circumstanced that they can look forward to the coming of rent day with indifference and backward to it without regret. This structure, we are informed, is to contain eighteen luxurious apartments renting all the way from \$10,000 to \$25,000 a year. The apartments are to be divided into twelve called ordinary and six called duplex.

Strange to say, while one may rent a duplex apartment in this structure from \$10,000 up, the scale for the ordinary apartments runs from \$14,000 up. This would seem to indicate that, in a social way, one can do better by remaining ordinary than by becoming duplex, and yet the common impression has always been quite different. At first blush a millionaire unfamiliar with social classifications in the palatial flat center might imagine that by moving into a complex apartment he would have better standing on the avenue, but this, we now see, would be a mistake. It would be worth his while even to pay a considerable bonus for an ordinary flat.

However this may be, the fact of greatest moment to those who are looking forward to the time when they can live in a palatial apartment house of the truly modern type is the risk they are running by delaying the move. When flats first came into use in this country people living in dwellings could hardly be induced to look at them. "They live in a flat" was regarded for a long time as a term of reproach. The people who occupied five rooms at \$20 or seven rooms at \$25 were alluded to by those who occupied houses with upstairs and outdoors attractions as "mere flatters." Gradually the flat became an apartment, and interest on the cost of hardwood floors, marble wainscoting, porcelain bath tubs and so on was added to the rent, so that the people in dwellings, while still unreconciled, treated the occupants with greater respect, and would now and then unbend so far as to return their calls. Still later, the social barrier disappeared altogether, and during recent years instances have come to notice where the occupants of apartments have been found to hesitate when asked if they knew the people in the detached house across the way.

Just what the outcome of the complex and ordinary apartment system may be it is impossible to say, but when it is considered that the rent is now beginning to vary between \$10,000 and \$25,000 a year, it will be seen that those who might have rented a flat at one time from \$15 to \$35 a month, and who failed to jump at the opportunity, and who have since clung to a dwelling, may now be excluded from flat life altogether. In the very nature of things rents for the ordinary and complex apartment will advance. Judging the future by the past, the time may come when an apartment, ordinary or complex, that will not command at least \$100,000 a year will be occupied only by those who are devoid of social aspirations.

IN REFUSING to support his party's candidate for Governor of Nebraska, Mr. Bryan has fully qualified for membership with the insurgents. The ranks are being rapidly swelled with recruits from both of the leading parties.

REDUCTION of idleness, as a question of moment, gains world-wide recognition in the first international conference on unemployment, now under way at Paris. When a thing is significant enough to warrant such attention, that very fact is indicative of the success that must attend sincere efforts to ascertain the reason for conditions arising, without doubt, from some flaw in the human plan of action. With the assembling of representatives of the nations solely to learn the scientific causes of unemployment one of humanity's vexing handicaps takes on smaller proportions. Methods for conserving human resources are surpassingly important to the welfare of all countries. Uneven distribution of wealth naturally has created classes and drawn the sharpest line between capital and labor. With the high-cost-of-living situation faced inequitably by the poor man and the rich one, their differences of environment and prospect are so marked that the former seemingly has no chance at all. Strong contrasts, however, often are misleading.

It is the man whose opportunities are dwarfed by some present-day conditions that the Paris conference is designed to assist. The habitual idler has no place in the universal scheme, while his worthier and more unfortunate brother can be made a valuable factor there by sagacious direction and development of his latent abilities. As a first step the conference will lay the basis for a labor exchange system. This is to be put in effect between city and country districts, and eventually between the different nations. Those who need employment in order to maintain their families and themselves may then be placed where work offers, whether distant a few miles or innumerable leagues.

Cities might aid nations in this stupendous effort. Municipalities all over the world are conducting self-advertising campaigns. They seek to attract capital first of all, but the welcoming hand must be extended also to labor, its concomitant, for capital and labor are mutually sustaining. Why should not more of these cities that so wisely air their advantages let the world know what they have to offer in the way of employment? Work is of more pressing importance to the average man than charm of environment and social recreation. And it is the average man in the aggregate who builds up a community.

America figures, to some extent, as a passive participant in the Paris deliberations, for the problem of Europe falls less acutely on the western hemisphere. But even American municipalities have at times to overcome the same difficulty, and with it the opportunity to help eliminate unemployment from the world scheme. Town, city, national and international labor exchanges loom up favorably as the means. Interchange of thought should remove indefiniteness from the application of that idea. There is work enough in the world for every man and woman. Bringing the employer and the employee together must be worked out in order to destroy idleness and afford every one the opportunity to exercise his privilege of sharing in the general activities.

NOW that Yale's president says that Messrs. Taft and Roosevelt are as cordial as ever, the rest of the country may as well cease trying to create a coolness between them.
